Religious Organizations In Community Services A Social Work Perspective:

Religious Organizations in Community Services Terry Tirrito, Toni Cascio, 2003-01-16 This book explores the scope and breadth of religious organizations in social work practice. It begins by tracing the origins of the social work profession back to the earliest civilizations and their religious traditions, establishing the precedent for a fruitful commingling of religion and social welfare. The contributors propose that religious faith organizations can assume responsibilities for social welfare in the 21st century, using the Korean Church as one example of an effective provider of social services. A 12-step model for religious organizations to use to develop community action programs is also presented. Social Work and Faith-based Organizations Beth R. Crisp, 2014-04-29 Faith-based organizations continue to play a significant role in the provision of social work services in many countries, but their role within the welfare state is often contested. This text explores their various roles and relationships to social work practice, includes examples from different countries and a range of religious traditions, and identifies challenges and opportunities for the sector. Social Work and Faith-based Organizations discusses issues such as the relationship between faith-based organizations and the state, working with an organization's stakeholders, ethical practice and dilemmas, and faith-based organizations as employers. It also addresses areas of debate and controversy such as providing services within and for multi-faith communities and tensions between professional codes of ethics and religious doctrine. Accessibly written by a well-known social work educator, it is illustrated by numerous case studies from a range of countries including Australia, the UK, and the US. Suitable for social work students taking community or administration courses or undertaking placements in faith-based organizations, this innovative book is also a valuable resource for managers and religious personnel who are responsible for the operation of faith-based agencies. **Spiritual Diversity in Social Work Practice** Edward R. Canda, Leola Dyrud Furman, 2010 Weaving together interdisciplinary theory and research, as well as the results from a national survey of practitioners, the authors describe a spiritually oriented model for practice that places clients' challenges and goals within the context of their deepest meanings and highest aspirations. Using richly detailed case examples and thought-provoking activities, this highly accessible text illustrates the professional values and ethical principles that guide spiritually sensitive practice. It presents definitions and conceptual models of spirituality and religion, draws connections between spiritual diversity and cultural, gender, and sexual orientation diversity, and offers insights from Buddhism, Christianity, Confucianism, Hinduism, Indigenous religions, Islam, Judaism, Existentialism, and Transpersonal theory. Eminently practical, it guides professionals in understanding and assessing spiritual development and related mental health issues and outlines techniques that support transformation and resilience, such as meditation, mindfulness, ritual, forgiveness, and engagement of individual and community-based spiritual support systems. **Religion, Welfare and Social Service Provision** Robert Wineburg, Jay Poole, 2019-04-16 Religion, Welfare and Social Service Provision Common Ground delves deeply into the partnerships forged between religious communities, government agencies, and nonprofits to deliver social

based with faith based organizations nonprofits with for profits and the logistics of contracting before and after Charitable Choice Among their findings in states where such information is available the composition of social service contractor pools has changed very little Reflecting their varied political cultures states have funded programs differently Faith based organizations have not been eager to seek government contracts perhaps wary of additional legal restraints and reporting burdens The authors conclude that faith based organizations appear no more effective than secular organizations at government funded social service provision that there has been no dramatic change in the social welfare landscape since Charitable Choice and that the constitutional concerns of its detractors may be valid This empirical study penetrates the fog of the culture wars moving past controversy over the role of religion in public life to offer pragmatic suggestions for policymakers and organizations who must decide how best to assist the needy
