Material Culture and Asian Religions Benjamin Fleming, Richard Mann, 2014-03-26 Traditionally research on the history of Asian religions has been marked by a bias for literary evidence privileging canonical texts penned in classical languages Not only has a focus on literary evidence shaped the dominant narratives about the religious histories of Asia in both scholarship and popular culture but it has contributed to the tendency to study different religious traditions in relative isolation from one another Today moreover historical work is often based on modern textual editions and increasingly on electronic databases What may be lost in the process is the visceral sense of the text as artifact as a material object that formed part of a broader material culture in which the boundaries between religious traditions were sometimes more fluid than canonical literature might suggest This volume brings together specialists in a variety of Asian cultures to discuss the methodological challenges involved in integrating material evidence for the reconstruction of the religious histories of South Southeast Central and East Asia By means of specific test cases the volume explores the importance of considering material and literary evidence in
