Reproducing Citizens: family, state and civil society Sasha Roseneil, Isabel Crowhurst, Ana Cristina Santos, Mariya Stoilova, 2017-10-02 Whilst the politics of reproduction have been at the heart of feminist struggles for over a century and a half their analysis has not yet come to occupy a central place in the interdisciplinary study of citizenship This volume takes up the challenge posed by Bryan Turner when he noted the absence of any systematic thinking about familial relations reproduction and citizenship 2008 and offers the first major global collection of work exploring this nexus of practices and political contestations The book brings together citizenship scholars from across Europe the Americas and Australia to develop feminist and queer analyses of the relationship between citizenship and reproduction and to explore the ways in which citizenship is reproduced Extending the foundational work of feminist political theorists and sociologists who have interrogated the public private dichotomy on which traditional civic republican and liberal understandings of citizenship rest the contributors examine the biological sexual and technological realities of natality and the social realities of the intimate intergenerational material and affective labour that are generative of citizens and that serve to reproduce membership of and belonging to states nations societies and thus of citizenship itself This book was published as a special issue of *Citizenship Studies*

The Impossible Community John P. Clark, 2013-06-06 This book is available as open access through the Bloomsbury Open Access programme and is

available on www.bloomsburycollections.com The Impossible Community confronts a critical moment when social and ecological catastrophe loom the Left seems unable to articulate a response and the Right is monopolizing public debates This book offers a reformulation of anarchist social and political theory to develop a communitarian anarchist solution It argues that a free and just social order requires a radical transformation of the modes of domination exercised through social ideology and institutional structures Communitarian anarchism unites a universalist concern for social and ecological justice while recognizing the integrity and individuality of the person In fact anarchist principles of mutual aid and voluntary cooperation can already be seen in various contexts from the rebuilding of New Orleans after Katrina to social movements in India This work offers both a theoretical framework and concrete case studies to show how contemporary anarchist practice continues a long tradition of successfully synthesizing personal and communal liberation This significant contribution will appeal not only to students in anarchism and political theory but also to activists and anyone interested in making the world a better place

The Idea of Decline in Western History Arthur Herman, 2010-06-15 Historian Arthur Herman traces the roots of declinism and shows how major thinkers past and present have contributed to its development as a coherent ideology of cultural pessimism From Nazism to the Sixties counterculture from Britain's Fabian socialists to America's multiculturalists and from Dracula and Freud to Robert Bly and Madonna this work examines the idea of decline in Western history and sets out to explain how the conviction of civilization's inevitable end has become a fixed part of the modern Western imagination Through a series of biographical portraits spanning the 19th and 20th centuries the author traces the roots of declinism and aims to show how major thinkers of the past and present including Nietzsche DuBois Sartre and Foucault have contributed to its development as a coherent ideology of cultural pessimism

The Murray Bookchin Reader Janet Biehl, Murray Bookchin, 1999 This collection provides an overview of the thought of the foremost social theorist and political philosopher of the libertarian left today Best known for introducing ecology as a concept relevant to radical political thought in the early 1960s Murray Bookchin was the first to propose in the innovative and coherent body of ideas that he has called social ecology that a liberatory society would also have to be an ecological one His writings span five decades and encompass subject matter of remarkable breadth Bookchin's writings on revolutionary philosophy politics and history are far less known than the specific controversies that have surrounded him but deserve far greater attention Despite Bookchin's critical engagement with both Marxism and anarchism his political philosophy known as libertarian municipalism draws on the best of both for the emancipatory tools to build a democratic libertarian alternative His nature philosophy is an organic outlook of generation development and evolution that grounds human beings in natural evolution yet contrary to today's fashionable anti-humanism places them firmly at its summit Bookchin's anthropological writings trace the rise of hierarchy and domination out of egalitarian societies while his historical writings cover important chapters in the European revolutionary tradition Consistent throughout Bookchin's work is a search for ways to replace today's capitalist society which disenfranchises

most of humanity for the benefit of the few and is poisoning the natural world with a more rational and humane alternative The selections in this reader constitute a sampling from the writings of one of the most pivotal thinkers of our era

Revisioning Emerson as a Theorist of Reading Michael Boatright,2024-12-31 Pushing beyond the anthologized writings of Ralph Waldo Emerson frequently taught in American literature courses this book examines the corpus of his published work to cultivate a unique understanding of his ideas in relation to reading By following the history of Emersonian criticism over the years including research surrounding Emerson and reading theory these chapters provide a persuasive and accessible exploration of Emerson that highlight the value of his work for both literary and reading scholars Boatright argues that while Emerson predates the research in reading studies that emerged in the early twentieth century his ideas around reading engagement shared reading experiences and experimentation with reading are exceedingly relevant for encouraging healthy reading practices in the literature classroom
