Remnants Of The Fall Revelations Of Particle Secrets:

Remnants Of The Fall: Revelations Of Particle Secrets William B Rolnick, 2003-05-23 This is a book that sings about the beauty of the fundamental laws of nature Clear accurate descriptions for general science readers no equations in sight are punctuated with original scintillating verses The reader is taken on a journey through the contemporary understanding of the building blocks of nature and their interactions the current status of that age old intriguing quest The central role of symmetry is explained in a manner suitable for general science readers and its splendor is celebrated in verse The book facilitates understanding of the background and significance of today s scientific discoveries in atomic nuclear and particle physics Many of the poems appear as interludes that reinforce the discussions as they amuse the reader making this informative book a delight to read Three Plays of Maureen Hunter Hunter, Maureen, 2003 Book is clean and tight No writing in text Like New *Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma* Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In *Unriddling the Quantum Enigma* the first volume of the series commonly titled *Liberating Sociology From Newtonian toward Quantum Imaginations* sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing

the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebbeh Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of Disciplinary Decadence Living Thought in Trying Times Routledge Paradigm 2006 and Freedom Justice and Decolonization Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as

Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi's *Liberating Sociology* succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

Before the Light: The Secret History of Water and Creation (Daoist Cosmology Series) Laing Z. Matthews,2025-11-08

Before there was form there was Water Before the first light there was a reflection waiting to be seen Before the Light The Secret History of Water and Creation is a luminous exploration of how consciousness becomes world Drawing from ancient Daoist cosmology early creation hymns and modern physics Laing Z Matthews reveals the forgotten lineage of the Great One the primordial intelligence that gives birth to Water and through it to Heaven Earth and time itself Across history sages have said the same thing in different tongues The Great One gives birth to Water The Bible calls it Spirit moving upon the deep Egyptian hymns call it the flood before the sun Daoist texts call it the pulse of the Dao Matthews unites these visions into one coherent cosmology showing that Water in its deepest sense is not a physical element but the first act of awareness It is consciousness made visible Through poetic prose and lucid metaphysical structure Before the Light reinterprets classical creation as a living process within each of us The Great One is not a distant god but the stillness behind our own thought Water is not mere substance but the mirror of mind When awareness looks upon itself the first ripple of time begins and the universe unfolds as reflection rhythm and return Each chapter traces one stage in this unfolding The Great One Gives Birth to Water stillness overflowing into movement Water Before Heaven and Earth how reflection becomes direction and polarity Heaven and Earth Assist Each Other the marriage of expansion and containment Divine Radiance consciousness awakening within form The Year the circular respiration of time itself Matthews blends classical Daoist texts Taiyi Sheng Shui Daodejing Huangting Jing with modern insights from quantum field theory and biophysics revealing a single truth that spans both mysticism and science that everything which exists is the Dao breathing through Water Even the brain the tides and the human heart echo this same cosmic rhythm The pulse of creation is still alive within the bloodstream within the stars and within awareness itself Written with the elegance of spiritual poetry and the precision of natural philosophy Before the Light speaks equally to seekers scientists and mystics It dissolves the false boundary between spirit and matter showing that the

universe did not arise from chaos but from coherence the quiet intelligence that moves through all living water This is not a book of doctrine but of remembrance It calls the reader to experience creation directly not as a myth of the past but as a living event in the present moment To read it is to stand again at the edge of the cosmic sea before the first dawn and to witness the Great One give birth to Water inside your own consciousness For those drawn to the meeting of cosmology mysticism and modern science Before the Light restores an ancient truth that life began not with violence but with reflection that the world was not built but dreamed into being by the stillness that loved itself enough to move
