Privatisation and Structural Change in Transition Economies Yelena Kalyuzhnova,Wladimir Andreff,2003-09-08 Privatisation and Structural Change in Transition Economies brings together specialists from different areas governance regulation macro econometrics micro econometrics enterprise culture foreign direct investment technology transfer to focus on the many different aspects of the privatization process in transition economies The book does not dwell on the administrative or procedural aspects of privatisation Instead it attempts to understand the bigger picture in terms of underlying policy environment and supporting legal and economic measures which helped to a large extent to determine the eventual success or failure of privatization programmes **The Waning of the West: an Inconvenient Truism** Peter J.

Sandys,2019-02-18 The Waning of the West An Inconvenient Truism offers a comprehensive geopolitical and philosophical commentary on global politics following the Cold War Author Peter J Sandys presents a series of extensive analyses on social and political movements and what kinds of challenges face the West in the twenty first century Sandys gives what he describes as a politically incorrect examination of political philosophy and the socialist transformation of the West He s critical of the present Western political arrangement and after analyzing the different systems offers recommendations as to the methods of solving the readily apparent impasse Topics include the screenplay of the Velvet Revolution European federalism under German leadership Russia s newly found old identity a critique of democracy a critique of socialism a critique of modern conservatism and deteriorating social values The Waning of the West An Inconvenient Truism delivers Sandys thoughts on the rejection of liberal democracy and the condemnation of the Western elite It goes on to outline a new system termed the essential option that has the manners values and qualities associated with meritorious aristocracy and is

intended to gently steer Western culture and politics onto a more sustainable course **Czechoslovakia** NA NA,2016-04-30

A decade ago playwright dissident Václav Havel led an almost bloodless revolution against Czechoslovakia's hardline communist regime. In the years that followed the country split apart into two independent Czech and Slovak states each taking radically different paths to reform. This book examines the core issues at work in the last decade focusing on the political, economic and philosophical underpinnings of the reform process. *Assessing the Value of Law in Transition Economies* Peter Murrell,2001 Explores the role of law in nations making the transition to market democracies

American Post-Conflict Educational Reform N. Sobe,2009-11-23 This edited volume brings together historians of education and comparative education researchers to study the educational reconstruction projects that Americans have launched in post conflict settings across the globe. *Ahead of the Curve?* Louis Emmerij,Richard Jolly,Thomas George Weiss,2001 Traces the history of ideas central to UN debates from its establishment in 1945 to the late 1990s. Analyses the four founding ideas of the UN: peace and negotiation in place of war, decolonization, human rights and economic and social development and highlights the different phases of the UN's intellectual history: the focus on development in the 1960s, the challenge of employment and basic needs in the 1970s, UN global conferences in the 1970s and 1990s, the financial and social crises of the globalization era, the collapse of the Socialist bloc, widening income gaps and crises of national and global governance. *Globalization Under and After Socialism* Besnik Pula,2018-07-31 The post communist states of Central and Eastern Europe have gone from being among the world's most closed autarkic economies to being some of the most export oriented and globally integrated. While previous accounts have attributed this shift to post 1989 market reform policies, Besnik Pula sees the root causes differently. Reaching deeper into the region's history and comparatively examining its long run industrial development, he locates critical junctures that forced the hands of Central and Eastern European elites and made them look at options beyond the domestic economy and the socialist bloc. In the 1970s Central and Eastern European socialist leaders intensified engagements with the capitalist West in order to expand access to markets, technology and capital. This shift began to challenge the Stalinist developmental model in favor of exports and transnational integration. A new reliance on exports launched the integration of Eastern European industry into value chains that cut across the East-West political divide. After 1989 these chains proved to be critical gateways to foreign direct investment and circuits of global capitalism. This book enriches our understanding of a regional shift that began well before the fall of the wall while also explaining the distinct international roles that Central and Eastern European states have assumed in the globalized twenty first century. **The Road to the European Union** Jacques Rupnik,Jan Zielonka,2003-11-08 Publisher Description

Christian Democracy and the Fall of Communism Michael Gehler,Piotr H. Kosicki,Helmuth Wohnout,2019-11-20 Debates on the role of Christian Democracy in Central and Eastern Europe too often remain strongly tied to national historiographies. With the edited collection the contributing authors aim to reconstruct Christian Democracy's role in the fall

of Communism from a bird's eye perspective by covering the entire region and by taking third way options in the broader political imaginary of late Cold War Europe into account. The book's twelve chapters present the most recent insights on this topic and connect scholarship on the Iron Curtain's collapse with scholarship on political Catholicism, Christian Democracy, and the Fall of Communism, offering the reader a two-fold perspective. The first approach examines the efforts undertaken by Western European actors who wanted to foster or support Christian Democratic initiatives in Central and Eastern Europe. The second approach is devoted to the re-emergence of homegrown Christian Democratic formations in the 1980s and 1990s. One of the volume's seminal contributions lies in its documentation of the decisive role that Christian Democracy played in supporting the political and anti-political forces that engineered the collapse of Communism from within between 1989 and 1991.

Beyond Varieties of Capitalism Bob Hancké, Martin Rhodes, Mark Thatcher, 2007-05-17 This edited work critically analyses developments in European Political Economy and their effects on the continental European economies. Leading political economists from Europe and the United States consider how the influential Varieties of Capitalism approach can help us understand these challenges.

Out of the Red Mitchell Alexander Orenstein, 2001 A comprehensive parallel study of two critical East Central European transition economies.

Transition, the First Ten Years Pradeep Mitra, Marcelo Selowsky, 2002 The wide variation in transition economies raises questions about differences in economic growth, the applicability of transition policies, and the advantages of economic reform. This report seeks to answer these questions.

Europeanization as Discursive Practice Senka Neuman Stanivuković, 2017-09-01 Europeanization as Discursive Practice adopts a poststructuralist reading of Europeanization to study the effects of EU accession in the light of political territoriality and consequent state building processes in the EU and Central and Eastern European countries, CEECs, and the Western Balkans from 1990-2013. Focusing on how domestic actors have framed Europe, EU norms in the debates on territorial reforms and the implications of this framing on policy reforms, it asks how competing articulations of the EU and its norms construct state territoriality in the given political and policy debates. The book argues that the European Union acted as a discursive force and a challenge to the established structures of understanding of territoriality, statehood, and power. With this, the author proposes a new research model for the study of Europeanization that goes beyond the neo-institutionalist account of the EU's policy norm transfer to member/non-member states. This text will be of key interest to students, scholars, and practitioners of European integration, EU foreign policy, enlargement policy, and regional policy and territoriality in post-socialist spaces.

Encyclopedia of Nationalism, Two-Volume Set, 2000-10-27 Nationalism has unexpectedly become a leading local and international force since the end of the Cold War. Long predicted to give way to pan-national or economic organizations, nationalism exerts its tremendous force on all continents and in a wide variety of ways. The Encyclopedia of Nationalism captures the aims and scope of this force through a wide-ranging examination of concepts, figures, movements, and events. It is the only encyclopedic study of nationalism available today.
