Hale, John Rigby Hale, 1977-01-01 **The Mechanics of Modernity in Europe and East Asia** Erik Ringmar, 2005 This book provides a new answer to the old question of the rise of the west why did some countries embark on a path of sustained economic growth while others stagnated Taking a global view Ringmar investigates the implications of his conclusions on issues facing the developing world today The Embattled Northeast Kenneth M. Mending Bodies, Saving Souls Guenter B. Risse, 1999-04-15 This is a brilliant original and broadly defined history of the hospital drawing extensively on narratives written by patients and caregivers to give vivid pictures of hospital life at key stages in the development of the institution Music and Visual Culture in Renaissance Italy Chriscinda Henry, Tim Shephard, 2023-05-24 The chapters in this volume explore the relationship between music and art in Italy across the long sixteenth century considering an era when music making was both a subject of Italian painting and a central metaphor in treatises on the arts Beginning in the fifteenth century transformations emerge in the depiction of music within visual arts the conceptualization of music in ethics and poetics and in the practice of musical harmony This book brings together contributors from across musicology and art history to consider the trajectories of these changes and the connections between them both in theory and in the practices of everyday life In sixteen chapters the contributors blend iconographic analysis with a wider range of approaches investigate the discourse surrounding the arts and draw on both social art history and the material turn in Renaissance studies They address not only paintings and sculpture but also a wide range of visual media and domestic objects from instruments to tableware to reveal a rich varied and sometimes tumultuous exchange among musical and visual arts and ideas Enriching our understanding of the subtle intersections between visual material and musical arts across the long Renaissance this book offers new insights for scholars of music art and cultural history Chapter

Faustus Leo Ruickbie, 2011-10-24 Five hundred years ago the legend was born of a man who sold his soul to the Devil for power, wealth and women. It is a legend that has inspired genius and still inspires high art and popular culture alike. Around the world there are hundreds of nightly performances of Goethe's Faust as well as actual attempts at soul selling on eBay. Faustus has rightly been described as an icon of modern culture. But in 500 years no one has written his biography until now. Faustus is the real story behind the legend. It is the story of a sixteenth century scandal of a man who claimed mastery of the forbidden magical arts and dared to rival the miracles attributed to Jesus; he evoked uproar and was accused of heinous crimes. But Faustus was not a charlatan nor was he in league with the Devil. To find the real Faustus is to find the true history of his age and Leo Ruickbie expertly takes the reader on a tour of war-torn Italy, Reformation Wittenberg and the magnificence of Charles V's court. The life of the legend becomes as real as any living person.

The Cartographic State Jordan Branch, 2014 This book describes the emergence of the territorial state and examines the role that cartography has played in shaping its linear boundaries.

Cultures in Contact Dirk Hoerder, 2002-11-21 A landmark work on human migration around the globe. Cultures in Contact provides a history of the world told through the movements of its people. It is a broad pioneering interpretation of the scope, patterns and consequences of human migrations over the past ten centuries. In this magnum opus, thirty years in the making, Dirk Hoerder reconceptualizes the history of migration and immigration, establishing that societal transformation cannot be understood without taking into account the impact of migrations and indeed that mobility is more characteristic of human behavior than is stasis. Signaling a major paradigm shift, Cultures in Contact creates an English language map of human movement that is not Atlantic Ocean based. Hoerder describes the origins, causes and extent of migrations around the globe and analyzes the cultural interactions they have triggered. He pays particular attention to the consequences of immigration within the receiving countries. His work sweeps from the eleventh century forward through the end of the twentieth when migration patterns shifted to include transpacific migration, return migrations from former colonies, refugee migrations and distinct regional labor migrations in the developing world. Hoerder demonstrates that as we enter the third millennium, regional and intercontinental migration patterns no longer resemble those of previous centuries. They have been transformed by new communications systems and other forces of globalization and transnationalism.

A History of the Oratorio Howard E. Smither, 2012-09-01 Howard Smither has written the first definitive work on the history of the oratorio since Arnold Schering published his *Geschichte des Oratoriums* in 1911. This volume is the first of a four-volume comprehensive study that offers a new synthesis of what is known to date about the oratorio. Volume 1, divided into three parts, opens with the examination of the medieval, Renaissance and early Baroque antecedents and origins of the oratorio, with emphasis on Rome and Philip Neri's Congregation of the Oratory and with special attention to the earliest works for which

the term oratorio seems appropriate The second part recounts the development of the oratorio in Italy circa 1640 1720 It reviews the social contexts patrons composers poets librettos and music of the oratorio in Italy especially in Vienna and Paris The procedure adapted throughout the work is to treat first the social context particularly the circumstances of performance of the oratorio in a given area and period then to treat the libretto and finally the music For each geographic area and period the author has selected for special attention a few oratorios that appear to be particularly important or representative He has verified the information offered in the specialized literature whenever possible by reference to the music or documents In a number of areas particular seventeenth century Italy in which relatively few previous studies have been undertaken or secondary sources have proven to be inadequate the author has examined the primary sources in manuscript and printed form music librettos and documents of early oratorio history Impressive research and intelligent integration of disparate elements make this complicated diffuse subject both readable and accessible to the student of music Volume 2 The Oratorio in the Baroque Era Protestant Germany and England and Volume 3 The Oratorio in the Classical Era continue and expand the study of oratorio history Although this series was originally announced as a three volume study Smither will conclude with a fourth volume This new work the first English language study of the history of the oratorio will become the standard work on its subject and an enduring contribution to music and scholarship Originally published in 1977 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Depictions of the Three Orders and Estates around the Year 1500 Tomislav Vignjević, 2019-07-18 This volume highlights the copious and various depictions of the three orders of society during the Late Middle Ages and at the beginning of the Early Modern Period It discusses the origins and development of the trifunctional division into the orders of the oratores bellatores and laboratores and the abundantly preserved visual material which proves that this scheme was one of the most widespread ideological foundations of European societies at that time Late Gothic and Renaissance depictions of the three orders of society can be found in different mediums from woodcuts to wall paintings and were produced by important artists such as J Fouquet and Pieter Bruegel as well as anonymous painters The vast numbers of preserved examples of this topic confirm the significance and strength of this iconographic theme at the end of the Middle Ages

Golub, 1997-05 Edward Golub distinguished researcher and former professor of immunology shows that major advances in medicine are caused by changes in the way scientists describe disease Bleeding sweating and other treatments we consider barbaric were standard treatments for centuries because they conformed to a conception of disease shared by patients and doctors Scientific breakthroughs in the understanding of disease in the nineteenth century transformed treatment and the goals of medicine Golub argues that the ongoing revolution in molecular genetics has opened the door to the biology of complexity again transforming our view of disease This thought provoking timely book reveals a crucial but overlooked role of science in medicine and offers a new vision for the goals of both science and medicine as we enter the twenty first century **Human Ecology** Amos H. Hawley, 1986-11-15 Human Ecology A Theoretical Essay by Amos Hawley presents for the first time a unified theory of human ecology by a scholar

whose name is virtually synonymous with the discipline Focused on the interaction between society and environment human ecology is an attempt to deal holistically with the phenomenon of human organization Beginning in the first quarter of the century sociologists such as Park Burgess and McKenzie developed the study of human ecology to account for the dynamics of change in American cities Over time theorists have reached beyond the boundaries of sociology drawing on the findings of economics political science anthropology and bioecology to understand the relationship of human beings to their environment Hawley has successfully integrated the scattered theses of this wide ranging discipline into a schematic whole The early human ecologists seized on the analogy of plant communities as a way of understanding urban communities Hawley here maintains that the most important contribution to human ecology of the lexicons of plant and animal ecologies is the perspective of collective life as an adaptive process consisting in an interaction of environment population and organization From the adaptive process he argues emerges the ecosystem a concept that serves as a common denominator for bioecology and human ecology Hawley has codified the theory of human ecology by a set of deductive hypotheses that establish its claims to coherence and comprehensiveness His model charts a synthesis of ecological concepts ranging from adaptation and equilibrium through growth in temporal and spatial dimensions to convergence and openness The essay underscores the critical importance of transportation and communication technology to the shaping of the human ecological system Human Ecology brings concision and elegance to this holistic perspective and will serve as a point of reference and orientation for anyone interested in the powers and scope of the ecological approach
