Baker, 2012 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today s global culture there is a greater need in psychology for international understanding This volume describes the historical development of psychology in countries throughout the world Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations psychologies Each unique story adds another element to our understanding of the history of psychology The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of

the human condition **Histories of Dreams and Dreaming** Giorgia Morgese, Giovanni Pietro Lombardo, Hendrika Vande Kemp, 2019-06-13 In the late nineteenth century dreams became the subject of scientific study for the first time after thousands of years of being considered a primarily spiritual phenomenon Before Freud and the rise of psychoanalytic interpretation as the dominant mode of studying dreams an international group of physicians physiologists and psychiatrists pioneered scientific models of dreaming Collecting data from interviews structured observation surveys and their own dream diaries these scholars produced a large body of early research on the sleeping brain in the late nineteenth and early twentieth centuries This book uncovers an array of case studies from this overlooked period of dream scholarship With contributors working across the disciplines of psychology history literature and cultural studies it highlights continuities and ruptures in the history of scientific inquiry into dreams *Anti-Southern Racism and Education in Post-War Italy* Grazia De Michele, 2023-02-24 This book investigates the racism against Southern Italian children attending North Western primary schools between the 1950s and the 1970s Turin serves as the main case study having become the third Southern city after Naples and Palermo during the considered period Far from being a new phenomenon racism against Southern Italians gained renewed prominence in the context of the post war mass internal migrations becoming one of the pillars of the process of nation rebuilding However in spite of its relevance it has not received the attention it deserves By drawing on a wide range of sources printed archival photographic and oral and situating itself at the intersection of the history of racism of education of psychiatry and of psychology the book aims to fill this gap and to add to the debate on the borders that nation states establish to control the access to power of the different groups inhabiting their territories Its interdisciplinarity makes it suitable for students and researchers across a variety of subject areas **Archaeology of the Unconscious** Alessandra Aloisi, Fabio Camilletti, 2019-07-10 In reconstructing the birth and development of the notion of unconscious historians of ideas have heavily relied on the Freudian concept of Unbewussten retroactively projecting the psychoanalytic unconscious over a constellation of diverse cultural experiences taking place in the eighteenth and nineteenth centuries between France and Germany Archaeology of the Unconscious aims to challenge this perspective by adopting an unusual and thought provoking viewpoint as the one offered by the Italian case from the 1770s to the immediate aftermath of WWI when Italo Svevo's *La coscienza di Zeno* provides Italy with the first example of a psychoanalytic novel Italy's vibrant culture of the long nineteenth century characterised by the sedimentation circulation intersection and synergy of different cultural philosophical and literary traditions proves itself to be a privileged object of inquiry for an archaeological study of the unconscious a study whose object is not the alleged origin of a pre made theoretical construct but rather the stratifications by which that specific construct was assembled In line with Michel Foucault's *Archéologie du savoir* 1969 this volume will analyze the formation and the circulation across different authors and texts of a network of ideas and discourses on interconnected themes including dreams memory recollection desire imagination fantasy madness creativity inspiration magnetism and somnambulism

Alongside questioning pre given narratives of the history of the unconscious this book will employ the Italian difference as a powerful perspective from whence to address the undeveloped potentialities of the pre Freudian unconscious beyond uniquely psychoanalytical viewpoints *Conceptions of Dreaming from Homer to 1800* G. W. Pigman III, 2019-01-31

Conceptions of Dreaming from Homer to 1800 traces the history of ideas about dreaming during the period when the admonitory dream was the main focus of learned interest from the Homeric epics through the Renaissance and the period when it began to become a secondary focus the eighteenth century The book also considers the two most important dream theorists at the turn of the twentieth century Sigmund Freud and Sante de Sanctis While Freud is concerned with questions of what a dream means and how to interpret it de Sanctis offers a synthesis of nineteenth century research into what a dream is and represents the Enlightenment transition from particular facts to general laws Vittorio Benussi in the History of Psychology Mauro Antonelli, 2019-01-04

This book covers the basic guidelines of Vittorio Benussi s research during the period at Graz and at Padua It does so in the light of a thorough study of his Nachlass The book re evaluates Benussi s work as a historical piece and shows how his work is still relevant today especially in the areas of cognitive psychology and cognitive science The volume deals with this original and ingenious though largely ignored scholar and discusses his work as a leading experimental psychologist Benussi s contributions as discussed in this book were particularly relevant in the fields of visual and tactile perception time perception forensic psychology hypnosis and suggestion unconscious and emotions His classical papers are impressive in their originality energy range of approaches experimental skill the wealth of findings and the quality of theoretical discussions This book demonstrates that Benussi was ahead of his time and that his themes experiments and research programmes are highly relevant to contemporary cognitive psychology **Physis** , 2007

Italian Psychology and Jewish Emigration under Fascism Patrizia Guarnieri, 2016-05-03

Fascism and the racial laws of 1938 dramatically changed the scientific research and the academic community Guarnieri focuses on psychology from its promising origins to the end of the WWII Psychology was marginalized in Italy both by the neo idealistic reaction against science and fascism unlike Nazism with long lasting consequences Academics and young scholars were persecuted because they were antifascist or Jews and the story of Italian displaced scholars is still an embarrassing one The book follows scholars who emigrated to the United States such as psychologist Renata Calabresi and to Palestine such as Enzo Bonaventura Guarnieri traces their journey and the help they received from antifascist and Zionist networks and by international organizations Some succeeded some did not and very few went back *The Routledge History of Disability* Roy Hanes, Ivan Brown, Nancy E. Hansen, 2017-10-25

The Routledge History of Disability explores the shifting attitudes towards and representations of disabled people from the age of antiquity to the twenty first century Taking an international view of the subject this wide ranging collection shows that the history of disability cuts across racial ethnic religious cultural gender and class divides highlighting the commonalities and differences between the experiences of disabled persons in global historical

context The book is arranged in four parts covering histories of disabilities across various time periods and cultures histories of national disability policies programs and services histories of education and training and the ways in which disabled people have been seen and treated in the last few decades Within this the twenty eight chapters discuss topics such as developments in disability issues during the late Ottoman period the history of disability in Belgian Congo in the early twentieth century blind asylums in nineteenth century Scotland and the systematic killing of disabled children in Nazi Germany Illustrated with images and tables and providing an overview of how various countries cultures and societies have addressed disability over time this comprehensive volume offers a global perspective on this rapidly growing field and is a valuable resource for scholars of disability studies and histories of disabilities

The Child Is the Teacher Cristina De Stefano, 2022-03-01 A fresh comprehensive biography of the pioneering educator and activist who changed the way we look at children s minds from the author of Oriana Fallaci Born in 1870 in Chiaravalle Italy Maria Montessori would grow up to embody almost every trait men of her era detested in the fairer sex She was self confident strong willed and had a fiery temper at a time when women were supposed to be soft and pliable She studied until she became a doctor at a time when female graduates in Italy provoked outright scandal She never wanted to marry or have children the accepted destiny for all women of her milieu in late nineteenth century bourgeois Rome and when she became pregnant by a colleague of hers she gave up her son to continue pursuing her career At around age thirty Montessori was struck by the condition of children in the slums of Rome s San Lorenzo neighborhood and realized what she wanted to do with her life change the school and therefore the world through a new approach to the child s mind In spite of the resistance she faced from all sides scientists accused her of being too mystical and the clergy of being too scientific traditionalists of giving children too much freedom and anarchists of giving them too much structure she would garner acclaim and establish the influential Montessori method which is now practiced throughout the world A thorough nuanced portrait of this often controversial woman The Child Is the Teacher is the first biographical work on Maria Montessori written by an author who is not a member of the Montessori movement but who has been granted access to original letters diaries notes and texts written by Montessori herself including an array of previously unpublished material

Autism in Translation Elizabeth Fein, Clarice Rios, 2018-08-28 Autism is a complex phenomenon that is both individual and social Showing both robust similarities and intriguing differences across cultural contexts the autism spectrum raises innumerable questions about self subjectivity and society in a globalized world Yet it is often misrepresented as a problem of broken bodies and disordered brains So in 2015 a group of interdisciplinary scholars gathered in Rio de Janeiro Brazil for an intellectual experiment a workshop that joined approaches from psychological anthropology to the South American tradition of Collective Health in order to consider autism within social historical and political settings This book is the product of the ongoing conversation emerging from this event It contains a series of comparative histories of autism policy in Italy Brazil and the United States focuses on issues of voice narrative and

representation in autism and examines how the concept of autism shapes both individual lives and broader social and economic systems Featuring contributions from Michael Bakan Benilton Bezerra Pamela Block M Ariel Cascio Jurandir Freire Costa B rbara Costa Andrada Cassandra Evans Elizabeth Fein Clara Feldman Roy Richard Grinker Rossano Lima Francisco Ortega Dawn Prince Hughes Clarice Rios Laura Sterponi Thomas S Weisner Enrico Valtellina **Psycho-Politics between the World Wars** David Freis,2019-11-07 This book is about the psycho political visions and programmes in early twentieth century Germany Austria and Switzerland Amidst the political and social unrest that followed the First World War psychiatrists attempted to use their clinical insights to understand diagnose and treat society at large The book uses a variety of published and unpublished sources to retrace major debates protagonists and networks involved in the redrawing of the boundaries of psychiatry s sphere of authority The book is based on three interconnected case studies the overt pathologisation of the 1918 19 revolution led by right wing German psychiatrists the project of medical expansionism under the label of applied psychiatry in inter war Vienna and the attempt to unite and implement different approaches to psychiatric prophylaxis in the movement for mental hygiene By exploring these histories the book also sheds light on the emergence of ideas that still shape the field to the present day and shows the close connection between utopian promises and the worst abuses of psychiatry **Senza cattedra** Patrizia Guarnieri,2012 Psicologia e bioetica. Verso una prospettiva psico-bio-etica Francisco Javier Fiz Pérez,Catia Ciancio,2011 Emozioni, crimine, giustizia.
