Disciplining Girls Joe Sutcliff Sanders, 2011-12 At the heart of some of the most beloved children's novels is a passionate discussion about discipline love and the changing role of girls in the twentieth century Joe Sutcliff Sanders traces this debate as it began in the sentimental tales of the mid nineteenth century and continued in the classic orphan girl novels of Louisa May Alcott Frances Hodgson Burnett L M Montgomery and other writers still popular today Domestic novels published between 1850 and 1880 argued that a discipline that emphasized love was the most effective and moral form These were the first best sellers in American fiction and by reimagining discipline as a technique of the heart rather than of the whip they ensured their protagonists a secure if limited claim on power This same ideal was adapted by women authors in the early twentieth century who transformed the sentimental motifs of domestic novels into the orphan girl story made popular in such novels as *Anne of Green Gables* and *Pollyanna* Through close readings of nine of the most influential orphan girl novels Sanders provides a seamless historical narrative of American children's literature and gender from 1850 until 1923 He follows his insightful literary analysis with chapters on sympathy and motherhood two themes central to both American and children's literature and concludes with a discussion of contemporary ideas about discipline abuse and gender *Disciplining Girls* writes an important chapter in the history of American women's and children's literature enriching previous work about the history of discipline in America

Coining for Capital Jyotsna Kapur, 2005 This book is a welcome

addition to the literature on children and the media and a most stimulating application of social theory to questions of the child in contemporary film and consumer culture Ellen Seiter author of *The Internet Playground Children's Access Entertainment and Mis Education* Since the 1980s a peculiar paradox has evolved in American film Hollywood's children have grown up and the adults are looking and behaving more and more like children In popular films such as *Harry Potter* *Toy Story* *Pocahontas* *Home Alone* and *Jumanji* it is the children who are clever savvy and self sufficient while the adults are often portrayed as bumbling and ineffective Is this transformation of children into little adults an invention of Hollywood or a product of changing cultural definitions more broadly In *Coining for Capital* Jyostna Kapur explores the evolution of the concept of childhood from its portrayal in the eighteenth century as a pure innocent and idyllic state the opposite of adulthood to its expression today as a mere variation of adulthood complete with characteristics of sophistication temptation and corruption Kapur argues that this change in definition is not a media effect but rather a structural feature of a deeply consumer driven society Providing a new and timely perspective on the current widespread alarm over the loss of childhood *Coining for Capital* concludes that our present moment is in fact one of hope and despair As children are fortunately shedding false definitions of proscribed innocence both in film and in life they must now also learn to navigate a deeply inequitable antagonistic and consumer driven society of which they are both a part and a target

Fulfillment Alec MacGillis, 2021-03-16 A New York Times Book Review Editors Choice A grounded and expansive examination of the American economic divide It takes a skillful journalist to weave data and anecdotes together so effectively Carolyn Kellogg Los Angeles Times An award winning journalist investigates Amazon's impact on the wealth and poverty of towns and cities across the United States In 1937 the famed writer and activist Upton Sinclair published a novel bearing the subtitle *A Story of Ford America* He blasted the callousness of a company worth a billion dollars that underpaid its workers while forcing them to engage in repetitive and sometimes dangerous assembly line labor Eighty three years later the market capitalization of Amazon.com has exceeded one trillion dollars while the value of the Ford Motor Company hovers around thirty billion We

have it seems entered the age of one click America and as the coronavirus makes Americans more dependent on online shopping its sway will only intensify Alec MacGillis's *Fulfillment* is not another inside account or exposé of our most conspicuously dominant company. Rather it is a literary investigation of the America that falls within that company's growing shadow. As MacGillis shows, Amazon's sprawling network of delivery hubs, data centers, and corporate campuses epitomizes a land where winner and loser cities and regions are drifting steadily apart; the civic fabric is unraveling and work has become increasingly rudimentary and isolated. Ranging across the country, MacGillis tells the stories of those who've thrived and struggled to thrive in this rapidly changing environment. In Seattle, high-paid workers in new office towers displace a historic black neighborhood. In suburban Virginia, homeowners try to protect their neighborhood from the environmental impact of a new data center. Meanwhile, in El Paso, small office supply firms seek to weather Amazon's takeover of government procurement, and in Baltimore, a warehouse supplants a fabled steel plant. *Fulfillment* also shows how Amazon has become a force in Washington, D.C., ushering readers through a revolving door for lobbyists and government contractors and into CEO Jeff Bezos's lavish Kalorama mansion. With empathy and breadth, MacGillis demonstrates the hidden human costs of the other inequality, not the growing gap between rich and poor, but the gap between the country's winning and losing regions. The result is an intimate account of contemporary capitalism, its drive to innovate, its dark pitiless magic, its remaking of America with every click.

Refugees' Roles in Resolving Displacement and Building Peace Megan Bradley, James Milner, Blair Peruniak, 2019-06-01. How are refugee crises solved? This has become an urgent question as global displacement rates continue to climb and refugee situations now persist for years, if not decades. The resolution of displacement and the conflicts that force refugees from their homes is often explained as a top-down process led and controlled by governments and international organizations. This book takes a different approach. Through contributions from scholars working in politics, anthropology, law, sociology, and philosophy, and a wide range of case studies, it explores the diverse ways in which refugees themselves interpret, create, and pursue solutions to their plight. It investigates the empirical and normative significance of refugees' engagement as agents in these processes and their

implications for research policy and practice This book speaks both to academic debates and to the broader community of peacebuilding humanitarian and human rights scholars concerned with the nature and dynamics of agency in contentious political contexts and identifies insights that can inform policy and practice
