**Sarepta: The Late Bronze Age and Iron Age strata of area II, Y**, 1988 The Cemetery at Tell Es-Sa'idiyeh, Jordan James B. Pritchard, 1980-01-29 A portion of the Tell es Sa idiyeh mound was used for burials during the Bronze Age A summary of the pottery types is followed by a description of the contents of each of the 45 tombs University Museum Monograph 41 Understanding Relations Between Scripts II Philippa M. Steele, Philip J. Boyes, 2019-10-10 Contexts of and Relations between Early Writing Systems CREWS is a project funded by the European Research Council under the European Union s Horizon 2020 research and innovation programme grant agreement No 677758 and based in the Faculty of Classics University of Cambridge Understanding Relations Between Scripts II Early Alphabets is the first volume in this series bringing together ten experts on ancient writing languages and archaeology to present a set of diverse studies on the early development of alphabetic writing systems and their spread across the Levant and Mediterranean during the second and first millennia BC By taking an interdisciplinary perspective it sheds new light on alphabetic writing not just as a tool for recording language but also as an element of culture **Symbiosis, Symbolism, and the Power of the Past** William G. Dever, Seymour (Sy) Gitin, 2003-06-30 Celebrating the 100th anniversary of the Albright Institute of Archaeological Research this collection of erudite essays concentrates on the archaeology of ancient Israel Canaan and neighboring nations Recent Excavations in Israel Seymour Gitin, William G. Dever, 1989 **Script and Society** Philip J. Boyes, 2021-03-15 By the 13th century BC the Syrian city of Ugarit hosted an extremely diverse range of writing practices As well as two main scripts alphabetic and logographic cuneiform the site has also produced inscriptions in a wide range of scripts and languages including Hurrian Sumerian Hittite Egyptian hieroglyphs Luwian hieroglyphs and Cypriot Minoan This variety in script and language is accompanied by writing practices that blend influences from Mesopotamian Anatolian and Levantine traditions together with what seem to be distinctive local innovations Script and Society The Social Context of Writing Practices in Late Bronze Age Ugarit explores the social and cultural context of these complex writing traditions from the perspective of writing as a social practice It combines archaeology epigraphy history and anthropology to present a highly interdisciplinary exploration of social questions relating to writing at the site including matters of gender ethnicity status and other forms of identity the relationship between writing and place and the complex relationships between inscribed and uninscribed objects This forms a case study for a wider discussion of interdisciplinary approaches to the study of writing practices in the ancient world *The Philistines and Aegean Migration at the End of the Late Bronze Age* Assaf Yasur-Landau, 2014-06-16 In this study Assaf Yasur Landau examines the early history of the biblical Philistines who were among the Sea Peoples who migrated from the Aegean area to the Levant during the early twelfth century BC Creating an archaeological narrative of the migration of the Philistines he combines an innovative theoretical framework on the archaeology of migration with new data from excavations in Greece Turkey Cyprus Syria Lebanon and Israel and thereby reconstructs the social history of the

Aegean migration to the southern Levant The author follows the story of the migrants from the conditions that caused the Philistines to leave their Aegean homes to their movement eastward along the sea and land routes to their formation of a migrant society in Philistia and their interaction with local populations in the Levant Based on the most up to date evidence this book offers a new and fresh understanding of the arrival of the Philistines in the Levant Phoenicia J. Brian Peckham,2014-10-30 Phoenicia has long been known as the homeland of the Mediterranean seafarers who gave the Greeks their alphabet But along with this fairly well known reality many mysteries remain in part because the record of the coastal cities and regions that the people of Phoenicia inhabited is fragmentary and episodic In this magnum opus the late Brian Peckham examines all of the evidence currently available to paint as complete a portrait as is possible of the land its history its people and its culture In fact it was not the Phoenicians but the Canaanites who invented the alphabet what distinguished the Phoenicians in their turn was the transmission of the alphabet which was a revolutionary invention to everyone they met The Phoenicians were traders and merchants the Tyrians especially thriving in the back and forth of barter in copper for Levantine produce They were artists especially the Sidonians known for gold and silver masterpieces engraved with scenes from the stories they told and which they exchanged for iron and eventually steel and they were builders like the Bybians who taught the alphabet and numbers as elements of their trade When the Greeks went west the Phoenicians went with them Italy was the first destination settlements in Spain eventually followed but Carthage in North Africa was a uniquely Phoenician foundation The Atlantic Spanish settlements retained their Phoenician character but the Mediterranean settlements in Spain Sicily Sardinia and Malta were quickly converted into resource centers for the North African colony of Carthage a colony that came to eclipse the influence of the Levantine coastal city states An emerging independent Western Phoenicia left Tyre free to consolidate its hegemony in the East It became the sole west Asiatic agent of the Assyrian Empire But then the Babylonians let it all slip away and the Persians intent on war and world domination wasted their own and everyone s time trying to dominate the irascible and indomitable Greeks The Punic West Carthage made the same mistake until it was handed off to the Romans But Phoenicia had been born in a Greek matrix and in time had the sense and good grace to slip quietly into the dominant and sustaining Occidental culture This complicated history shows up in episodes and anecdotes along a frangible and fractured timeline Individual men and women come forward in their artifacts amulets or seals There are king lists and alliances companies and city assemblies Years or centuries are skipped in the twinkling of any eye and only occasionally recovered Phoenicia like all history is a construct a product of historiography an answer to questions The history of Phoenicia is the history of its cities in relationship to each other and to the peoples cities and kingdoms who nourished their curiosity and their ambition It is written by deduction and extrapolation by shaping hard data into malleable evidence by working from the peripheries of their worlds to the centers where they lived by trying to uncover their mentalities plans beliefs suppositions and dreams in the residue of their products and accomplishments For this reason

the subtitle Episodes and Anecdotes from the Ancient Mediterranean is a particularly appropriate description of Peckham's masterful posthumous volume the fruit of a lifetime of research into the history and culture of the Phoenicians

interested in the history of music biblical studies Jewish studies and the cultures of the ancient Near East *The Tiny and the Fragmented* S. Rebecca Martin, Stephanie M. Langin-Hooper, 2018-10-16 Miniature and fragmentary objects are both eye catching and yet easily dismissed Tiny scale entices users with visions of Lilliputian worlds The ambiguity of fragments intrigues us offering tactile reminders of reality's transience Yet the standard scholarly approach to such objects has been to see them as secondary incomplete things whose principal purpose was to refer to a complete and often life size whole The Tiny and the Fragmented offers a series of fresh perspectives on the familiar concepts of the tiny and the fragmented Written by a prestigious group of internationally acclaimed scholars the volume presents a remarkable diversity of case studies that range from Neolithic Europe to pre Colombian Honduras to the classical Mediterranean and ancient Near East Each scholar takes a different approach to issues of miniaturization and fragmentation but is united in considering the little and broken things of the past as objects in their own right Whether a life size or whole thing is made in a scaled down form deliberately broken as part of its use or only considered successful in the eyes of ancient users if it shows some signs of wear it challenges our expectations of representation and wholeness of what it means for a work of art to be finished and affective Overall The Tiny and the Fragmented demands a reconsideration of the social and contextual nature of miniaturization fragmentation and incompleteness making the case that it was because of rather than in spite of their small or partial state that these objects were valued parts of the personal and social worlds they inhabited From Athens to Gordion Keith DeVries, 1980-01-29 The nine papers in this volume presented by former colleagues and students of the late Rodney S Young are representative of Young's archaeological interests Athens where he received his archaeological training and Gordion where he achieved his greatest successes This book will prove valuable to students and scholars interested in the interconnections between Greece and Anatolia from the Bronze Age through classical times University Museum Papers 1

The Cambridge Ancient History John Boardman, I. E. S. Edwards, E. Sollberger, N. G. L. Hammond, 1992-01-16 Volume III Part II carries on the history of the Near East from the close of Volume III Part I and covers roughly the same chronological period as Volume III Part III During this period the dominant powers in the East were Assyria and then Babylonia Each established an extensive empire which was based on Mesopotamia and each in turn fell largely through internal strife Assyrian might was reflected in the imposing palaces libraries and sculptures of the Assyrian kings Babylonian culture was outstanding in literature mathematics and astronomy and the great buildings of Nebuchadnezzar II surpassed even those of the Assyrian kings Israel and Judah suffered at the hands of both imperial powers Jerusalem being destroyed and part of the population deported to Babylon and Egypt was weakened by an Assyrian invasion The Phoenicians found a new outlet in colonising and founded Carthage A number of small vigorous kingdoms developed in Asia Minor while from the north and north east the Scythian nomadic tribes pressed down upon Turkey and the Danube valley but found their match in the Thracian tribes which held south eastern Europe and parts of western Turkey The burials of the chieftains of both peoples were remarkable for the great wealth of offerings
