Epics, Hymns, Omens, and Other Texts Albert T. Clay, 2005-09-14 The intention of Ancient Texts and Translations ATT is to make available a variety of ancient documents and document collections to a broad range of readers The series will include reprints of long out of print volumes revisions of earlier editions and completely new volumes The understanding of ancient societies depends upon our close reading of the documents however fragmentary that have survived K C Hanson Series Editor **Scribal Education in the Sargonic Period** Nicholas L. Kraus, 2020-10-12 Scribal Education in the

Sargonic Period is an in depth analysis of the process of education for scribes during the period of Sargonic hegemony in ancient Mesopotamia c 2335 2150 BCE The book provides a holistic study of the topic addressing the technology of writing the school texts used in education the languages of instruction and the social and historical context of scribal life and an education in cuneiform writing The topic of scribal education at such an early period of Mesopotamian history has never been addressed at length before Nicholas Kraus convincingly argues that scribal education during the Sargonic period was closely tied to the administrative institutions of the Sargonic Empire and prepared a scribe to become an effective administrator The Harvard Semitic Studies series publishes volumes from the Harvard Museum of the Ancient Near East Other series offered by Brill that publish volumes from the Museum include Studies in the Archaeology and History of the Levant and Harvard Semitic Monographs <https://hmane.harvard.edu/publications> *Sargonic Akkadian* Rebecca Hasselbach, 2005 Since the second edition of I J Gelb's *Old Akkadian Writing and Grammar* in 1961 which is still the standard grammar of Old Akkadian to this day a significant number of new texts from the Old Akkadian period has been discovered and important improvements have been made regarding the analysis of Old Akkadian and Early Semitic grammar particularly phonology and writing The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period 2350

2100 BCE which contains most of our evidence for the Akkadian used at this period It consists of a detailed investigation of the Sargonic Akkadian syllabary phonology and morphology with specific focus on geographical and dialectal variations that are noticeable in this text corpus but which have not yet been examined thoroughly The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects Babylonian and Assyrian in order to establish the position of the individual sub groups of Sargonic Akkadian within the dialect geography of Akkadian

Ancient Near Eastern Art in Context Jack Cheng, Marian H. Feldman, 2007 Through her published works and in the classroom Irene J Winter has served as a mentor for the latest generation of scholars of Mesopotamian visual culture The various contributions to this volume in her honor represent a cross section of the state of scholarship today Topics by the twenty authors include palatial and temple architecture royal sculpture gender in the ancient Near East and interdisciplinary studies that range from the fourth millennium BCE to modern ethnography and cover Sumer Assyria Babylonia Iran Syria Urartu and the Levant Reflections on Winter s scholarship and teaching accompany her bibliography The volume will be useful for scholars who are curious about how visual culture is being used to study the ancient Near East

A Basic Bibliography for the Study of the Semitic Languages J. H. Hoppers, 1973-01-01

Cuneiform Parallels to the Old Testament, Second Edition Robert W. Rogers, 2005-07-19 The first major collection of cuneiform texts in English Despite its age this volume still has a major contribution to make Unlike other

collections Rogers's volume includes the transliterated Akkadian for each text. This provides an invaluable access to the original texts without having a library that includes every volume of the original publications. A further asset is the collection of forty-eight excellent photographs and line drawings. Included here are tablets, prisms, cylinders, seals, boundary stones, and bas-reliefs. The bibliography is composed of two parts. The first includes the entries from Rogers's List of Books Quoted or Mentioned but with numerous corrections and supplying much missing data. The second part is an updated list organized by major cuneiform languages: Diverse Collections, Sumerian, Akkadian, Hittite, Hurrian, Eblaite, and Ugaritic. This will direct the reader to the wealth of primary documents that is now our privilege to read. History of the Akkadian Language (2 vols)

Juan-Pablo Vita, 2021-08-09 Akkadian is after Sumerian the second oldest language attested in the Ancient Near East as well as the oldest known Semitic language. It is also a language with one of history's longest written records. And yet unlike other relevant languages written over a long period of time there has been no volume dedicated to its own history. The aim of the present work is to fill that void. The outcome is presented in 26 chapters written by 25 leading authors and divided into two volumes: the first covering the linguistic background and early periods and the second covering the second and first millennia BCE as well as its afterlife. **Time and History in the Ancient Near East** Lluís Feliu, J. Llop, A. Millet Albà, Joaquín Sanmartín, 2013-07-05 In July 2010 the International Association for Assyriology met in Barcelona, Spain for 5 days to deliver and listen to papers on the theme Time and History in the Ancient Near East. This volume the proceedings of the conference contains 70 of the papers read at the 56th annual Rencontre including the papers from several workshop sessions on architecture and archaeology, early Akkadian and its Semitic context, Hurrian language, law in the ancient Near East, Middle Assyrian texts and studies, and a variety of additional papers not directly related to the conference theme. The photo on the back cover shows only a representative portion of the attendees who were warmly hosted by faculty and students from the University of Barcelona. **Mathematics in Ancient Iraq** Eleanor Robson, 2020-06-30 This monumental book traces the origins and development of mathematics in the ancient Middle East from its earliest beginnings in the fourth millennium BCE to the end of indigenous intellectual culture in the second century BCE when cuneiform writing was gradually abandoned. Eleanor Robson offers a history like no other, examining ancient mathematics within its broader social, political, economic, and religious contexts and showing that mathematics was not just an abstract discipline for elites but a key component in ordering society and understanding the world. The region of modern-day Iraq is uniquely rich in evidence for ancient mathematics because its prehistoric inhabitants wrote on clay tablets; many hundreds of thousands of which have been archaeologically excavated, deciphered, and translated. Drawing from these and a wealth of other textual and archaeological evidence, Robson gives an extraordinarily detailed picture of how mathematical ideas and practices were conceived, used, and taught during this period. She challenges the prevailing view that they were merely the simplistic precursors of classical Greek mathematics and explains how the prevailing view came to be. Robson reveals the true sophistication and beauty of

ancient Middle Eastern mathematics as it evolved over three thousand years from the earliest beginnings of recorded accounting to complex mathematical astronomy Every chapter provides detailed information on sources and the book includes an appendix on all mathematical cuneiform tablets published before 2007 Problems of Canonicity and Identity Formation in Ancient Egypt and Mesopotamia Gojko Barjamovic, Kim Ryholt, 2016-04-24 The term canonicity implies the recognition that the domain of literature and of the library is also a cultural and political one related to various forms of identity formation maintenance and change Scribes and benefactors create canon in as much as they teach analyze preserve promulgate and change canonical texts according to prevailing norms From early on texts from the written traditions of ancient Mesopotamia and Egypt were accumulated codified and to some extent canonized as various collections developed mainly in the environment of the temple and the palace These written traditions represent sets of formal and informal cultures that all speak in their own ways of canonicity normativity and other forms of cultural expertise Some forms of literature were used not only in scholarly contexts but also in political ones and they served purposes of identity formation This volume addresses the interrelations between various forms of canon and identity formation in different time periods genres regions and contexts as well as the application of contemporary conceptions of canon to ancient texts

Establishing Value Vitali Bartash, 2019-06-04 This book explores the reasons for which weights and scales were used to measure goods in Early Mesopotamia ca 3 200 2 000 BCE The vast corpus of cuneiform records from this period sheds light on the various mechanisms behind the development of this cultural innovation Weighing became the means of articulating the value of both imported and locally produced goods within a socioeconomic system that had reached an unprecedented level of complexity This study provides a comprehensive analysis of this cultural and economic phenomenon which simultaneously reflected and shaped the relationships between individuals and groups in Mesopotamia throughout the third millennium BCE *Historical Genesis* Richard James Fischer, 2008-01-28 The beginning chapters of Genesis come alive with characters places and events almost totally unknown outside of the Bible itself except when illuminated by the fascinating history of the ancient Near East Did a man we call Adam actually exist Was someone known to us as Noah warned of a cataclysmic flood and instructed to build an ark Could the Tower of Babel incident actually have happened When archaeological artifacts and literature began to surface from ancient Mesopotamia present day Iraq nearly 200 years ago only a handful of archaeologists dared to point out that there appeared to be a close relationship between Genesis and the ruminations of the Sumerians and Akkadians who once lived there Often enduring great personal hardships these archaeological pioneers produced copious translations and marvelous insights Cuneiform texts compiled from almost two centuries of exploration have added significantly to our understanding of the historical underpinnings of the Old Testament The reader will gain a new appreciation for the historical integrity of Genesis 2 11 and marvel at the evidence that the persons places and events depicted though long misunderstood could be real Please visit Richard J Fisher s web site at <http://www.rjfisher.org>
