responded with impassioned campaigns against official control of information The emergence of a civil society via cyberspace has had profound effects upon China for example in 2003 based on an Internet campaign the Chinese Supreme People's Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949 The important question this book asks is not whether the Internet will democratize China but rather in what ways the Internet is democratizing communication in China How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations

**Chinese National Security Decisionmaking Under Stress** Andrew Scobell, 2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century's first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of China's behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world

**Economic Effects of COVID-19 Related Uncertainty Shocks** Giray Gozgor, Chi Lau, 2021-11-24 China's Longest Campaign Tyrene White, 2018-09-05 In the late 1970s just as China was embarking on a sweeping program of post Mao reforms it also launched a one child campaign This campaign which cut against the grain of rural reforms and childbearing preferences was the culmination of a decade long effort to subject reproduction to state planning Tyrene White here analyzes this great social engineering experiment drawing on more than twenty years of research including fieldwork and interviews with a wide range of family planning officials and rural cadres White explores the origins of China's birth planning approach to population control the implementation of the campaign in rural China strategies of resistance employed by villagers and policy consequences among them infanticide infant abandonment and sex ratio imbalances She also provides the first extensive political analysis of China's massive 1983 sterilization drive The birth planning project was the last and longest of the great mobilization campaigns surviving long after the Deng regime had

officially abandoned mass campaigns as instruments of political control Arguing that the campaign had become an indispensable institution of rural governance White shows how the one child campaign mimicked the organizational style and rhythms both of political campaigns and economic production campaigns Against the backdrop of unfolding rural reforms only the campaign method could override obstacles to rural enforcement As reform gradually eroded and transformed patterns of power and authority however even campaigns grew increasingly ineffective paving the way for long overdue reform of the birth planning program

**China's Total War Strategy** Ryan Clarke,LJ Eads,Robert McCreight,Xiaoxu Sean Lin,2025-07-29 Our human instinct along with the chronicle of human history advises us to take heed to seriously consider what a dilemma really is and what it truly means especially if we embrace the inherent risks and drawbacks involved Dilemmas in geopolitics and global security matters are no less pivotal with several downstream implications that are poorly understood from the standpoint of today looking forward ten years Our ability to pinpoint what tomorrow brings in geostrategic terms is severely limited despite ongoing leadership hubris and pervasive expert assurances that few crises embedded in the future might surprise us To readily admit there are uncertainties that estimates are best guesses and that firm predictions cannot rule out unexpected anomalies is critical Few

professional or armchair pundits would argue with the notion that often we just do not know what we do not know So it is with the decade after 2025 and the central challenge for nations such as the United States and China What is likely to happen when and why We must note that dilemmas are generally defined as a situation in which a difficult choice has to be made between two or more alternatives featuring most often equally undesirable ones with uncertain outcomes This insightful definition equips us to conditionally set the stage for examining the presumptive geopolitical trajectory of China after 2025 Why conditionally Most assuredly because we cannot fathom or estimate in 2024 all the unforeseen crises wildcards and variables which could influence or trigger China s leadership to act or refrain from doing so during the decade beginning in 2025 This is also cloaked in the parallel assumption that the future geostrategic trajectory of the United States is both well known and predictable The decade after 2025 will be of primary significance for China and its Chinese Communist Party CCP leadership team Numerous theories and assessments by experts and seasoned observers will be offered to explain this landmark decade for the CCP and filter into the analysis China s fragmented and covertly conflicted population How many of its leaders want to retain an ironclad CCP control over all aspects of life in China for decades to come and can they do so Instead consider how many millions of Chinese citizens yearn instead during this new decade for a unique form of democratic revolt with Chinese characteristics starting right now So a paramount dilemma for China its leaders and its people is what dilemmas will unfold and manifest during the decade starting in 2025 Dilemmas abound for the CCP and China itself One such dilemma is rooted in the military dimension of the CCP and the global security paradigm which China favors for itself

**Governance of Life in Chinese Moral Experience** Everett Zhang, Arthur Kleinman, Weiming Tu, 2010-12-20 The last 30 years in China have witnessed tremendous changes primarily as a result of the shift in focus by the state from class struggle to economic development China soon eliminated the threat of famine and the rationing of food in the first decade of the reform era and increased its GDP per capita by 41% between 1978 and 2006 The average annual GDP growth rate during the same period is about three times the world average Between 1981 and 2004 China had the largest poverty reduction in human history Along with the fast economic development there has been great change to the ethos of Chinese society from sacrificing life for the revolutionary cause to valuing life itself This change which is perhaps among the most significant in the transformation of contemporary China has enormous bearings on the question of what is an adequate life in China now

**China's Role and Interests in the Greater Mekong Subregion** Shengmin Cui , 2018 Differentiated cooperation and GMS cooperation provide a theoretical model and practical example to coordinate the relationship and to promote economic and political cooperation between large and small states for the purpose of economic political and social development on the national regional and international stages

China's Rise in Asia Robert G. Sutter, 2005-04-14 China s rapid military and economic growth has

fuelled a steady stream of analysis and debate about the PRC's motivations and objectives regarding the United States. Yet until now there has not been a sustained single authored assessment in English of China's expanding influence in Asia in the post Cold War period. Respected analyst Robert G. Sutter draws on his extensive experience in the region to explore the current debate on China's rise and its meaning for U.S. interests by examining in detail China's current and historical relations with the key countries of Asia. He finds a range of motivations underlying China's recent initiatives. Some incline Chinese policy to be cooperative with the United States, others to be competitive and confrontational. Sutter's nuanced study shows that U.S. power and influence continue to dominate Asia and play a critical role in determining China's cooperative or confrontational approach. He argues that the Bush administration's policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region.

*Creativity and Innovation in Times of Crisis (COVID-19)* Roni Reiter-Palmon, Min Tang, Zorana Ivcevic, 2022-04-06

**Research Advances of Tuberculosis Vaccine and its Implication on COVID-19** Wenping Gong, Ashok Aspatwar, Jianping Xie, Hao Li, 2024-07-22

Tuberculosis (TB) is a global infectious disease caused by the *Mycobacterium tuberculosis* complex. The number of deaths caused by TB is second only to COVID-19. Therefore, vaccination plays an essential role in the prevention and control of TB. However, the efficacy of currently licensed TB vaccine bacilli Calmette-Guérin (BCG) varies from 0%–80% in adults, and the protection only lasts for 10–15 years. Thus, there is an urgent need to develop advanced TB vaccines against TB infections.
