bibliography of articles published in connection with the International Geophysical Year IGY The preparatory and operational
phases of the IGY occupied nearly a decade and the data accumulated in the many scientific disciplines by workers in some
67 countries will provide material for publication for many years The references have been assembled from information
supplied by a wide variety of sources These references have been grouped into 21 sections of which Sections I XIV followed
the discipline grouping adopted during the IGY Within each section references have been arranged in alphabetical order
according to the name of the principal author Anonymous articles are listed at the end of each section again arranged in
alphabetical order by title In the scientific literature author s names originally printed in Cyrillic symbols sometimes appear
with several different spellings because of the use of different transliteration systems In the present Bibliography an attempt
has been made to achieve consistency by using the same transliteration system throughout This book will prove useful to
