**Satisfying Reason** N. Rescher, 1995-03-31 Leibniz said with a mixture of admiration and inspiration that the Duchess Sophie of Hannover always wanted to know the reason why behind the reason why And that is just how rationality works it wants to leave no loose ends to understanding seeking to enable us to understand things through to the bitter end In the twelve chapters that make up *Satisfying Reason* Rescher develops and defends the following perspective That rationality is a cardinal virtue in cognitive matters That this is not something simple and cut and dried in the pursuit of truth through the development of knowledge we face obstacles sometimes even insuperable ones All that we can do is the best we can realizing that even our very best may still be imperfect Nevertheless the venture is far from hopeless While absolutes are unattainable in the cognitive venture some solutions are situationally optimal being comparatively the best that can be managed under the circumstances That reason itself enables us to come to terms with this state of affairs urging us to accept the best we can do as good enough *Satisfying Reason* is an explanation of the presuppositions and methods of rational enquiry an original exercise in metaknowledge developing a systematic body of knowledge about the scope and limits of knowledge itself

The Blackwell Companion to Natural Theology William Lane Craig, J. P. Moreland, 2012-02-27 With the help of in depth essays from some of the world's leading philosophers *The Blackwell Companion to Natural Theology* explores the nature and existence of God through human reason and evidence from the natural world Provides in depth and cutting edge treatment of natural theology's main arguments Includes contributions from first rate philosophers well known for their work on the relevant topics Updates relevant arguments in light of the most current state of the art philosophical and scientific discussions Stands in useful contrast and opposition to the arguments of the new atheists **Basic Questions on Truth** P. Weingartner, 2012-12-06 The task of the book is not to give a survey of the main theories on truth found in the literature

There are several books available which do this The one of David for Deflationist and Disquotational Theories of Truth that of Chapuis for Revision Theories of Truth that of Kirkham for Correspondence Theories and several others that of Rescher for Coherence Theories of Truth Moreover the book is not an analysis just of Tarski's theory like that of Moreno or the respective chapters in Kirkham though Tarski's theory plays an important role in the whole work presented The task of the book is to give a detailed answer to some basic questions on truth which have been perennial problems through the centuries and are still discussed today The answer is given in the light of our knowledge today and with the help of modern logic But the book explicitly aims at connecting recent problems with related ones in the whole history of philosophy The method to incorporate important philosophers of the tradition into the analysis is that of disputation i.e. of putting some of their main thesis into objections or counterobjections pro or contra a positive answer to the respective question After the pros and cons are given a detailed answer to the question is proposed and finally commentaries and corrections are given to the objections and counterobjections in the light of the proposed answer

**Theological Determinism** Peter Furlong, Leigh Vicens, 2022-09-22 This volume unites established authors and rising young voices in philosophical theology and philosophy of religion to offer the single most wide ranging examination of theological determinism in terms of both authors represented and issues investigated published to date Fifteen contributors present discussions about theological or divine determinism the view that God determines everything that occurs in the world Some authors provide arguments in favor of this position while others provide considerations against it Many contributors investigate the relationship between theological determinism and other philosophical issues the principle of sufficient reason the compatibility of determinism and free will moral luck theological doctrines creation ex nihilo divine forgiveness the inevitability of sin the unity of Christ's will with God's or moral attitudes

and practices trusting God resenting the ill will of others resisting evil This book is essential reading for all those interested in the relationship between theological determinism and philosophical thought     Communicative Pragmatism and Other Philosophical Essays on Language Nicholas Rescher,1998 In this pioneering study of communicative conventions distinguished philosopher Nicholas Rescher focuses on the principles at work in the communicative use of language Rescher explores various aspects of explanatory and expository uses of language across a wide range of applications ranging from the factual to the fictional and from the expository to the literary A unifying theme of the book is pragmatic conventionality Rescher explores the fundamentally pragmatic conception of communicative conventions rules of procedure that form part of the setting of tacit undertakings that function in various sectors of communicative practice Only in this setting he argues can one achieve an adequate understanding of the way in which the business of communication is actually carried on within its wider setting of its service in the conduct of human affairs     After Whitehead Michel Weber,2013-05-02 When Rescher's Process Metaphysics 1996 was published it was widely acclaimed as a major step towards the academic recognition of a mode of thought that has otherwise been confined within sharp scholarly boundaries Of course it is not an easy book despite its stylistic clarity it remains the complex outcome of a life's work in most areas of philosophy The goal of the present volume is to systematically unfold the vices and virtues of Process Metaphysics and thereby to specify the contemporary state of affairs in process thought To do so the editor has gathered one focused contribution per chapter each paper addressing specifically and explicitly its assigned chapter and seeking to promote a dialogue with Rescher In addition the volume features Rescher's replies to the papers     *SYMBOLISM IS THE THEORETICAL BASE OF ALL SCIENCES* Ruben Charles,2024-11-08 In this book we try to understand how the modernity of societies had become the main source that gave birth to the symbolism which ultimately became the center of the universe by defining the identity of the human being and by acting on its way of living of acting and of thinking and becoming the main basis of the existence of all societies Symbolism constitutes a new approach allowing science to determine the hidden meaning and complexity of symbolic objects through a system of symbolic representation The latter allows us to know who we really are as a human being and to understand how today's world works Indeed everything that exists on this planet is based on symbolism we cannot understand today's social reality outside symbolism     **The Primacy of Practical Reason** Michele Marsonet,1996 This book presents in one single volume the first cogent overview of Nicholas Rescher's position in theoretical philosophy Marsonet's wide ranging knowledge of American philosophy enables him to position Rescher's work in the wider setting of its relationships with various contemporary American and European thinkers He provides comparisons between Rescher's stance and the positions endorsed by philosophers like Quine Sellars Popper Davidson Rorty Rawls and Habermas The main goal of the book is to show that Rescher's system provides an interesting way out from the crisis of analytic philosophy by dealing in particular with his rediscovery of the American pragmatist tradition Marsonet traces the development in Rescher's speculative

evolution focusing on the importance of the growth of pragmatist elements This book serves as an excellent introduction to Rescher's philosophy and will give readers a schematic yet comprehensive account of his views on various philosophical topics including epistemology metaphysics philosophical logic philosophy of science philosophy of language and social and political philosophy
