

1. In calling the Sav-Yur-Life health care facility to report an emergency, one of three things can happen:

- (1) the line is busy (event E_1);
- (2) you get the wrong number (E_2); and
- (3) you get through to the triage nurse (event E_3).

Assume $P[E_i] = p_i$. (a) What is the probability that in five separate emergencies at different times, initial calls are met with four busy signals and one wrong number?

(b) What is probability in part (a) if $p_1 = 0.3$, $p_2 = 0.1$ and $p_3 = 0.6$.
