## **Savage Dream:**

**Dreams, Dreamers, and Visions** Ann Marie Plane, Leslie Tuttle, 2013-04-26 In this volume scholars from three continents trace the role of dreams in the cultural transitions of the early modern Atlantic world illustrating how both indigenous and European methods of understanding dream phenomena became central to contests over religious and political power

**Dream Work** Jeremy Taylor, 1983 All people dream regularly regardless of their circumstances whether they remember their dreams upon awakening or not From the beginning of human history dreams have been a source of creative inspiration and spiritual renewal emotional and psychological insight and scientific and cultural innovation

**Dreams and Primitive Culture** William Halse Rivers Rivers, 1918

**Camera Works** Michael North, 2005 Camera Works is about the impact of photography and film on modern art and literature For many artists and writers these new media offered hope of new means of representation neither linguistic nor pictorial but hovering in a kind of utopian space between At the same time the new media introduced a dramatic element of novelty into the age old evidence of the senses For the avant garde the challenges of the new media were the modern in its most concentrated form but even for aesthetically unadventurous writers they constituted an element of modern experience that could hardly be ignored Camera Works thus traces some of the more utopian projects of the transatlantic avant garde including the Readie machine of Bob Brown which was to turn stories and poems into strips of linguistic film The influence of photography and film on the avant garde is traced from the early days of Camera Work through the enthusiasm of Eugene Jolas and the contributors to his magazine transition to the crisis created by the introduction of sound in the late 1920s Subsequent chapters describe the entirely new kind of sensory enjoyment brought into modern American fiction by the new media What Fitzgerald calls spectroscopic gayety the enjoyable disorientation of the senses by machine perception turns out to be a powerful force in much American fiction The revolutionary possibilities of this new spectatorship and its limitations are pursued through a number of examples including Dos Passos James Weldon Johnson and Hemingway Together these chapters offer a new and substantially different account of the relationship between modern American literature and the mediated society of the early twentieth century With a comprehensive introduction and detailed particular readings Camera Works substantiates a new understanding of the formal and historical bases of modernism It argues that when modern literature and art respond to modernity on a formal level they are responding to the intervention of technology in the transmission of meaning an intervention that unsettles all the terms in the essential relationship of human consciousness to the world of phenomena

**Empire of Religion** David Chidester, 2014-03-19 How is knowledge about religion and religions produced and how is that knowledge authenticated and circulated David Chidester seeks to answer these questions in Empire of Religion

documenting and analyzing the emergence of a science of comparative religion in Great Britain during the second half of the nineteenth century and its complex relations to the colonial situation in southern Africa In the process Chidester provides a counterhistory of the academic study of religion an alternative to standard accounts that have failed to link the field of comparative religion with either the power relations or the historical contingencies of the imperial project In developing a material history of the study of religion Chidester documents the importance of African religion the persistence of the divide between savagery and civilization and the salience of mediations imperial colonial and indigenous in which knowledge about religions was produced He then identifies the recurrence of these mediations in a number of case studies including Friedrich Max Müller's dependence on colonial experts H Rider Haggard and John Buchan's fictional accounts of African religion and W E B Du Bois's studies of African religion By reclaiming these theorists for this history Chidester shows that race rather than theology was formative in the emerging study of religion in Europe and North America Sure to be controversial *Empire of Religion* is a major contribution to the field of comparative religious studies
