Central Florida where she braves snakes bears and giant spiders to open a cheery little diner called the All Day Breakfast Caf. Owning a restaurant has been her lifelong dream but it turns into a nightmare the morning she opens her dumpster and finds her ex husband crammed inside. As the suspect du jour Gia will have to scramble fast to prove her innocence before a killer orders another cup of murder. Hold on to your plates for this fast paced mystery that will leave you hungering for more. J C Eaton author of the Sophie Kimball Mysteries

The Biology of African Savannahs Bryan Shorrocks, William Bates, 2015 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem. They constitute one of the largest biomes on Earth covering almost 20% of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees. Most savannahs occur in Africa although smaller areas can be found in South America, India and Australia. They form a rich mosaic of diverse ecosystems and this book offers a concise but comprehensive introduction to their ecology, biodiversity and conservation. The Biology of African Savannahs describes the major plants, grasses and trees such as Acacia and animals, mainly large mammals that live in this habitat and examines the biological and ecological factors that influence their population size, interactions such as predation and community composition. Conservation issues such as climate change, hunting and conflict between wildlife and domestic animals are also discussed. This new edition has been updated throughout with the latest research in the field and contains new technique boxes which introduce readers to some of the analytical methods used to study African savannahs. This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and or conservation biology degree programme. It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic.

Day of the Dog Mark Salvi, 2015-08-27 In the year 2020 racial tensions are on the rise throughout the United States. Protests and violence escalate throughout the country and terrorists take advantage of the situation to launch a biological attack. Millions die but even worse the deadly disease known as canine flu afflicts the world's dogs turning people's pets into horrifying zombie dogs. In a small North Georgia town those who survive the initial attack set out on a dangerous trip to Savannah hoping to make contact with friends and family who have started a survivors community. The US military and government struggle to regain control of the country from the USS Ronald Reagan, an aircraft carrier stationed off the coast of South Carolina. From the Looking Glass Plane, a specially equipped Boeing 707 carrying vital military personnel and US Strategic Command or STRATCOM in Omaha. Meanwhile American society is in collapse the power grid no longer functions and nightly attacks from the zombie dogs mean all survivors are in constant danger. Even worse the Looking Glass Plane goes down in Pennsylvania leaving only a few people alive trying to rescue the nation from chaos. Only time will tell if they will succeed. In this novel a terrorist attack brings about an apocalyptic landscape in which zombie dogs roam the night changing survivors' lives forever.
