Saving Lives With Force Military Criteria For Humanitarian Intervention Brookings Studies In Foreign Policy:

Saving Lives with Force Michael E. O'Hanlon, 2010-12-01 Military analyst Michael O Hanlon shows how outside forces could successfully intervene to stop an ongoing cycle of warfare in a country whose government has collapsed or come under severe internal challenge Based largely on recent U S experiences in Panama Somalia Bosnia and elsewhere as well as on U S military doctrine and information from the Pentagon s training and simulation centers the book discusses the steps in an intervention and estimates likely casualties and costs O Hanlon shows that modern Western militaries are capable of executing these types of operations with high proficiency While conditions are unlikely to resemble those of Desert Storm which allowed the U S and allies to take full advantage of modern technology top notch militaries have advantages in infantry combat situations night vision equipment attack and transport helicopters counterartillery radars that would enable them to establish order and prevail in any firefights O Hanlon warns that operations as casualty free as those in Haiti and to date in Bosnia would be unlikely Moreover the political framework that outside powers would attempt to employ in establishing a new order would be critical if intervening forces are seen as taking sides or occupying territory without legitimacy they could meet protracted guerrilla style resistance of the types witnessed in Vietnam Afghanistan and Somalia Part of the Studies in Foreign Affairs series

Lyons, 2010-12-01 Elections have been used as a mechanism to institutionalize a new political order following internal conflict in Cambodia El Salvador Angola Mozambique Bosnia and now Liberia This book analyzes the Liberian transition and the July 1997 elections in order to better understand the relationship between war termination and transitions to democracy and the role post conflict elections play in promoting both of these goals The Liberian elections represented the final stage of a seven year West African led peace process An overwhelming majority voted for former factional leader Charles Taylor in the belief that if Taylor did not win war would erupt again The Liberian transition demonstrates that post conflict elections may play an important role in a process of war termination In many cases it may be necessary to move forward with war termination and imperfect elections in the short run and pursue goals relating to democratization after the new government has been put in place This study uses a detailed examination of the difficult Liberian case to highlight the more general challenges of helping

countries make the transition from civil conflict and authoritarian rule to peace and democracy Studies in Foreign Policy

Bait and Switch Julie Mertus, 2013-06-17 Although our era is marked by human rights rhetoric human wrongs continue to be committed with impunity and the idea of human rights is becoming impoverished *Interregionalism and International Relations* Heiner Hänggi, Ralf Roloff, Jürgen Rüland, 2006 Interregionalism the institutionalized relations between world regions is a new phenomenon in international relations It also a new layer of development in an increasingly differentiated global order This volume examines the structure of this phenomenon and the scholarly discourse it is generating It takes stock of empirical facts and theoretical explanations bringing together with clarity and concision the latest research on this key area This essential new book traces the emergence of interregionalism and reviews the latest literature provides a conceptual and theoretical framework for study includes case studies of inter regional relations between Asia and America Asia and Europe Europe and America and Europe and Africa delivers comparative analyses and special cases such as continental summits and interregional relationships beyond the Triad summarizes and evaluates the findings of each chapter providing a basis for further research This is a key reference book for students and researchers of regionalism global governance and international relations **The Responsibility to Protect** International Commission on Intervention and State Sovereignty, International Development Research Centre (Canada), 2001 Responsibility to Protect Research bibliography background Supplementary volume to the Report of the International Commission on Intervention and State Sovereignty **Leashing the Dogs of War** Chester A. Crocker, Fen Osler Hampson, Pamela R. Aall, 2007 The definitive volume on the sources of contemporary conflict and the array of possible responses to it *NATO and Peace Support Operations, 1991-1999* Henning A. Frantzen, 2004-12-17 This new book addresses the key question of how NATO and three of its member states are configuring their policies and military doctrines in order to handle the new strategic environment This environment is increasingly dominated by new wars more precisely civil wars within states and peacekeeping as the strategy devised by outside actors for dealing with them The book seeks to explain how this new strategic environment has been interpreted and how the new conflicts and peacekeeping have been fitted into defence and war key concepts in the field of security studies *Humanitarian Hypocrisy* Andrea L. Everett, 2018-02-15 In *Humanitarian Hypocrisy* Andrea L. Everett maps the often glaring differences between declared ambitions to protect civilians in conflict zones and the resources committed for doing so Examining how powerful governments contribute to peace operations and determine how they are designed Everett argues that ambitions resources gaps are a form of organized hypocrisy Her book shows how political compromises lead to disparities between the humanitarian principles leaders proclaim and what their policies are designed to accomplish When those in power face strong pressure to protect civilians but are worried about the high costs and dangers of intervention Everett asserts they allocate insufficient resources or impose excessive operational constraints The ways in which this can play out are illustrated by Everett's use of original data and in depth case studies of France in Rwanda

the United States in Darfur and Australia in East Timor and Aceh Humanitarian Hypocrisy has a sad lesson missions that gesture toward the protection of civilians but overlook the most pressing security needs of affected populations can worsen suffering even while the entities who doom those missions to failure assume the moral high ground This is a must read book for activists NGO officials and policymakers alike

A UN 'Legion' Stephen Kinloch Pichat,2004-09-30 A fresh examination of the origins evolution and future of proposals for a UN Legion a permanent military force recruited trained and deployed by the UN This new book shows how this idea has grown re emerged and evolved in direct connection with the development of UN international military forces The legionnaires have been seen as the future representatives of a modern constabulary international police or humanitarian chivalry They have also invariably evoked the idea of mercenaries and resurrected fears of supranational government and a world army Such a force has been unattainable when needed not needed when attainable revealing the deficiencies of the international system in the perspective of a particular task The idea highlights the inadequacy of the means as compared to the objectives and the limits of the UN s capacity to adapt itself to new challenges This study examines how the project of a UN Legion is conditional on the viability of the original Utopia and vice versa It also argues that the extreme polarization of the debate may reflect a tendency to negate the inherent contradictions of reality reminding us of the historical dimension of the building of an international organization a work in progress

Making War and Building Peace Michael W. Doyle,Nicholas Sambanis,2011-04-22 Making War and Building Peace examines how well United Nations peacekeeping missions work after civil war Statistically analyzing all civil wars since 1945 the book compares peace processes that had UN involvement to those that didn t Michael Doyle and Nicholas Sambanis argue that each mission must be designed to fit the conflict with the right authority and adequate resources UN missions can be effective by supporting new actors committed to the peace building governing institutions and monitoring and policing implementation of peace settlements But the UN is not good at intervening in ongoing wars If the conflict is controlled by spoilers or if the parties are not ready to make peace the UN cannot play an effective enforcement role It can however offer its technical expertise in multidimensional peacekeeping operations that follow enforcement missions undertaken by states or regional organizations such as NATO Finding that UN missions are most effective in the first few years after the end of war and that economic development is the best way to decrease the risk of new fighting in the long run the authors also argue that the UN s role in launching development projects after civil war should be expanded

The Military and Negotiation Deborah Goodwin,2004-11-23 A new investigation of the role of the modern soldier diplomat and the nature of military negotiation in comparison with negotiation

in other key contexts This new book presents a detailed analysis of the role of the military in current operations as negotiators and liaison workers in the field It shows how very few in the academic world are writing on this specific role of the military and the nature of negotiation in this situation and such a volatile context This publication is a first in this context and has a keen audience in light of the current world order This study breaks new ground in analyzing the nature of military negotiation in relation to more generic forms of negotiation and assessing the role of the modern soldier diplomat in recent deployments around the world The author is an academic working within the military environment very few people have the same capacity and accessibility to firsthand evidence and observation Whilst peacekeeping has grown in the last decade or so no one has successfully investigated the role of the military and their approach to non violent conflict resolution on the ground as few have access to such work to make a viable detailed assessment of the nature of negotiation in a violent context but Dr Goodwin is able to do so
