Saving Our Children An Endangered Species:

Saving Our Children, an Endangered Species Susan Stephan, 2002-07-28 Saving our Children An Endangered Species is Gods book literally sincerely and honestly It is a direct Heavenly answer to our heart felt prayers for help and guidance and it is meant to touch you deeply Within these sacred pages we are brought to our knees learning of the tragic hidden story of a generation of neglected children our children and the deadly effects of raising them on heartless cruel and violent electronic games and media Their innocent minds have been deeply damaged Our world has been changed But there is much we can and must do to try to heal this tragedy This book has been given to us to teach us how Within these pages beautiful stories important experiential exercises urgent advice and deeply powerful and personal guided journeys are offered to us so that we might all learn how to live through our hearts once again and in turn save the lives of our children We can change the world with our love but first we have to remember how to find this love how to feel this love and then we must learn how to deeply live within this love It is to this holy end that this intimate and powerful book has been given Can there be anything more important than this

Endangered Species Act was passed in 1973 was the snail darter a three inch fish that stood in the way of a massive dam on the Little Tennessee River When the Supreme Court sided with the darter Congress changed the rules The dam was built the river stopped flowing and the snail darter went extinct on the Little Tennessee though it survived in other waterways A young Al Gore voted for the dam freshman congressman Newt Gingrich voted for the fish A lot has changed since the 1970s and Joe Roman helps us understand why we should all be happy that this sweeping law is alive and well today More than a general history of endangered species protection Listed is a tale of threatened species in the wild from the whooping crane and North Atlantic right whale to the purple bankclimber a freshwater mussel tangled up in a water war with Atlanta and the people working to save them Employing methods from the new field of ecological economics Roman challenges the widely held belief that protecting biodiversity is too costly And with engaging directness he explains how preserving biodiversity can help economies and communities thrive Above all he shows why the extinction of species matters to us personally to our health and safety our prosperity and our joy in nature
