This is essential but is a far later phase of genius. Being a genius starts with a feeling of being in contact with the whole universe a feeling of totality being fed by it free of charge and feeding it gratefully in return. In this book the presentation of his life vision and life's work Moreno gives countless portals for the opening of contact with the whole universe to a feeling of totality. This totality is what motivated him and has also motivated the editor for much of his life. The direct felt experience of this totality is at the center of religious existential and spiritual traditions and in this book we have an uncloaked method for the same enlightenment process. The totality and wholeness of life can be found in the enactment of Moreno's method. What can be greater than to really live this and to give it to others.
