Setting The Limit Occupational Health Standards And The Limits Of Science:

Setting the Limit Sven Ove Hansson, 1998 Do occupational exposure limits really protect workers from chemical hazards This book gives an in depth analysis of three sets of exposure limits the ACGIH list from the United States which has a world wide influence and the official lists of Germany and Sweden which are both unusually well documented A detailed study of the extensive toxicological documentation offered for these lists makes it possible to calculate the safety margins implicit in the exposure limits The outcome of this analysis is disquieting Even for the Swedish list which has the lowest values in the Western world safety margins are often small or non existent Hansson also proposes new ways to organize exposure limits and to evaluate toxicological data for regulatory purposes *Toxicants, Health and Regulation since 1945* Nathalie Jas, 2015-10-06 The number of substances potentially dangerous to our health and environment is constantly increasing The papers in this volume examine the concurrent rise of pollutants and the regulations designed to police their use

Regulating Chemical Risks Johan Eriksson, Michael Gilek, Christina Rudén, 2010-08-18 This volume presents research on current trends in chemical regulations a fa growing complex and increasingly internationalized field The book grew out from a multidisciplinary research project entitled Regulating Chemical Risks in the Baltic Sea Area Science Politics and the Media led by Michael Gilek at S dert rn University Sweden This research project involved scholars and experts from natural as well as social sciences based at S dert rn University Swedish Royal Institute of Technology KTH Karolinska Institutet and Ume University The project group organized a multidisciplinary research conference on chemical risk regulations held in Stockholm August 15 17 2007 Most of the contributions published in this book were in draft form first presented at this conference The conference like the ensuing edited volume expanded the geographical focus beyond the Baltic Sea area to include wider European and to some extent also global trends Many thanks to all project colleagues and conference participants We are very grateful for the generous financial support received from The Foundation for Baltic and East European Studies stersj stiftelsen The Swedish Research Council Formas and from S dert rn University Without this support the present book would not have been possible Special thanks to all of our fellow contributors all of whom have submitted to cal papers based on high quality research Many thanks also to Tobias Evers who assisted us with technical editing Finally we are grateful for the professionalism shown by our editors at Springer **Arguing About Science** Alexander Bird, James Ladyman, 2012-11-12 Arguing About Science is an outstanding engaging introduction to the essential topics in philosophy of science edited by two leading experts in the field This exciting and innovative anthology contains a selection of classic and contemporary readings that examine a broad range of issues from classic problems such as scientific reasoning causation and scientific realism to more recent topics such as science and race forensic science and the scientific status of medicine The editors bring together some of the most influential contributions of famous philosophers in the field including John Stuart Mill and Karl Popper as well as more recent extracts from philosophers and scientists such as Ian Hacking Stephen Jay Gould

Bas van Fraassen Nancy Cartwright and John Worrall The anthology is organised into nine clear sections science non science and pseudo science race gender and science scientific reasoning scientific explanation laws and causation science and medicine probability and forensic science risk uncertainty and science policy scientific realism and anti realism The articles chosen are clear interesting and free from unnecessary jargon The editors provide lucid introductions to each section in which they provide an overview of the debate as well as suggestions for further reading *From Critical Science to Solutions* Richard Clapp, 2017-03-02 First Published in 2017 In this volume the editor collected articles that primarily appeared in the Scientific Solutions section of *New Solutions A Journal of Environmental and Occupational Health Policy* The articles in the book are grouped into three general categories starting with Critical Science These articles are primarily critiques of how science is done or how science is incorporated into public health policy in the United States and elsewhere The second category is what I have called Precautionary Science These articles such as the ones by Dement on asbestos and Solomon and colleagues on the risks of manganese essentially call for precautionary regulations to reduce exposures where there is substantial but in the eyes of some less than definitive scientific knowledge The final category is Solutions Science In some ways this represents the current stage of precautionary science where we have begun to look at larger societal issues and have moved beyond traditional scientific approaches and critiques **The Vision Zero Handbook** Karin Edvardsson Björnberg, Sven Ove Hansson, Matts-Åke Belin, Claes Tingvall, 2022-11-30 This open access handbook provides a comprehensive treatment of Vision Zero an innovative policy on public road safety developed in Sweden Covering all the major topics of the subject the book starts out with a thorough examination of the philosophy ideas and principles behind Vision Zero It looks at conditions for the effectiveness of the policy principles of safety and responsibility as well as critique on the policy Next the handbook focuses on how the Vision Zero ideas have been received and implemented in various legislations and countries worldwide It takes into account the way Vision Zero is looked at in the context of international organizations such as the WHO the UN and the OECD This allows for a comparison of systems models and effects The third part of the handbook discusses the management and leadership aspects including ISO standards equity issues other goals for traffic and transportation and opportunities for the car industry Part four delves into tools technologies and organizational measures that contribute to the implementation of Vision Zero in road traffic Examples of specific elements discussed are urban and rural road designs human factor designs and avoiding drunk and distracted driving The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas ranging from air traffic to suicide prevention and nuclear energy Vision Zero is a public road safety policy including both a long term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders technological innovations and new

strategies and organizational measures to achieve a safe system The road safety work based on Vision Zero has shown promising results and although Sweden has not yet reached a safe system the number of fatalities and severe injuries has decreased substantially This is an open access book
