Wood, 2020-04-23 Viewing the subsistence farm as primarily a demographic enterprise to create and support a family this book offers an integrated view of the demography and ecology of preindustrial farming Taking an interdisciplinary perspective it examines how traditional farming practices interact with demographic processes such as childbearing death and family formation It includes topics such as household nutrition physiological work capacity health and resistance to infectious diseases as well as reproductive performance and mortality The book argues that the farming household is the most informative scale at which to study the biodemography and physiological ecology of preindustrial non commercial agriculture It offers a balanced appraisal of the farming system considering its strengths and limitations as well as the implications of viewing it as a demographic enterprise rather than an economic one A valuable resource for graduate students and researchers in biological and physical anthropology cultural anthropology natural resource management agriculture and ecology **Seeking a Richer Harvest** Tina Thurston, Christopher T Fisher, 2006-11-25 Subsistence intensification innovation and change have long figured prominently in explanations for the development of social complexity among foragers and horticulturalists and the rise of chiefly societies and archaic states yet there is considerable debate over the actual mechanisms that promote these processes Traditional approaches to the intensification question emphasize population pressure climate change bureaucratic management or even land degradation as prerequisites for the onset of new or changing strategies or the construction and maintenance of agricultural landscapes Most often these factors are modeled as external forces outside the realm of human decision making but recent archaeological research presents an alternative to this suggesting that subsistence intensification is the result of human driven strategies for power prestige and status stemming from internal conditions within a group When responding to environmental adversity human groups were less frequently the victims as they have been repeatedly portrayed Instead human groups were often vigorous actors responding with resilience ingenuity and planning to flourish or survive within dynamic and sometimes unpredictable social and natural milieux **Water Histories and Spatial Archaeology** Michael J.

Pastoralist Landscapes and Social Interaction in Bronze Age Eurasia Michael David Frachetti,2009-01-05 Offering a fresh archaeological interpretation this work reconceptualizes the Bronze Age prehistory of the vast Eurasian steppe during one of the most formative and innovative periods of human history Michael D Frachetti combines an analysis of newly documented archaeological sites in the Koksu River valley of eastern Kazakhstan with detailed paleoecological and ethnohistorical data to illustrate patterns in land use settlement burial and rock art His investigation illuminates the practical effect of nomadic strategies on the broader geography of social interaction and suggests a new model of local and regional interconnection in the third and second millennia B C E Frachetti further argues that these early nomadic communities played a pivotal role in shaping enduring networks of exchange across Eurasia

Classic Maya Politics of the Southern Lowlands Damien B. Marken,James L. Fitzsimmons,2015-11-02 Classic Maya Politics of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period

The Cambridge World History: Volume 2, A World with Agriculture, 12,000 BCE-500 CE Graeme Barker,Candice Goucher,2015-04-16 The development of agriculture has often been described as the most important change in all of human history Volume 2 of the Cambridge World History series explores the origins and impact of agriculture and agricultural communities and also

discusses issues associated with pastoralism and hunter fisher gatherer economies To capture the patterns of this key change across the globe the volume uses an expanded timeframe from 12 000 BCE 500 CE beginning with the Neolithic and continuing into later periods Scholars from a range of disciplines including archaeology historical linguistics biology anthropology and history trace common developments in the more complex social structures and cultural forms that agriculture enabled such as sedentary villages and more elaborate foodways and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world including Southwest Asia South Asia China Japan Southeast Asia and the Pacific sub Saharan Africa the Americas and Europe *The Archaeology of Household Activities* Penelope Allison,2013-05-13 This pioneering collection engages with recent research in different areas of the archaeological discipline to bring together case studies of the household material culture from later prehistoric and classical periods The book provides a comprehensive and accessible study for students into the material records of past households aiding wider understanding of our own domestic development

Housework Kenneth G. Hirth,2010-02-15 Households are without question the most important social units in human society They are interactive social units whose primary concern is the day to day well being of their kith and kin Households reproduce themselves and provide their members with the economic psychological and social resources necessary to live their lives Although households vary enormously in size and organization they are the fundamental social settings in which families are defined and cultural values are transmitted through a range of domestic activities and rituals Despite their many functions it is the range and productivity of their economic activities that determine the success survival and well being of their members Households are the primary production and consumption units in society and provide the vehicle through which resources are pooled stored and distributed to their members Survival and reproduction is their business and the work they do determines their success

Africa Tony Binns,Etienne Nel,Alan Dixon,2012-01-11 For many Africa is regarded as a place of mystery and negative images where reports of natural disasters and civil strife dominate media attention with relatively little publicity given to any of the continent s more positive attributes Africa has at last begun to receive the depth of interest it has long deserved in the shape of debates about trade aid and debt the Make Poverty History campaign and the UK s Commission on Africa But behind the superficial media facade Africa is a diverse complex and dynamic place with a rich history and a colonial engagement that although short lived was fundamental in determining the long term future of the continent At the start of the second decade of the twenty first century when the world is engulfed in a major financial crisis Africa has the dubious distinction of being the world s poorest continent This book introduces and demystifies Africa s diversity and dynamism and considers how its peoples and environments have interacted through time and space The background and diversity of Africa s social cultural economic political and environmental systems is examined as well as key development issues which have affected Africa in the past and are likely to be significant in shaping the future of the continent These include the impact of

HIV AIDS sources of conflict and post conflict reconstruction the state and governance the nature of African economies in a global context and future development trajectories Africa Diversity and Development is a refreshing interdisciplinary text which enhances understanding of the background to Africa s current position and clarifies possible future scenarios It is richly illustrated throughout with diagrams and plates and contains a wealth of detailed case studies and current data

Legacies of Space and Intangible Heritage Fernando Armstrong-Fumero,Julio Hoil Gutierrez,2017-03-01 Legacies of Space and Intangible Heritage is an interdisciplinary exploration of the intersections between the study and management of physical sites and the reproduction of intangible cultural legacies The volume provides nine case studies that explore different ways in which place is mediated by social political and ecological processes that have deep historical roots and that continue to affect the politics of heritage management Spaces of human habitation are both historical records of the past and key elements in reproducing the knowledge and values that define lives in the present Practices knowledge and skills that communities recognize as part of their culture and that a range of legal statutes define as protected intangible heritages are threatened by increased migration the displacement of indigenous peoples and limits on access to culturally or historically significant sites This volume addresses how different physical environments contribute to the reproduction of cultural forms even in the wake of these processes of displacement and change Case studies from North and South America reveal a pattern of abandonment and reestablishment of settlements and show how collective memory drives people back to culturally meaningful sites This tendency for communities to return to the sites that shaped their collective histories along with the growing importance granted to intangible heritage challenges archaeologists and other heritage workers to find new ways of incorporating the cultural legacies that link societies to place into the work of research and stewardship By examining the politics of cultural continuity through the lenses of archaeology and ethnohistory Legacies of Space and Intangible Heritage demonstrates this complex relationship between a people s heritage and the landscape that affects the making of place
