Crabtree,2017-07-05 First published in 2001 this is the first reference work to cover the archaeology of medieval Europe No other reference can claim such comprehensive coverage from Ireland to Russia and from Scandinavia to Italy the archaeology of the entirety of medieval Europe is discussed With coverage ranging from the fall of the western Roman empire in the 5th century CE through the end of the high Middle Ages in 1500 CE *Medieval Archaeology An Encyclopedia* answers the needs of medieval scholars from a variety of backgrounds including archaeologists historians and classicists Featuring over 150 entries by an international team of leading archaeologists this unique reference is soundly based on the most important developments and scholarship in this rapidly growing field **From Rome to Byzantium** Michael Grant,2015-03-04 Byzantium was dismissed by Gibbon in the *Decline and Fall of the Roman Empire* and his Victorian successors as a decadent dark oriental culture given up to intrigue forbidden pleasure and refined cruelty This great empire founded by Constantine as the seat of power in the East began to flourish in the fifth century AD after the fall of Rome yet its culture and history have been neglected by scholars in comparison to the privileging of interest in the Western and Roman Empire Michael Grant s latest book aims to compensate for that neglect and to provide an insight into the nature of the Byzantine Empire in the fifth century the prevalence of Christianity the enormity and strangeness of the landscape of Asia Minor and the history of invasion prior to the genesis of the empire Michael Grant s narrative is lucid and colourful as always lavishly illustrated with photographs and maps He successfully provides an examination of a comparatively unexplored area and constructs the history of an empire which rivals the former richness and diversity of a now fallen Rome Harper's New Monthly Magazine ,1877 **7000 Years of Jewellery** Hugh Tait,2006 This panoramic illustrated history explores the varied styles techniques and materials used to make jewellery throughout the world since earliest times Egyptian necklaces Celtic torcs South American gold masks Renaissance pendants and Art Nouveau buckles are among the range of masterpieces described by a team of experts from the British Museum and illustrated with 400 superb photographs This reissue includes images of major acquisitions made in the last ten years particularly from Europe since 1700 and from Asia *Migration Art, A.D. 300-800* Metropolitan Museum of Art (New York, N.Y.),Katharine Reynolds Brown,1995 Grab Gr berfeld Donauraum Schmuckstein **The Tomb of Three Foreign Wives of Tuthmosis III** Christine Lilyquist,2003 This book results from a collaborative effort to reconstruct the 15th century BC tomb of three foreign wives of Tuthmosis III discovered and robbed by villagers near Luxor in 1916 A general account was published by Herbert Winlock in 1948 *The Treasure of Three Egyptian Princesses* New York The Metropolitan Museum of Art

The present volume differs substantially in the type and extent of documentation provided and in interpretation. Verification is provided of tomb provenance for a number of objects for example while other objects previously thought to have come from the tomb are now considered forgeries. The text explores and documents the location of the tomb in the southwest valleys at Thebes, field work conducted by The Metropolitan Museum of Art at the site in 1988, art market finds alleged to have come from the tomb and the names of the foreign wives and the life they might have led.

Assyria to Iberia at the Dawn of the Classical Age Joan Aruz, Sarah B. Graff, Yelena Rakic, 2014-09-15

Bringing together the research of internationally renowned scholars, *Assyria to Iberia at the Dawn of the Classical Age* contributes significantly to our understanding of the epoch-making artistic and cultural exchanges that took place across the Near East and Mediterranean in the early first millennium B.C. This was the world of Odysseus in which seafaring Phoenician merchants charted new nautical trade routes and established prosperous trading posts and colonies on the shores of three continents of kings Midas and Croesus, legendary for their wealth, and of the Hebrew Bible whose stories are brought vividly to life by archaeological discoveries. Objects drawn from collections in the Middle East, Europe, North Africa, and the United States reproduced here in sumptuous detail reflect the cultural encounters of diverse populations interacting through trade, travel, and migration, as well as war and displacement. Together they tell a compelling story of the origins and development of Western artistic traditions that trace their roots to the ancient Near East and across the Mediterranean world. Among the masterpieces brought together in this volume are stone reliefs that adorned the majestic palaces of ancient Assyria, expertly crafted Phoenician and Syrian bronzes, and worked ivories that were stored in the treasuries of Assyria and deposited in tombs and sanctuaries in regions far to the west, and lavish personal adornments and other luxury goods, some imported and others inspired by Near Eastern craftsmanship. Accompanying texts by leading scholars position each object in cultural and historical context, weaving a narrative of crisis and conquest, worship and warfare, and epic and empire that spans both continents and millennia. Writing another chapter in the story begun in *Art of the First Cities* (2003) and *Beyond Babylon* (2008), *Assyria to Iberia* offers a comprehensive overview of art, diplomacy, and cultural exchange in an age of imperial and mercantile expansion in the ancient Near East and across the Mediterranean in the first millennium B.C., the dawn of the Classical age.

Objects of Virtue Luke Syson, Dora Thornton, 2001

You are what you own. So believed many of the elite men and women of Renaissance Italy. The notion that a person's belongings transmit something about their personal history, status, and character was renewed in the fifteenth and early sixteenth centuries. *Objects of Virtue* explores the multiple meanings and values of the objects with which families like the Medici, Este, and Gonzaga surrounded themselves. This lavishly illustrated volume examines the complicated relationships between the so-called fine arts—painting and sculpture—and artifacts of other kinds for which artistry might be as important as utility: furniture, jewelry, and vessels made of gold, silver, and bronze; precious and semi-precious stone, glass, and ceramic. The works discussed were designed and made by artists as famous as Andrea Mantegna.

Raphael and Michelangelo as well as by lesser known specialists goldsmiths gem engravers glassmakers and maiolica painters
