Britannica ,1905 **The History of the Decline and Fall of the Roman Empire** Edward Gibbon,1887 *ULTIMATE SYMMETRY* Mohamed Haj Yousef,2019-01-01 This is the third volume in the Single Monad Model of the Cosmos series The second volume introduced the Duality of Time Theory which provided elegant solutions to many persisting problems in physics and cosmology including super symmetry and matter antimatter asymmetry In addition to uniting the principles of Relativity and Quantum theories this theory can also explain the psychical and spiritual domains all based on the same discrete complex time geometry Super symmetry and quantum gravity are realized only with the two complementary physical and psychical worlds while the spiritual realm is governed by hyper symmetry which mirrors the previous two levels together and all these three realms mirror the ultimate level of absolute oneness that describes the symmetry of the divine presence of God and His Beautiful Names and Attributes This *ULTIMATE SYMMETRY* is a modern scientific account of the same ancient mystical and greatly controversial theory of the Oneness of Being that is often misinterpreted in terms of pantheism but it is

indeed the concluding gnostic knowledge of God and creation Otherwise how can we understand the origin of the cosmos with both or either of its corporeal and incorporeal realms without referring to its Originator In the literal sense ultimate or perfect symmetry may seem to be trivial because it means that all possible transformations in such a symmetric system are invariant The system we are talking about here is the whole Universe that we are watching and experiencing its immense and sometimes shattering changes every moment of time Yet many great philosophers such as Parmenides and Ibn al Arabi maintained their firm belief that reality is unchanging One and existence is timeless and uniform while all apparent changes are mere illusions induced by or in our sensory faculties Nevertheless since we are living inside it this illusion is as good as reality for us Therefore we still need to explain how the Universe is being formulated Only when are able to transcend beyond the current chest of time we shall discover that we were living a dream and we shall be able to see the whole Universe as unchanging symmetry The Single Monad Model and the resulting Duality of Time Theory provide the link between this apparent dynamic multiplicity of creation and the ultimate metaphysical oneness In fact the complex time geometry concludes that we are imagining the reality because we are observing it from a genuinely imaginary time dimension Since the ultimate reality is One we cannot view it from outside because there is none Thus as we quoted in the Introduction in the Book of Theophanies Ibn al Arabi ascribes to God as saying Listen O My beloved I am the conclusive entity of the World I am the center of the circle of existence and its circumference I am its simple point and its compound whole I am the Word descending between heaven and earth I have created perceptions for you only to perceive Me If you then perceive Me you perceive yourself But don t ever crave to perceive Me through yourself It is through My Eyes that you see Me and see yourself But through your own eyes you can never see Me This Theophany of Perfection summarizes the Ultimate Symmetry between the single point and the encompassing space It also summarizes the instantaneous process of creation or re creation which is breaking this symmetry into the two arrows of time that produce particles and anti particles and then restoring it through each subsequent annihilation This reunion is also the fundamental cause of motion which is formulated as the Principle of Love that leads to the stationary action that is the initial assumption of most physics theories including Relativity and Quantum Field theories

The Qara-Daghian Shaul Elazar,2025-03-21 Is it appropriate to recite Shema Israel in this place In a dreamlike moment I found myself in the synagogue surrounded by people wrapped in prayer shawls and the thrilling voice of the cantor Hakham Abdullah I imagined my grandfather Hakham Nissim hovering beside me whispering verses with his angelic voice encouraging me to pray in this place that was once ours Inspired by his presence I set my heart on righting the insult to my grandfather s memory With permission granted I prepared to pray facing Jerusalem as is the Jewish tradition stunning those around me Born in Halabja the gas hit city of Kurdistan the writer recounts the tribulations of an Aramaic speaking Qaradaghian Jewish tribe spanning five generations This poignant memoir weaves together fascinating family stories some tragic and others filled with love and heroism The climax of the book is a nostalgic

visit to the landscapes from which the author was uprooted as a child His 2018 visit published in the Kurdish media under the headline The first Jew to return to Halabja since 1950 reveals the harsh reality of the Muslims rushing to build a mosque on the ruins of the synagogue In the city of Slemanyia the writer visits the Great Synagogue where his grandfather served as rabbi now converted into a mosque Here he sets a precedent by praying in a place where no Jewish prayer had been held for 67 years a testament to the enduring spirit of the lost people in the land of Assyria The hardships that began 2 700 years ago continued in the Land of Israel where the writer undergoes immigration experiences until his successful integration into the New Old Land The Monthly Magazine ,1816 **Cosmology and Architecture in Premodern Islam** Samer

Akkach,2012-02-01 This fascinating interdisciplinary study reveals connections between architecture cosmology and mysticism Samer Akkach demonstrates how space ordering in premodern Islamic architecture reflects the transcendental and the sublime The book features many new translations a number from unpublished sources and several illustrations Referencing a wide range of mystical texts and with a special focus on the works of the great Sufi master Ibn Arabi Akkach introduces a notion of spatial sensibility that is shaped by religious conceptions of time and space Religious beliefs about the cosmos geography the human body and constructed forms are all underpinned by a consistent spatial sensibility anchored in medieval geocentrism Within this geometrically defined and ordered universe nothing stands in isolation or ambiguity everything is interrelated and carefully positioned in an intricate hierarchy Through detailed mapping of this intricate order the book shows the significance of this mode of seeing the world for those who lived in the premodern Islamic era and how cosmological ideas became manifest in the buildings and spaces of their everyday lives This is a highly original work that provides important insights on Islamic aesthetics and culture on the history of architecture and on the relationship of art and religion creativity and spirituality **Crime Fiction and Film in the Southwest** Steve Glassman,Maurice J.
