Seven Theories Of Human Nature:

Seven Theories of Human Nature Leslie Stevenson, 1974 **Seven Theories of Human Nature** Leslie Forster Stevenson, 1976 *Ten Theories of Human Nature* Leslie Stevenson, David L. Haberman, 1998 A superb introduction to the timeless struggle to understand human nature this book compresses into a small volume the essence of such thinkers as Karl Marx Sigmund Freud Jean Paul Sartre B F Skinner and Plato **The Anatomy of Neo-Colonialism in Kenya** W. O. Maloba, 2017-08-29 The successor to *Kenyatta and Britain An Account of Political Transformation 1929 1963* this book completes the first systematic political history of Jomo Kenyatta by examining the mechanisms of installing a neo colonial regime in Kenya and how such regimes were duplicated elsewhere in Africa It analyzes the nature and extent of the collaboration between Kenyatta Britain and Western intelligence services to install and protect his government in Kenya a collaboration which is linked to some of Kenya s most intractable political social and economic problems Drawing heavily on primary sources it examines the legacy of Kenyatta s regime and how this legacy is felt in Kenya today *Seven Theories of Human Nature: Christianity, Freud, Lorenz, Marx, Sartre, Skinner, Plato* Leslie Stevenson, 1987 *Assumptions about Human Nature* Lawrence S. Wrightsman, 1992 This book which is in its second edition provides a provocative mirror from which to discern more clearly one s own assumptions about human nature I found myself reflecting on the subject matter and its impact on my own life including relationships teaching research and therapy The author has done a superb job of raising our consciousness about human nature in this book and I strongly recommend it to academic and applied psychologists If you need an invitation to examine your views about human nature this book is it C R Snyder University of Kansas Lawrence In general are people trustworthy or unreliable altruistic or selfish Are they simple and easy to understand or complex and beyond comprehension Our assumptions about human nature color everything from the way we bargain with a used car dealer to our expectations about further conflict in the Middle East Because our assumptions about human nature underlie our reactions to specific events Wrightsman designed this second edition to enhance our understanding of human nature the relationship of attitudes to behavior the unidimensionality of attitudes and the influence of social movements on beliefs Psychologists social workers researchers and students will find *Assumptions About Human Nature* an illuminating exploration into the philosophies of human nature **On Being a Person** Todd Speidell, 2002-12-02 From the Introduction The approach of this text will be multidisciplinary psychologists philosophers theologians and ethicists grappling with what it means to be a person This volume will not attempt to provide a comprehensive history of psychology but will instead focus on selected representatives of various paradigms of psychology from the first systematic psychologist Aristotle through psychology s development as an empirical science and to recent developments in family systems theory It will especially emphasize a social relational spiritual view of the self namely human relations to God and to others are essential to humanity **Who Do I Say That You Are?** William Schumacher, 2010-01-04 The question of what it means to be a human creature

lies at the heart of contemporary wrestling with anthropology and especially anthropology from a theological perspective Through both historical and systematic engagement with the so called Finnish school of Tuomo Mannermaa this study explores and assesses the anthropological dimension of their theology of theosis or deification Mannermaa initiated a minor revolution in Luther studies and in contemporary Lutheran theology by interpreting Luther's doctrine of justification to be a close analog to the Eastern Orthodox doctrine of theosis but his ecumenical interests led him to minimize or overlook key themes in Luther and sharp distinctions between Luther and Orthodox theologians Mannermaa's colleague Simo Peura then developed this thesis with specific reference to anthropology in a way reminiscent of the sixteenth century reformer Andreas Osiander On closer inspection the project of Mannermaa and his Finnish colleagues fails to understand adequately both Luther's sources and his own theological development In this study a theological anthropology which is more consistent with Luther's theology is developed an anthropology which is determined by God's address to his human creatures what God himself says we are and what he makes us by that word Such an answer to the anthropological question refuses to flee from creation but instead upholds the complex and paradoxical nature of human beings as creatures sinners and saints
