Claire Shaeffer, 2000-10 **Sourcing Practices in the Apparel Industry** Marlon Lezama, Brian Webber, Charles Dagher, 2004 Sourcing practices in the global apparel industry are changing because of the removal of quotas new trade agreements and a drive by apparel importers to lower costs This study addresses the implications of these changes for garment manufacturers in Commonwealth developing countries The principal research activities behind the book consisted of face to face interviews in North America with top sourcing executives of apparel importing companies and senior executives of apparel manufacturing companies and other stakeholders in six Commonwealth developing countries The findings indicate that almost without exception apparel manufacturers are struggling to lower costs and to increase

productivity so as to remain competitive Government and industry are thus faced with critical decisions on how best to support the apparel industry in their respective countries The principal outputs of the study are enterprise level guidelines to remain competitive in the face of evolving sourcing policies technology and practices complemented by related frameworks at government and institutional levels **The U.S. Textile and Apparel Industry** ,1987 This report describes the plight of America s textile industries threatened by imports from countries paying lower wages to workers S N 052 003 01064 0 7 50

Sewing Success? Gladys Lopez-Acevedo,Raymond Robertson,2012-03-14 The end of the MFA was followed by rising apparel exports falling prices and a reallocation of production and employment between countries There were also significant changes within countries The first main finding of this report is that export and employment patterns after the MFA ATC did not necessarily match predictions While many predicted that production would shift to low wage countries this book shows that only 13 percent of variation in export changes post MFA can be explained by the differences in wage levels Second changes in exports are usually but not always good indicators of what happens to wages and employment within countries This is especially important for policy because it shows that simply using exports as a metric of success in terms of helping the poor is not sufficient Third the Book identifies the specific ways that changes in the global apparel market affected earnings The Book shows that wage premiums change in predictable ways rising in most cases in countries that were proactive in adapting to the MFA phase out and expanded their market shares and falling in countries that failed to respond in a timely fashion to the changing environment The Book shows that promoting upgrading defined as shifting to higher value goods shifting up the value chain or modernizing production techniques seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial Otherwise less skilled workers could miss out on opportunities to gain valuable work experience in manufacturing **A Guide to**
