Lloyd-Sherlock, 1997-07-23 Many countries in the developing world are facing a rapid acceleration in population ageing To date this problem has generated little interest either from academics or policy makers Studies which focus exclusively on social security are of little relevance for the majority of elderly in these regions for whom the possibilities of saving or making pension contributions are remote This book takes a more comprehensive approach combining analysis of social security issues in all developing countries with micro level case studies of poor urban elderly survival strategies in Buenos Aires

Demography: Analysis and Synthesis, Four Volume Set Graziella Caselli, Jacques Vallin, Guillaume Wunsch, 2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks *Demography Analysis and Synthesis* offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of *Demography Analysis and Synthesis* have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these

subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations Longevity: To the Limits and Beyond Jean-Marie Robine,James W. Vaupel,Bernard Jeune,Michel

Allard,2012-12-06 Why longevity For a number of years the Fondation IPSSEN has been devoting considerable effort to the various aspects of ageing not only to age related diseases such as Alzheimer s but also to the Centenarians the paragon of positive ageing The logical continuation of this approach is to address the question of longevity in global terms Behind the extreme values what span is accessible to all of us and likely to directly concern most of our contemporaries The individual and collective increase in the duration of life is one of the most striking phenomena of our time It could be one of the most significant events in the bio social history of humanity The increase in life expectancy at old age which started a few decades ago only is going on The most well advised observer had not foreseen or even dared hope for this increase which will drastically affect our everyday life our habits and our behavior In the fragment of human history we are living in it is our responsibility to deal with this major transformation for the species Such a transformation needs an effort from all to adapt to the new conditions This transformation has to be managed rather than simply experienced anticipated rather than followed in order to avoid any attempt to pervert this major step forward All that was present during the first symposium of the new series on longevity of the Colloques Medecine et Recherche convened by the Fondation IPSSEN **Youth and the Global Media** University of Manchester. Broadcasting Symposium,1999 Containing edited sessions from the 29th University of Manchester International Broadcasting Symposium these papers cover children s and youth broadcasting an area that has always aroused controversy among broadcasters educators and the general public Topics include new media music broadcasting images of children and young people and cultural diversity in youth broadcasting Papers and discussions from David Elstein Brian Cosgrove Anthony Wilson and Malcolm Gerri are featured **World Population Prospects** ,2006

Beyond Six Billion National Research Council,Commission on Behavioral and Social Sciences and Education,Committee on Population,Panel on Population Projections,2000-10-11 Is rapid world population growth actually coming to an end As population growth and its consequences have become front page issues projections of slowing growth from such institutions as the United Nations and the World Bank have been called into question Beyond Six Billion asks what such projections really say why they say it whether they can be trusted and whether they can be improved The book includes analysis of how well past U N and World Bank projections have panned out what errors have occurred and why they have happened Focusing on

fertility as one key to accurate projections the committee examines the transition from high constant fertility to low fertility levels and discusses whether developing countries will eventually attain the very low levels of births now observed in the industrialized world Other keys to accurate projections predictions of lengthening life span and of the impact of international migration on specific countries are also explored in detail How good are our methods of population forecasting How can we cope with the inevitable uncertainty What population trends can we anticipate Beyond Six Billion illuminates not only the forces that shape population growth but also the accuracy of the methods we use to quantify these forces and the uncertainty surrounding projections The Committee on Population was established by the National Academy of Sciences NAS in 1983 to bring the knowledge and methods of the population sciences to bear on major issues of science and public policy The committee s work includes both basic studies of fertility health and mortality and migration and applied studies aimed at improving programs for the public health and welfare in the United States and in developing countries The committee also fosters communication among researchers in different disciplines and countries and policy makers in government international agencies and private organizations The work of the committee is made possible by funding from several government agencies and private foundations **Nber Macroeconomics Annual 1997** Ben S. Bernanke, Julio J. Rotemberg, 1997

The Clash of Civilizations and the Remaking of World Order Samuel P. Huntington, 2007-05-31 The classic study of post Cold War international relations more relevant than ever in the post 9 11 world with a new foreword by Zbigniew Brzezinski Since its initial publication The Clash of Civilizations and the Remaking of World Order has become a classic work of international relations and one of the most influential books ever written about foreign affairs An insightful and powerful analysis of the forces driving global politics it is as indispensable to our understanding of American foreign policy today as the day it was published As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book it has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war Events since the publication of the book have proved the wisdom of that analysis The 9 11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross civilization cooperation is to restoring peace As ideological distinctions among nations have been replaced by cultural differences world politics has been reconfigured Across the globe new conflicts and new cooperation have replaced the old order of the Cold War era The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics These developments challenge Western dominance promote opposition to supposedly universal Western ideals and intensify intercivilization conflict over such issues as nuclear proliferation immigration human rights and democracy The Muslim population surge has led to many small wars

throughout Eurasia and the rise of China could lead to a global war of civilizations Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex multipolar multicivilizational world

Indonesia Assessment Gavin W. Jones, Terence H. Hull, 1997-06-16 Indonesia's population the fourth largest in the world is expected to pass the 200 million mark in 1997 It has sustained high rates of economic growth over the past two decades This has undoubtedly been related to its success in moderating earlier high rates of population growth and to its significant accomplishments in human resource development This volume is therefore timely It presents a comprehensive evaluation of the current situation and assesses future prospects

Southeast Asia Transformed Chia Lin Sien, 2003 Southeast Asia with a total population of 520 million remains a region characterized by fragmentation diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations ASEAN formed some thirty five years ago In the new millennium it has lost the distinction of being one of the world's faster growing group of economies since the 1997 financial crisis While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes

India Jean Drèze, Amartya Sen, 2002 This book explores the role of public action in eliminating deprivation and expanding human freedoms in India The analysis is based on a broad and integrated view of development which focuses on well being and freedom rather than the standard indicators of economic growth The authors place human agency at the center stage and stress the complementary roles of different institutions economic social and political in enhancing effective freedoms

World Population Prospects United Nations. Department of Economic and Social Affairs. Population Division, 2006-02 This volume presents the comprehensive tables of world population estimates and projections Covering the 1950-2050 time period demographic profiles and selected demographic indicators are provided for each development group major area region and country The tables are accompanied by a summary of the result and the underlying assumptions While the population at the global level continues to increase that of the developed world is hardly changing at all and virtually all population growth is occurring in the less developed regions Especially rapid population growth characterizes the group of 50 least developed countries Below replacement fertility prevails in the developed world and mortality rates are low In the developing world however fertility is still high and mortality is increasing in countries highly affected by HIV/AIDS

Sharing the Wealth Andrew Mason, Georges Tapinos, 2000-09-07 This book is a collection of papers by leading scholars whose research concerns economic transfers between generations The issues addressed have great relevance to demographic issues particularly the determination of fertility to economic issues including equity and growth and to public policy especially social security reform Part I focuses on intergenerational features of the macroeconomy Advances in the construction of generational accounts are described and used to examine how the magnitude and direction of intergenerational transfers influences demographic behaviour the distribution of income and the accumulation of wealth Studies presented in Part II consider the role of the

state as a provider of economic security for the elderly The authors draw on international experience and discuss many of the issues that must be confronted if efforts to reform public pension programs are to be successful Part III considers the intergenerational behaviour of the family The authors examine competing theories in both industrialized and developing country settings to consider how demographic change the development of financial institutions public policy and other economic forces influence the amount form and timing of intergenerational transfers *Culture and Society in the Asia-Pacific* Colin Mackerras,Richard Maidment,2005-07-28 This important new text examines the crucial social and cultural factors associated with the rise of the Asia Pacific region at the end of the Twentieth Century It takes a close look at those areas which have affected the everyday life of the people most directly These include the family gender relations and the position of women religion the arts with specific reference to film ethnic relations and population migration education and the images of the Asia Pacific The authors discuss real tensions between tradition and modernity in different nations of the Asia Pacific exploring the effects that economic growth has on powerful traditional cultures **The Well-Being of the Elderly in Asia** Albert I. Hermalin,2002 In the broadest sense The Well Being of the Elderly in Asia is a study of social change and of anticipating future social change It examines the effects on the current and future elderly of the rapid demographic transition that has occurred over much of Asia accompanied in many countries by equally dramatic social and economic transformations Policymakers in Asia have been aware of these trends and their potentially deleterious consequences for a decade or more and have sought to fashion appropriate policies and programs that anticipate and mitigate their effects Accordingly any study of the sociodemographic trends and their impact must be examined in the light of policies put in place and under development 100 Ways of Seeing an Unequal World Bob Sutcliffe,2001-04 This innovative book builds on the fact that there is now a large body of statistical information about today s highly unequal world Bob Sutcliffe looks at current affairs development and international relations For anyone wanting to understand the contemporary world this book probes complex economic issues using innovative diagrams and charts Handbook of Macroeconomics Michael Woodford,1999 *Aged Care* Diane Gibson,1998-01-28 The ageing of the population is a demographic phenomenon a social problem and a policy issue The increase in the numbers of aged and in the costs of supporting and caring for them have also brought increases in family care in deinstitutionalisation of aged care services and in issues of quality and outcomes of care and consumer rights The growing recognition of the feminisation of ageing also has significant social and policy consequences In this 1998 book Diane Gibson synthesises a wide range of material to provide an overview of these issues and policy responses worldwide The book then looks in depth at Australia a country typical in the problems it faces and a world leader in many of its solutions Gibson also offers a more conceptual examination of theoretical implications and practical consequences She elucidates debates in ways which will set new standards for aged care policy and practice worldwide *International Labour Documentation* International Labour Office.
