Indoor America Andrea Vesentini, 2018-11-27 Cars single family houses fallout shelters air conditioned malls these are only some of the many interiors making up the landscape of American suburbia Indoor America explores the history of suburbanization through the emergence of such spaces in the postwar years examining their design use and representation By drawing on a wealth of examples ranging from the built environment to popular culture and film Andrea Vesentini shows how suburban interiors were devised as a continuous cultural landscape of interconnected and self sufficient escape capsules The relocation of most everyday practices into indoor spaces has often been overlooked by suburban historiography Indoor America uncovers this latent history and contrasts it with the dominant reading of suburbanization as pursuit of open space Americans did not just flee the city by getting out of it they did so also by getting inside Vesentini chronicles this inner directed flight by describing three separate stages The encapsulation of the automobile fostered the nuclear segregation of the family from the social fabric and served as a blueprint for all other interiors Introverted design increasingly turned the focus of the house inward Finally through interiorization the exterior was incorporated into the all encompassing interior landscape of enclosed malls and projects for indoor cities In a journey that features tailfin cars and World s Fair model homes Richard Neutra s glass walls and sitcom picture windows Victor Gruen s Southdale Center and the Minnesota Experimental City Indoor America takes the reader into the heart and viscera of America s urban sprawl

Living in the Labyrinth of Technology Willem H. Vanderburg, 2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg s Living in the Labyrinth of Technology seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity s third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people s minds and society s cultures

thereby re creating human life in the image of technology Living in the Labyrinth of Technology argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms *Gendered Journeys, Mobile Emotions* Gillian Reynolds,2016-04-22 It is increasingly acknowledged that an analysis of emotions is necessary to fully understand the social world and recent research on transport travel and mobilities has begun to consider the gendered nature of public and personal life in relation to this sphere The focus of this multidisciplinary and autobiographical volume is the emotional relationship that individuals and groups have with different means of travel Attention is given to a variety of travel experiences including travelling in trains planes cars buses and ships as well as biking cycling running and walking from the perspective of travellers and those who earn their living in assisting these experiences of others Imaginary travel and the relationships between art and travel are also considered Adopting innovative approaches to experiential material ranging from personal memories to empirical research *Gendered Journeys Mobile Emotions* opens up and illuminates an interdisciplinary debate about the gendered emotive and emotional nature of travelling

Sex and Buildings Richard J. Williams,2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue *Sex and Buildings* explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention *Sex and Buildings* will change the way we look at the buildings around us

[Our Battle for the Human Spirit](#) Willem H. Vanderburg,2016-08-04 Western society has become saturated with scientific and technological modes of thinking that impact our lives and our relationships Expanding social inequality the use of social media and the rise of mental illnesses such as anxiety and depression are manifestations of this shift in our civilization *Our Battle for the Human Spirit* is a comprehensive probe into what is happening to human life in the beginning of the 21st century It explores how culture experience and symbolization have been replaced by scientific discipline based approaches Willem H Vanderburg argues that these approaches are inadequate in understanding the complexity of human lives and societies In order to transcend these limits Vanderburg calls for the reintegration of culture and symbolization into our daily lives

Grimes,1998-07 Defining borders is a complex task especially today as globalization accelerates at an unprecedented rate We have entered a transnational age one in which borders are more porous So says Kimberly M Grimes in Crossing Borders Changing Social Identities in Southern Mexico her investigation of migration to the United States from Putla de Guerrero Oaxaca Featuring testimonies of residents and migrants Grimes allows local voices to describe the ways in which Putlecans find themselves negotiating among competing social values The testaments of the Putlecans indicate that the changes occurring in their small town as a result of the circular migration to and from such immigrant enclaves as Atlantic City New Jersey are viewed with mixed emotions Putlecans recognize the financial need to migrate north but they rue the increased consumerism pollution and trash that comes with the rising wealth Men show off by driving their fancy cars with New Jersey tags around the tiny Mexican town but influenced by Anglo culture they also provide greater assistance in child care and housework Women find the sexual and social freedoms of the United States liberating but they still return home to baptize their babies Grimes reminds us however that the Putlecans are not passive recipients of change but are actively embracing it creating it and mediating it By reaching across the border to investigate migration Grimes shows us that social and cultural change are not just the result of national and transnational influences but are also locally negotiated phenomena
