**Human Cultures through the Scientific Lens** Pascal Boyer, 2021-07-09 This volume brings together a collection of seven articles previously published by the author with a new introduction reframing the articles in the context of past and present questions in anthropology psychology and human evolution It promotes the perspective of integrated social science in which social science questions are addressed in a deliberately eclectic manner combining results and models from evolutionary biology experimental psychology economics anthropology and history It thus constitutes a welcome contribution to a gradually emerging approach to social science based on E O Wilson s concept of consilience Human Cultures through the Scientific Lens spans a wide range of topics from an examination of ritual behaviour integrating neuro science ethology and anthropology to explain why humans engage in ritual actions both cultural and individual to the motivation of conflicts between groups As such the collection gives readers a comprehensive and accessible introduction to the applications of an evolutionary paradigm in the social sciences This volume will be a useful resource for scholars and students in the social sciences particularly psychology anthropology evolutionary biology and the political sciences as well as a general readership interested in the social sciences

**Societies Past and Present** Thomas C. Burr, 2025-09-24 This global and comparative history examines the evolution of human societies over many millennia illuminating patterns within societies today It shows how the original human groups bands of hunter

gatherers grew over time into larger and more complex societies through three major transformations settlement and domestication the development of complexity and inequality and industrial globalization The book describes how each of these major changes in economy and political structure created new types of societies villages chiefdoms and other complex societies agrarian states and empires and today s global social system It therefore shows how different types of societies came to co exist and interact on Earth The book compares societies along seven aspects their economies political systems cultural patterns inequalities family structures demographics and environmental patterns It shows that even societies that shared similar basic features still exhibited great variety The comparative framework presented here helps readers develop a conceptual vocabulary for understanding societies the larger social systems within which they exist and the major social changes that led to this continuing expansion

Insights Into Gender Equity, Equality and Power Relations in Sub-saharan Africa Mansah Prah,2013 Since gender entered the development discourse in the Seventies African countries have increasingly taken the concept on board in policy and practice This concern may be due to either one or a combination of the following factors the ideological positioning of African countries demands by their donors and development partners and demands by organised local groups and NGOs Gender in the development discourse ought to transform power relations between men and women and shift them to social relations that reflect their equal access to productive resources opportunities and social and material benefits The result of such actions should be an achievement of comparable status of women and men This volume initiated by OSSREA seeks to examine in more depth issues regarding the gender power imbalance in sub Saharan African countries with a specific focus on the eastern and southern African regions The chapters in this book present research that examines and analyses the effectiveness and efficiency of gender mainstreaming policies strategies and projects developed and implemented by national and international actors The themes inter weave with each other although they address gender issues in specific countries and specific contexts This can be explained by the shared colonial and post colonial heritage of African countries It is useful therefore to view the structure of the book as a spiral of inter connected issues that address similar themes approaching them from different levels Purely for ease of reading the contributions have been organised into three parts with over arching themes that at first glance may seem not to fit well together A theme that runs through all the chapters is the persistence of patriarchal values and attitudes in Africa and its constraining effect on the achievement of gender equity and equality

**Gender, Development and Marriage** Caroline Sweetman,2003 This book traces the economic and social impact of inequality in marriage and considers its implications for development Looking at child marriage the link between women s economic contribution equality within marriage NGO responses to domestic violence and the need to understand particular forms of marriage for appropriate development policy

*Marriage, a History* Stephanie Coontz,2006-02-28 Just when the clamor over traditional marriage couldn t get any louder along comes this groundbreaking book to ask What tradition In Marriage a History historian and marriage expert Stephanie

Coontz takes readers from the marital intrigues of ancient Babylon to the torments of Victorian lovers to demonstrate how recent the idea of marrying for love is and how absurd it would have seemed to most of our ancestors. It was when marriage moved into the emotional sphere in the nineteenth century she argues that it suffered as an institution just as it began to thrive as a personal relationship. This enlightening and hugely entertaining book brings intelligence, perspective and wit to today's marital debate.

**Handbook on Evolution and Society** Alexandra Maryanski, Richard Machalek, Jonathan H. Turner, 2015-11-17 Handbook on Evolution and Society brings together original chapters by prominent scholars who have been instrumental in the revival of evolutionary theorizing and research in the social sciences over the last twenty-five years. Previously unpublished essays provide up-to-date critical surveys of recent research and key debates. The contributors discuss early challenges posed by sociobiology, the rise of evolutionary psychology, the more conflicted response of evolutionary sociology to sociobiology and evolutionary psychology. Chapters address the application and limitations of Darwinian ideas in the social sciences. Prominent authors come from a variety of disciplines in ecology, biology, primatology, psychology, sociology and the humanities. The most comprehensive resource available, this vital collection demonstrates to scholars and students the new ways in which evolutionary approaches ultimately derived from biology are influencing the diverse social sciences and humanities.

**Cross-Cultural Research Methods** Carol R. Ember, Melvin Ember, 2009-07-16 Without ethnography, cross-cultural comparison would not be possible. But without cross-cultural comparison, we would know nothing of what may be universal or variable across human cultures or why variation exists. Cross-Cultural Research Methods is an introductory teaching tool that shows students and potential researchers how to describe, compare and analyze patterns that occur in different cultures. That is how to form and test anthropological, sociological, psychological, medical or political hypotheses about cultural variation.

[Simple Heuristics in a Social World](#) Ralph Hertwig, Ulrich Hoffrage, ABC Research Group, 1999-09-30 Simple Heuristics in a Social World invites readers to discover the simple heuristics that people use to navigate the complexities and surprises of environments populated with others. The social world is a terrain where humans and other animals compete with conspecifics for myriad resources including food, mates and status and where rivals grant the decision maker little time for deep thought, protracted information search or complex calculations. Yet the social world also encompasses domains where social animals such as humans can learn from one another and can forge alliances with one another to boost their chances of success. According to the book's thesis, the undeniable complexity of the social world does not dictate cognitive complexity as many scholars of rationality argue. Rather, it entails circumstances that render optimization impossible or computationally arduous: intractability, the existence of incommensurable considerations and competing goals. With optimization beyond reach, less can be more. That is heuristics: simple strategies for making decisions.

when time is pressing and careful deliberation an unaffordable luxury become indispensable mental tools As accurate as or even more accurate than complex methods when used in the appropriate social environments these heuristics are good descriptive models of how people make many decisions and inferences but their impressive performance also poses a normative challenge for optimization models In short the Homo socialis may prove to be a Homo heuristicus whose intelligence reflects ecological rather than logical rationality
