Politicians And Party Politics:

Politicians and Party Politics John Gray Geer, 1998 Focusing on politicians as individuals rather than their political parties thirteen essays from a distinguished group of contributors examine how politicians as party members motivate voters how they conduct campaigns and how they behave in government 36 illustrations **Handbook of Party Politics** Richard S Katz, William J Crotty, 2006-01-05 This thoughtful and wide ranging review of parties and party research contains contributions from many of the foremost party scholars and is a must for all library shelves Richard Luther Keele University The study of political parties has never been livelier and this genuinely international Handbook theoretically rich comparatively informed and focused on important questions defines the field This volume is both an indispensable summary of what we know and the starting point for future research R K Carty University of British Columbia Political parties are ubiquitous but their forms and functions vary greatly from regime to regime from continent to continent and from era to era The Handbook of Party Politics captures this variation and richness in impressive ways The editors have assembled an excellent team and the scope of the volume is vast and intriguing Kaare Strom University of California San Diego Political parties are indispensable to democracy and a central subject of research and study in political science around the world This major new handbook is the first to comprehensively map the state of the art in contemporary party politics scholarship The Handbook is designed to provide an invaluable survey of the major theories and approaches in this dynamic area of study and research give students and researchers a concise road map to the core literatures in all the sub fields of party related theorizing and research identify the theories approaches and topics that define the current cutting edge of the field The Handbook is comparative in overall approach but also addresses some topics to be addressed in nationally or regionally specific ways The resulting collaboration has brought together the world s leading party theorists to provide an unrivalled resource on the role of parties in the pressing contemporary problems of institutional design and democratic governance today *Party Government* Elmer Eric Schattschneider, 1958 *From Party Politics to Personalized Politics?* Gidon Rahat, Ofer Kenig, 2018 This volume examines two major developments in contemporary democratic politics the change in party society linkage and political personalization and their relation to each other **The Dynamics of Two-Party Politics** Alan Ware, 2009-06-11 This book examines the role played by the parties themselves in two party systems It rejects the argument that the behaviour of the parties is determined largely by social forces or by the supposed logic of the electoral market Instead it shows that both structure and agency can matter It focuses on three major aspects of change in two party systems i why occasionally major parties such as the British Liberals collapse ii why collapsed parties sometimes survive as minor parties and sometimes do not and iii what determines why and how major parties will ally themselves with minor parties in order to maximize their chances of winning With respect to the first aspect it is argued that major parties are advantaged by two factors the resources they have accumulated already and their occupying role similar to that called by

Thomas Schelling a focal arbiter Consequently party collapse is rare When it has occurred in nation states it is the result of a major party having to fight opposition on two separate fronts The survival of a collapsed party depends largely on its internal structure when a party has linked closely the ambitions of politicians at different levels of office party elimination is more likely The main arena in which agency is significant that is when leadership is possible including the politician acting as heresthetician is in the re building of coalitions This is necessary for maximizing the chances of a party winning but for various reasons coalitions between major and minor parties are usually difficult to construct Comparative Politics is a series for scholars and students of political science that deals with contemporary issues in comparative government and politics The General Editor is David M Farrell Jean Monnet Chair in European Politics and Head of School of Social Sciences University of Manchester The series is published in association with the European Consortium for Political Research
