Promoting Academic Success For E S C Students Understanding Second Language Acquisition For Schools:

Language Education in the School Curriculum Ken Cruickshank, Stephen Black, Honglin Chen, Linda Tsung, Jan Wright, 2020-05-14 There is widespread concern in all English speaking countries at the rapid decline in study of languages. The promise of languages for all in the UK and North America in the 1970s marked a shift from languages as 'lite' subjects for the privileged few but this promise has not been fulfilled. This book explores the reasons for and solutions to this decline. More importantly it looks at how these trends have been reversed in successful school programs and the implications of this for language education policy makers. The study draws on an analysis of data from 600 primary, secondary and community languages schools over six years and from detailed case studies in a representative sample of 45 successful schools. The book proposes a range of strategies to address the decline from engaging classroom learning, assessment outcomes and embedding languages as central in school curriculum on the one level to a mix of incentives and mandation for language study especially at upper secondary school level. The authors explore the impact of learning languages on the thinking, educational experiences and outcomes of young people across a range of ethnic backgrounds and socioeconomic statuses. They show the importance of having equal access to languages study in a world where young people will have increasingly more diverse working lives and argue that the gap in languages between policy and uptake is really a gap in the thinking of policy makers and government.

Critical Perspectives on Language Education Katie Dunworth, Grace Zhang, 2014-07-24 The studies in this volume investigate how multilingual education involves a critical engagement with questions of identity and culture and a movement towards new ways of being and belonging. It addresses previously under-explored issues in particular the integration of theories like 'thirdness' and practices of language education and maintenance with relevance to the Asia Pacific region. The analyses reveal the delicate balance of interests of all stakeholders and offer detailed insights into the reality of multilingual education with specific examples of Chinese, English, Japanese and Tamil. In a globalised world effective language education has become increasingly important and the studies presented here have the potential to inform and advance evidence based multilingual education through adding important dimensions of theoretical exploration and refreshing empirical resources.

A Holistic Home-School-Community Model for Learning Chinese Language Tse Shek Kam, Laing Victor, 2021-09-28 This book contains the compilation of studies from a 5 year project aimed at improving the Chinese teaching and learning as a second language for non-Chinese speaking preschoolers in Hong Kong. In this project a home school community model was used in an attempt to address the teaching and learning of Chinese for non-Chinese speaking preschoolers moving from a traditional school centred teaching approach to a holistic approach. This allows them to learn in the same space and environment on the same topics creating an inclusive classroom that does not compromise the teaching and learning of Chinese for both local and non-Chinese speaking preschoolers. Issues such as medium of instruction
