author uses letters journals and travel accounts to show the early attitudes toward the uses of indigenous birds and mammals of Texas Surviving on nature's bounty and remorselessly exterminating her threats wolves cougars and other wily critters settlers exploited Texas pristine fecundity Some species benefited from disturbed environments others were unable to adjust to human presence and disappeared By the 1880s concern about the diminishing numbers of many preferred species led to enactment of game laws and other efforts to protect and manage wildlife Today the author argues habitat change is the most pressing issue confronting conservationists **Soldier Silhouettes on Our Front** William Le Roy Stidger, 1918

Wildlife Films Derek Bousé, 2011-11-29 If as many argue movies and television have become Western culture's premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a form of entertainment following the established codes and conventions of narrative exposition The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions audience expectations and the demands of competition in the media marketplace **Wildlife Films** traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society Derek Bous contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values our moral vision our models of society and family structure derive from nature rather than being cultural formations Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aquinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also

raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act **The PTA Magazine** ,1914 *Animals and the Shaping of Modern Medicine* Abigail Woods,Michael Bresalier,Angela Cassidy,Rachel Mason Dentinger,2017-12-29 This book is open access under a CC BY 4.0 license This book breaks new ground by situating animals and their diseases at the very heart of modern medicine In demonstrating their historical significance as subjects and shapers of medicine it offers important insights into past animal lives and reveals that what we think of as human medicine was in fact deeply zoological Each chapter analyses an important episode in which animals changed and were changed by medicine Ranging across the animal inhabitants of Britain's zoos sick sheep on Scottish farms unproductive livestock in developing countries and the tapeworms of California and Beirut they illuminate the multi species dimensions of modern medicine and its rich historical connections with biology zoology agriculture and veterinary medicine The modern movement for One Health whose history is also analyzed is therefore revealed as just the latest attempt to improve health by working across species and disciplines This book will appeal to historians of animals science and medicine to those involved in the promotion and practice of One Health today *Normal Instructor and Primary Plans* ,1926 Normal Instructor and Teachers World ,1928
