indispensable reference book for anyone intrigued by the subject The House of Fragile Things James McAuley, 2021-03-01

A powerful history of Jewish art collectors in France and how an embrace of art and beauty was met with hatred and destruction. In the dramatic years between 1870 and the end of World War II a number of prominent French Jews, pillars of an embattled community, invested their fortunes in France's cultural artifacts, sacrificed their sons to the country's army, and were ultimately rewarded by seeing their collections plundered and their families deported to Nazi concentration camps. In this rich, evocative account, James McAuley explores the central role that art and material culture played in the assimilation and identity of French Jews in the fin de siècle. Weaving together narratives of various figures, some familiar from the works of Marcel Proust and the diaries of Jules and Edmond Goncourt, the Camondos, the Rothschilds, the Ephrussis, the Cahens d'Anvers, McAuley shows how Jewish art collectors contended with a powerful strain of anti-Semitism; they were often accused of invading France's cultural patrimony. The collections these families left behind, many ultimately donated to the French state, were their response to tragic attempts to celebrate a nation that later betrayed them. White Dwarfs W.J. Luyten, 2012-12-06

When the Executive Committee of the International Astronomical Union asked me in 1968 to organize a Symposium on White Dwarfs, it became evident that members of at least four Commissions of the IAU should participate and that the most opportune place and time to hold such a Symposium would be somewhere in the British Isles and just preceding the Fourteenth General Assembly at Brighton in August 1970. After a preliminary correspondence with Dr D W N Stibbs, it was decided to accept his invitation to hold the Symposium at St Andrews University, Scotland, while the dates 11-13 August 1970 were selected. I am sure I speak for all the participants of the Symposium when I express our deep gratitude to Dr Stibbs for the admirable way in which he planned and organized this meeting down to the smallest details. The success of the conference is due in no small measure to his continuous and painstaking efforts. An organizing committee was formed consisting of O J Eggen (Photometry), J L Greenstein (Spectroscopy), A G Masevitch (Stellar Interiors), V Weidemann (Stellar Atmospheres), D W N Stibbs (local chairman with myself), Proper Motions and Parallaxes as overall chairman.
