Reflection High-Energy Electron Diffraction Ayahiko Ichimiya, Philip I. Cohen, 2004-12-13 Publisher Description

Applied RHEED Wolfgang Braun, 1999-04-16 The book describes RHEED reflection high energy electron diffraction used as a tool for crystal growth New methods using RHEED to characterize surfaces and interfaces during crystal growth by MBE molecular beam epitaxy are presented Special emphasis is put on RHEED intensity oscillations segregation phenomena electron energy loss spectroscopy and RHEED with rotating substrates

Reflection High-Energy Electron Diffraction and Reflection Electron Imaging of Surfaces P.K. Larsen, P.J. Dobson, 2012-12-06 This volume contains the papers presented at the NATO Advanced Research Workshop in Reflection High Energy Electron Diffraction and Reflection Electron Imaging of Surfaces held at the Koningshof conference center Veldhoven the Netherlands June 15 19 1987 The main topics of the workshop Reflection High Energy Electron Diffraction RHEED and Reflection Electron Microscopy REM have a common basis in the diffraction processes which high energy electrons undergo when they interact with solid surfaces at grazing angles However while REM is a new technique developed on the basis of recent advances in transmission electron microscopy RHEED is an old method in surface crystallography going back to the discovery of electron diffraction in 1927 by Davisson and Germer Until the development of ultra high vacuum techniques in the 1960 s made instruments using slow electrons more accessible RHEED was the dominating electron diffraction technique Since then and until recently the method of Low Energy Electron Diffraction LEED largely surpassed RHEED in popularity in surface studies The two methods are closely related of course each with its own specific advantages The grazing angle geometry of RHEED has now become a very useful feature because this makes it ideally suited for combination with the thin growth technique of Molecular Beam Epitaxy MBE This combination allows in situ studies of freshly grown and even growing surfaces opening up new areas of research of both fundamental and technological importance

Theory of Rheed (Reflection High Energy Electron Diffraction). N. Masud, 1976 *Reflection High Energy Electron Diffraction Studies of Interface Formation* Paul Pukite, 1988 **Applied Rheed** Wolfgang Braun, 2014-01-15 *The Study of Surfaces by Dynamical Reflection High-energy Electron Diffraction* Tiecheng Zhao, 1990 *High Energy Electron Diffraction and Microscopy* L. M. Peng, S. L. Dudarev, M. J. Whelan, 2004-01-08 This book provides the reader with a comprehensive introduction to high energy electron diffraction and elastic and inelastic scattering of high energy electrons with particular emphasis on applications to modern electron microscopy Starting from a survey of fundamental phenomena the authors introduce the most important concepts underlying modern understanding of high energy electron diffraction Dynamical diffraction in transmission THEED and reflection RHEED geometries is treated using a general matrix theory where computer programs and worked examples are provided to illustrate the concepts and to familiarize the reader with practical applications Diffuse and inelastic scattering and coherence effects are treated comprehensively both as a perturbation of elastic scattering and within the general multiple scattering

quantum mechanical framework of the density matrix method Among the highlights are the treatment of resonance diffraction of electrons HOLZ diffraction the formation of Kikuchi bands and lines and ring patterns and application of diffraction to monitoring of growing surfaces Useful practical data are summarised in tables including those of electron scattering factors for all the neutral atoms and many ions and the temperature dependent Debye Waller factors given for over 100 elemental crystals and compounds

Elsayed, ROCHESTER UNIV N Y LAB FOR LASER ENERGETICS., 1989 The objective of this program was to develop an instrument for characterization of nanosecond and picosecond time evolution of surface properties This instrument was developed based on the technique of picosecond time resolved reflection high energy electron diffraction RHEED The basic idea of this technique is the utilization of 150 ps laser pulses to generate electron pulses by the photoelectric effect The photogenerated electrons are accelerated focused and collimated using electron optics Only a very small fraction of the laser pulse energy is needed to generate the fast 10 30 kV well collimated electron pulses thus most of the laser energy is available for sample irradiation eg Auger Electron Spectroscopy Donald T. Hawkins, 2012-12-06 Auger electron spectroscopy is rapidly developing into the single most powerful analytical technique in basic and applied science for investigating the chemical and structural properties of solids Its explosive growth beginning in 1967 was triggered by the development of Auger analyzers capable of detecting one atom layer of material in a fraction of a second Continued growth was guaranteed firstly by the commercial availability of apparatus which combined the capabilities of scanning electron microscopy and ion mill depth profiling with Auger analysis and secondly by the increasing need to know the atomistics of many processes in fundamental research and engineering applications The expanding use of Auger analysis was accompanied by an increase in the number of publications dealing with it Because of the developing nature of Auger spectroscopy the articles have appeared in many different sources covering diverse disciplines so that it is extremely difficult to discover just what has or

has not been subjected to Auger analysis In this situation a comprehensive bibliography is obviously useful to those both inside and outside the field For those in the field this bibliography should be a wonderful time saver for locating certain references in researching a particular topic or when considering various aspects of instrumentation or data analysis This bibliography not only provides the most complete listing of references pertinent to surface Auger analysis available today but it is also a basis for extrapolating from past trends to future expectations
