Regionalism In Trade Policy: Essays On Preferential Trading Arvind Panagariya, 1999-10-18 The signing of the North American Free Trade Agreement NAFTA and recent expansions of the European Union have led to renewed efforts to create preferential trade areas PTAs around the world including Asia Africa and Latin America Because PTAs liberalize trade with union members but not the rest of the world they are not necessarily a healthy development By dividing the world into trade blocs they also threaten to undermine the multilateral trading system This collection of recently published essays by a leading critic of regionalism offers an assessment of the economic impact of PTAs on member countries and the world The first set of essays present a theoretical analysis of the issues using simple economic models and study the relationship between regionalism and multilateralism Subsequent essays evaluate the role of PTAs in Asia North America and Latin America The general theme of the book is that on balance trade liberalization through PTAs is a mistake Trade diversion and the creation of complicated and discriminatory tariff regimes with increased tariffs for non member countries the consequences of PTAs are likely to undermine the multilateral trading system The book will be useful to academics as well as policy makers and policy analysts Many of the essays have been featured in newspapers and journals such as the Financial Times Economist Journal of Commerce and International Herald Tribune Some of these essays are already on many reading lists in the United States

the location of economic activity in an integrated Europe Bernard Hoekman Director The World Bank US The open multilateral trading system is a tremendous success of the past half century and has contributed greatly to the world's unprecedented rate of economic growth Over the past two decades however preferential trading arrangements have proliferated raising questions as to how compatible they are with the open multilateral system and what policies might be adopted to improve outcomes The essays in this volume detail the emergence of PTAs and provide comprehensive and up to date analyses of the state of play of preferential arrangements in all regions of the world The volume will provide a useful reference for all those wanting to understand existing preferential arrangements and their role in the international economy today Anne O Krueger Johns Hopkins University and Stanford University US Economic integration is a complex and multifaceted giant with a myriad aspects ranging from regional and global concentration and dispersal of economic activity to social and political consequences for individuals and communities in developed and developing countries alike This landmark three volume collection of chapters by leading authors drawn from many fields is a worthy and timely contribution to the analysis of a phenomenon with profound implications for the future world economy and its governance James Zhan Director Investment Enterprise Division UNCTAD With this Handbook Miroslav Jovanovi has provided readers with both an excellent stand alone original reference book as well as the first volume in a comprehensive three volume set This introduction into a rich and expanding academic and practical world of international economic integration also provides a theoretical and analytical framework to the reader presenting select analytical studies and encouraging further research International Handbook on the Economics of Integration Volume I covers two broad themes general integration issues and regional integration groups The first part discusses topics that range from an overview of the regional integration deals registered with the World Trade Organization to multilateralism and regionalism hub and spoke integration networks limits to integration rules of origin and globalization The second part of the Handbook
