The evolution and importance of theory in leisure research have been recognized as essential to broaden understandings of leisure. The purpose of this reflective piece is to describe and critique the contributions that theory has made by examining the research documented in American leisure and recreation research journals during the 1990s and projecting those contributions toward the future. From our perspective as individuals associated with Leisure Sciences during the past two years, we provide a review of literature regarding the meanings of theory, note summaries of other studies in our field that have empirically examined theory, compare leisure research from the 1980s to the 1990s, and offer suggestions regarding trends in the future theoretical development of the parks, recreation, leisure, sport, and tourism fields. We also advocate "post approaches" such as postmodernism that may be essential in the next stage of theory evolution.

In a research class taught at the University of North Carolina at Chapel Hill, we emphasize the value and importance of theory as the foundation for research done in our field. Our students usually have great ideas for problem-based research that they want to undertake, but sometimes they struggle with what theory or conceptual foundations to use when addressing their research questions. One frustrated student joked one day, "Isn't there a website I can go to like INeedATheory.com?" The frustrated question was not new to us but underlined the need to reflect again what theory is, why it is important, and how it can be used in leisure research.

Ellis (1993) called parks, recreation, and therapeutic recreation research a developing social science. Three approaches to studying social behavior (Hollander, 1976) in the contemporary period also seem to have paralleled leisure sciences research in the past 40 years. Leisure research evolved from the early works of people like Brightbill (1960), Nash (1969), and Parker (1971), who explained the meanings of leisure through social philosophy, which

Reflections On Leisure Play And Recreation:

Reflections on Leisure, Play, and Recreation David L. Jewell, 1997 In this rich and unique reference David L Jewell compiles the first anthology of reflections on leisure play and recreation Disproportionately high budget cuts in parks and recreation services demonstrate too clearly society's view of leisure activities as frivolous and expendable By selecting these voices of reason and making them available in a single volume Jewell hopes to emphasize the frailties of a capitalistic society's demeaning perception of anything other than work In this collection of wise words he provides ammunition for those charged with selling leisure play and recreation to the public and to political leaders **Reclaiming Leisure** H.

Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the body of literature on service learning in a unique and practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices
