Refugees and Mental Health Civis Trust, 2004 Refugee Health Care Aniyizhai Annamalai, 2020-10-01 Refugee health is growing as an academic medical discipline More and more health care providers are coming together to exchange research information educational curricula and social policies related to refugee health The number of practitioners attending the

annual North American Refugee Healthcare Conference has doubled since 2014 Refugees arrive in the United States from different parts of the world Refugees undergo a medical screening soon after arrival as recommended by the U S Department of State and it is usually primary care practitioners who usually evaluate these patients at this first visit Psychiatrists and other specialists may also evaluate them soon after arrival Though physicians receive a variable amount of training in cross cultural medicine virtually none is in the area of refugee evaluations There are several major ways that the field has changed U S refugee policies and refugee admission numbers have changed dramatically in the past four years as has the epidemiology of medical conditions because the demographics of refugees have changed The CDC guidelines for domestic screening have also been modified significantly as some of the screening tests are no longer recommended Protocols have also been updated for presumptive treatment received by refugees before departure to the United States of other countries A new chapter on end of life care for refugees has been added to the book Now fully revised and expanded this second edition reflects the many changes that have occurred in the field of refugee health since 2014 Refugee Health Care remains the definitive resource for primary care physicians and mental health practitioners who see and evaluate refugees It is also relevant for medical nursing and public health students involved with refugee health as well as resettlement agency workers and public health officials overseeing refugee care

Refugee Resettlement Program United States. Office of Refugee Resettlement,1994

The Health of Refugees Pascale Allotey,Daniel Reidpath,2019-01-03 At the moment over 65 million people are forcibly displaced from their homes The reasons for movement range from extreme weather conditions and environmental disasters to war civil and political crises to the need for basic economic survival Amongst these 65 million people are those that have been forced to leave a country that is no longer willing or able to offer protection and those who are displaced within their own country s borders In order to improve conditions for displaced people all over the globe we need to look at the reason behind their move as this defines their migration status under international law In its turn the migration status affects the requirements of other countries to grant asylum and the individual s right to protection and support The definition of migration status and its implications has created tension in the public debate on refugees for decades and is today more relevant than ever In *The Health of Refugees Public Health Perspectives from Crisis to Settlement* the challenges and vulnerabilities created from this debate are addressed by public health policy makers clinical practitioners and researchers An analysis of public health international law the history of migration and the media s role in refugee health it is a comprehensive and critical work with a strong message in favour of international and interdisciplinary cooperation With a focus on what international obligations entail when it comes to refugees and migrants the authors present a reinforced take on our collective responsibility to leave no one behind *The Health of Refugees Public Health Perspectives from Crisis to Settlement* traces the health repercussions on individuals and populations from the moment of forced mass movement due to conflict and other disasters through to the process of resettlement in other countries These issues are

addressed within the context of other global public health priorities and are part of the book's critical analysis not only of the particular vulnerabilities created by mobility but also how these interact and intersect with existing considerations across gender and age in health systems and international law. With a wider geographical area and case studies from all over the globe as a basis for the studies presented, this is a fully updated edition with new material discussing the current political landscape. A truly multidisciplinary book, *The Health of Refugees* is ideal for public health practitioners, researchers and postgraduate students. It is also an important work for those involved in non-governmental organisations, international aid and international development. Furthermore, it provides a critical background for clinicians, mental health workers and policymakers from health, welfare and migration.

Concise and comprehensive, the book provides the reader with both evidence-based clinical knowledge as well as the organizational structure of community health services. Chapters range from common adult and paediatric health problems to more specific targeted advice for service users with extra needs and people with long-term conditions. The handbook includes information on how health and social care services are organised and funded, from common technical care procedures to complex situations alongside detailed aspects of health promotion in adults, children and adolescents. With new topics on consultation frameworks and models supporting young people in their transition to the adult services and female genital mutilation, all clinical guidelines, epidemiology and statistics have been revised to reflect developments since the previous edition. Providing an accessible and instant resource for everyday nursing and a benchmark of good practice, the *Oxford Handbook of Primary Care and Community Nursing* is a unique and invaluable companion for all health care professionals working in the primary care and community setting.
