Religion in the Contemporary World Alan Aldridge, 2013-04-03 In the new edition of this widely praised text Alan Aldridge examines the complex realities of religious belief practice and institutions Religion is a powerful and controversial force in the contemporary world even in supposedly secular societies Almost all societies seek to cultivate religions and faith communities as sources of social stability and engines of social progress They also try to combat real and imagined abuses and excess regulating cults that brainwash vulnerable people containing fundamentalism that threatens democracy and the progress of science and identifying terrorists who threaten atrocities in the name of religion The third edition has been carefully revised to make sure it is fully up to date with recent developments and debates Major themes in the revised edition include the recently erupted culture war between progressive secularists and conservative believers the diverse manifestations of fundamentalism and their impact on the wider society new individual forms of religious expression in opposition to traditional structures of authority and the backlash against multiculturalism with its controversial implications for the social integration of ethnic and religious minority communities Impressive in its scholarly analysis of a vibrant and challenging aspect of human societies the third edition will appeal strongly to students taking courses in the sociology of religion and religious studies as well as to everyone interested in the place of religion in the contemporary world

Edward Ian Bailey,1990 **Religious Pluralism** Giuseppe Giordan,Enzo Pace,2014-07-08 This volume illustrates both theoretically and empirically the differences between religious diversity and religious pluralism It highlights how the factual situation of cultural and religious diversity may lead to individual social and political choices of organized and recognized pluralism In the process both individual and collective identities are redefined incessantly moving along the continuum that ranges from exclusion to inclusion The book starts by first detailing general issues related to religious pluralism It makes the case for keeping the empirical the normative the regulatory and the interactive dimensions of religious pluralism analytically distinct while recognizing that in practice they often overlap It also underlines the importance of seeking connections between religious pluralism and other pluralisms Next the book explores how religious diversity can operate to contribute to legal pluralism and examines the different types of church state relations eradication monopoly oligopoly and pluralism The second half of the book features case studies that provide a more specific look at the general issues from ways to map and assess the religious diversity of a whole country to a comparison between Belgian French views of religious and philosophical diversity from religious pluralism in Italy to the shifting approach to ethnic and religious diversity in America and from a sociological and historical perspective of religious plurality in Japan to an exploration of Brazilian religions old and new The transition from religious diversity to religious pluralism is one of the most important challenges that will reshape the role of religion in contemporary society This book provides readers with insights that will help them better understand and interpret this unprecedented transition Religion and Civil Society David Herbert,2017-03-02 This book presents the first full length study of the relationship between religion and the controversial concept of civil society Across the world in the last two decades of the twentieth century religions re entered public space as influential discursive and symbolic systems apparently beyond the control of either traditional religious authorising institutions or states This differentiation of religion from traditional institutions and entry into secular public spheres carries both dangers and possible benefits for democracy Offering a fresh interdisciplinary approach to understanding religion in contemporary societies this book provides an invaluable resource for students and researchers in religious studies sociology politics and political philosophy theology international relations and legal studies Part one presents a critical introduction to the interaction between religion modernization and postmodernization in Western and non Western settings America Europe the Middle East and India focussing on discourses of human rights civil society and the public sphere and the controversial question of their cross cultural application Part two examines religion and civil society through case studies of Egypt Bosnia and Muslim minorities in Britain and compares Poland as an example of a Christian majority society that has experienced the public reassertion of religion **Religion in Contemporary Society** H.
