Religion and Radical Empiricism Nancy K. Frankenberry, 1987-07-01 Rarely in modern times has religion been associated with empiricism except to its own peril This book represents a comprehensive and systematic effort to retrieve and develop the tradition of American religious empiricism for religious inquiry Religion and Radical Empiricism offers a challenging account of how and why reflection on religious truth claims must seek justification of those claims finally in terms of empirical criteria Ranging through many of the major questions in philosophy of religion the author weaves together a study of the varieties of empiricism in all its historical forms from Hume to Quine She finds in James and Dewey in Wieman Meland and Loomer of the Chicago School in Whitehead and in Abhidharma Buddhism constructive elements of a radically empirical approach to the controversial topic of religious experience This work provides a strong counter argument to critics of revisionary theism to caricatures of philosophy as conversation and to any collapse of the category of experience into its linguistic forms

Defining Religion Robert Cummings Neville, 2018-01-17 In this collection of essays written over the past decade Robert Cummings Neville addresses contemporary debates about the concept of religion and the importance of the comparative method in theology while advancing and defending his own original definition of religion Neville s hypothesis is that religion is a cognitive existential and practical engagement of ultimate realities five ultimate conditions of existence that need to be engaged by human beings The essays which range from formal articles to invited lectures develop this hypothesis and explore its ramifications in religious experience philosophical theology religious studies and the works of important thinkers in philosophy of religion Defining Religion is an excellent introduction to Neville s work especially to the systematic philosophical theology presented in his magisterial three volume set *Philosophical Theology William James and the Metaphysics of Experience* David C. Lamberth, 1999-05-20 William James is frequently considered one of America s most important philosophers as well as a foundational thinker for the study of religion Despite his reputation as the founder of pragmatism he is rarely considered a serious philosopher or religious thinker In this new interpretation David Lamberth

argues that James's major contribution was to develop a systematic metaphysics of experience integrally related to his developing pluralistic and social religious ideas. Lamberth systematically interprets James's radically empiricist world view and argues for an early dating 1895 for his commitment to the metaphysics of radical empiricism. He offers a close reading of *Varieties of Religious Experience* and concludes by connecting James's ideas about experience pluralism and truth to current debates in philosophy, the philosophy of religion and theology, suggesting James's functional experiential metaphysics as a conceptual aid in bridging the social and interpretive with the immediate and concrete while avoiding naive realism.

Historicism Sheila Greeve Davaney, No other movement or insight has challenged Christian theology so steeply in the modern period as historicism. The two hundred year old notion that concepts, ideas and theories all are influenced or occasioned by historical circumstances is today a commonplace in all fields. Davaney's authoritative text traces with clarity and skill the history of historicism and its various meanings for the German Enlightenment through its Continental and distinctly American developments to its contemporary postmodern incarnations. **BOOK JACKET**

Hidden Circles in the Web Constance Wise, 2008-05-16 As one of the fastest growing Pagan traditions, Feminist Wicca appeals to many through its emphasis on the deep interconnectedness of life and its focus on the woman's religious experience. In *Hidden Circles in the Web*, scholar and practitioner Constance Wise explores Feminist Wicca through the lens of process thought, developing a new thealogy of feminist spirituality that can enrich and deepen the religious practice. Although the twentieth century philosophy of process thought is often portrayed as a complex and inaccessible system, Wise explains its concepts in simple language and illustrates her points with accessible examples from life. Wise invites readers into the hidden wisdom of Feminist Wicca and process thought, proposing statements of Feminist Wiccan beliefs and practices in six areas: history, anthropology, epistemology, ethics, cosmology and thealogy. While the focus of the book is on Feminist Wicca, her insights into process thought apply to an array of traditions and will interest a range of practitioners and scholars across the religious spectrum.

American Religious Empiricism William Dean, 1986-07-15 In nineteenth century France, parents abandoned their children in overwhelming numbers: up to 20 percent of live births in the Parisian area. The infants were left at state-run homes and were then transferred to rural wet nurses and foster parents. Their chances of survival were slim, but with alterations in state policy, economic and medical development and changing attitudes toward children and the family, their chances had significantly improved by the end of the century. Rachel Fuchs has drawn on newly discovered archival sources and previously untapped documents of the Paris foundling home in order to depict the actual conditions of abandoned children and to reveal the bureaucratic and political response. This study traces the evolution of French social policy from early attempts to limit welfare to later efforts to increase social programs and influence family life. *Abandoned Children* illuminates in detail the family life of nineteenth century French poor. It shows how French social policy with respect to abandoned children sought to create an economically useful and politically neutral underclass out of a segment of the

population that might otherwise have been an economic drain and a potential political threat **Constructing a Relational Cosmology** Paul O. Ingram, 2006-08-01 This collection of five essays is both a dialogical engagement with and critical assessment of Nancy R Howell's book *Constructing a Relational Cosmology* The collection includes three essays written from a Whiteheadian process perspective by Marit A Trelstad, Kathlyn A Breazeale and Marjorie Hewitt Suchocki one from the perspective of narrative theology Lisa Stenmark and one from the Soto Zen Buddhist perspective Stephanie Kaza Howell responding as a Whiteheadian feminist philosopher of religion takes the critiques and suggestions of her dialogical partners with the utmost seriousness as her foundation for suggesting new directions for ecofeminist thought an example of what Whiteheadians call the process of creative transformation **Journal of the History of Philosophy**, 1988 **Dictionary Catalog of Official Publications of the State of New York**, 1986
