Religion As Critique:

Critique of Hinduism and Other Religions Lakshmaṇaśāstrī Jośī, 1996 The Critique of Religion and Religion's Critique, 2020-04-14 In The Critique of Religion and Religion's Critique On Dialectical Religiology Dustin J Byrd compiles numerous essays honouring the life and work of the Critical Theorist Rudolf J Siebert His dialectical religiology rooted in the critical theory of the Frankfurt School especially Theodor Adorno Max Horkheimer Walter Benjamin Herbert Marcuse Erich Fromm Leo L wenthal and Jürgen Habermas is both a theory and method of understanding religion's critique of modernity and modernity's critique of religion Born out of the Enlightenment and its most important thinkers i.e Kant Hegel Marx Nietzsche and Freud religion is understood to be dialectical in nature It contains within it both revolutionary and emancipatory elements but also reactionary and regressive elements which perpetuate mankind's continual debasement enslavement and oppression Thus religion by nature is conflicted within itself and thus stands against itself Dialectical Religiology attempts to rescue those elements of religion from the dustbin of history and reintroduce them into society via their determinate negation As such it attempts to resolve the social political theological and philosophical antagonisms that plague the modern world in hopes of producing a more peaceful justice filled equal and reconciled society The contributors to this book recognize the tremendous contributions of Dr Rudolf J Siebert in the fields of philosophy sociology history and theology and have profited from his long career This book attempts to honour that life and work Contributors include Edmund Arens Gregory Baum Francis Brassard Dustin J Byrd Denis R Janz Gottfried K enzlen Mislav Kuko Michael R Ott Rudolf J Siebert Hans K Weitensteiner and Brian C Wilson **Religion, Theory, Critique** Richard King, 2017-07-18 Religion Theory Critique is an essential tool for learning about theory and method in the study of religion Leading experts engage with contemporary and classical theories as well as non Western cultural contexts Unlike other collections this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion secular and culture are imagined within different disciplinary horizons This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories Contributors write on the influence of the natural sciences in the study of religion the role of European Christianity in modeling theories of religion religious experience and the interface with cognitive science the structure and function of religious language the social scientific study of religion ritual in religion the phenomenology of religion critical theory and religion embodiment and religion the impact of colonialism and modernity theorizing religion in terms of race and ethnicity links among religion nationalism and globalization the interplay of gender sex and religion and religion and the environment Each chapter introduces the topic identifies key theorists and issues and respects the pluralistic nature of the scholarship in the field Altogether this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis *Choice and Religion* Steve Bruce, 1999 The orthodox

view is that the democracies of the western world have become increasingly secular over the twentieth century Fewer and fewer people have chosen to believe and the church has declined markedly as religion has changed from being part of an identity ascribed at birth to being a matter of personal choice Choice and Religion provides a detailed critique of the rational choice approach to religion to demonstrate that industrialisation has secularised the western world and that diversity far from making religion more popular by allowing individuals to maximize their returns undermines it The claim that diversity and competition promote religion is refuted with evidence from a wide variety of western societies Bruce examine the Nordic countries and the ex communist states of eastern Europe to explore the consequences of different sorts of state regulation and to show that ethnicity is a more powerful determinate of religious change than market structures Where religion matters it is not because individuals are maximising their returns it is because it defines group identity and is heavily implicated in social conflict

Is Critique Secular? Talal Asad,2009-11 In this volume four leading thinkers of our times confront the paradoxes and dilemmas attending the supposed stand off between Islam and liberal democratic values Taking the controversial Danish cartoons of Mohammad as a point of departure Talal Asad Wendy Brown Judith Butler and Saba Mahmood inquire into the evaluative frameworks at stake in understanding the conflicts between blasphemy and free speech between religious taboos and freedoms of thought and expression and between secular and religious world views Is the language of the law an adequate mechanism for the adjudication of such conflicts What other modes of discourse are available for the navigation of such differences in multicultural and multi religious societies What is the role of critique in such an enterprise These are among the pressing questions this volume addresses

Critique of Religion and Philosophy Walter Arnold Kaufmann,1958 **Analytic Theology and the Academic Study of Religion** William Wood,2021-01-28 Analytic theology can flourish in the secular academy and flourish as authentically Christian theology Analytic Theology and the Academic Study of Religion explains analytic theology to other theologians and scholars of religion while simultaneously explaining those other fields to analytic theologians William Wood defends analytic theology from some common criticisms but also argues that analytic theologians have much to learn from other forms of inquiry Analytic theology is a legitimate form of theology and a legitimate form of academic inquiry and it can be a valuable conversation partner within the wider religious studies academy Analytic Theology and the Academic Study of Religion articulates an attractive vision of analytic theology fosters a more fruitful inter disciplinary conversation and enables scholars across the religious studies academy to understand one another better

God Against Religion Matthew Myer Boulton,2008-01-29 This volume outlines a Christian theology that takes worship as its basic framework as the occasion of not only an approach toward God in piety but also separation from God in sin Drawing on Luther Calvin and especially Karl Barth Matthew Myer Boulton builds a Reformed liturgical theology maintaining that the God of Jesus Christ is a God against religion one who saves human beings from religion by entering it transforming it and ultimately ending it

A Constructive Critique of

Religion Mia Lövheim, Mikael Stenmark, 2020-02-06 Why do some strategies for critique of religion seem to be more beneficial for constructive engagement whereas others increase intolerance polarization and conflict Through an analysis of the reasons underpinning a critique of religion in institutional contexts of secular democratic societies *A Constructive Critique of Religion* explores how constructive interaction and critique can be developed across diverse interests It shows how social and cultural conditions shaping these institutions enable and structure a critical and constructive engagement across diverging worldviews A key argument running through the book is that to develop constructive forms of critique a more thorough and systematic investigation of resources for criticism located within religious worldviews themselves is needed Chapters also address how critique of Islam and Christianity in particular is expressed in areas such as academia the law politics media education and parenting with a focus on Northern Europe and North America The interdisciplinary approach which combines theoretical perspectives with empirical case studies contributes to advancing studies of the complex and contentious character of religion in contemporary society
