Religion In All Dimensions

Robert Cummings Neville

Religion In All Dimensions:

Religion in All Dimensions Erika Wilson,1998-08 *An Introduction to the Sociology of Religion* Professor Pål Repstad, Assoc Prof Inger Furseth,2013-05-28 An Introduction to the Sociology of Religion provides an overview of sociological theories of contemporary religious life Some chapters are organized according to topic Others offer brief presentations of classical and contemporary sociologists from Karl Marx to Zygmunt Bauman and their perspectives on social life including religion Throughout the book illustrations and examples are taken from several religious traditions *Religion and Modernity* Detlef Pollack,Gergely Rosta,2017-12-08 This is not a book that provides a new integrated theory of religious change in modern societies but rather one that develops theoretical elements that contribute to the understanding of some contemporary religious developments Most of the approaches in sociology of religion are prone to emphasise either processes of religious decline or of religious upswing For example secularization theory usually includes a couple of relevant factors such as functional differentiation economic affluence or social equality in order to account for religious change However the result of such a theory's empirical analyses seems to be certain in advance namely that the social relevance of religion is decreasing In contrast the religious market model devised by sociologists of religion in the US is inclined to detect everywhere processes of religious upsurge *Religion and Modernity An International Comparison* avoids a purely theoretically based perspective on religious changes For this reason Detlef Pollack and Gergely Rosta do not begin with theoretical propositions but with questions The authors raise the question of how the social significance of religion in its various facets has changed in modern societies and explain what factors and conditions have contributed to these changes **Nature and Technology in the World Religions** P. Koslowski,2013-06-29 Technology and the control of nature have arisen from the endeavor to reduce the neediness of human life Since this reduction is also the goal of religions there is a necessary proximity between religion and technology The relationship of humans to nature and technology is an object of religious doctrine and ethics in all of the world's religions The interpretations and the norms of the treatment of nature in economy and technology but also the veneration of nature in nature mysticism and its elevation in cult and sacrament are forms of expression of the relationship to nature in religions The development of the modern control of nature through technology appears to be connected to the biblical commission to rule over nature Buddhism and Hinduism however also interpret technology and human control of nature Technological power raises the question of how the normativeness of the created order intended by religion's concept of creation relates to the human freedom to reshape creation What answers do religions give to the question of the humane form of technology and the limits to technological power and human control of nature Leading scholars of Judaism Christianity Islam Hinduism and Buddhism have created with this volume a first hand source of information which enables the reader to gain a better understanding of these five world religions and their teachings on nature and technology **Understanding World Religions** David Whitten Smith,Elizabeth Geraldine Burr,2007-10-29

Understanding World Religions studies major worldviews in relation to justice and peace Hindu Buddhist Muslim Jewish Christian Marxist and Native American The Israeli Palestinian conflict is given as a case study for how worldviews impact justice and peace Further chapters explore Christian social teaching liberation theologies active nonviolence and just war theory

Religion, Revelation & Reason Eric Rust, 1981 This book begins with a general consideration of religious experience and moves to a defense of the Christian revelation as the normative one for all other divine disclosures This means that increasingly the book moves towards a defense of theistic thought as contrasted with other religious systems This emphasis on the approach to the understanding of God typical of the Judaeo Christian and Islamic traditions has meant a preoccupation with issues particularly significant for this way of thinking the nature of man the understanding of the creative process the problem of human survival beyond death and the mystery of evil I have however brought in the views of other religious systems and offered a critique of their relationship to the theistic position Wherever thought has moved to the specific content of the Christian disclosure in Jesus Christ I have stopped short Philosophy of religion and theistic philosophy in particular are only prolegomena to the task of the Christian theologian

Religion, Spirituality and Healthcare Peter Roche de Coppens, 2007-05-16 The present work constitutes the most important work written by Dr Roche de Coppens during his long career as an author In it he has brought together his deepest and longest lasting interests religion spirituality and healthcare in a new theoretical perspective that sheds much light on each of these disciplines and which relates them in an evolutionary perspective Many of the conflicts oppositions paradoxes and contradictions that pitted various approaches within each field and between these fields are now explained and integrated Thus allopathy psychosomatic integrative and spiritual medicine can now be reconciled as can religion spirituality rationalism materialism and the New Age The key is the level of consciousness and being of the involved person It is only at the 5th level of consciousness and being that one can reconcile these and bring one in addition to the others rather than having to choose between one or the other

Social Capital and Governance Frane Adam, 2007 The intention of this book's contributions is to focus on some key aspects of social capital in the context of civic participation governance and civil society at both national and EU levels The role of new EU members is particularly stressed The texts aim to demonstrate how social capital in the form of co-operative norms and actions facilitates the self-organisation of civil society and its internal ability to articulate policy relevant alternative proposals The efficiency and responsiveness of governance at different local national transnational levels are also addressed Besides theoretical reconsiderations the book draws attention to the issue of the quality of data and greater methodological reflexivity

God the Creator Robert Cummings Neville, 1992-02-13 God the Creator provides a detailed exposition of a conception of God as the creator of everything determinate It does not defend an established conception such as the Thomist the Calvinist or the Process theological idea but rather elaborates the ancient theme of creation ex nihilo in a new form appropriate to the contemporary world Part one is a rigorous philosophical development of the idea of God as creator ex

nihilo arguing that an adequate solution to the problem of the one and the many demands such a conception This part includes a dialectical examination of contemporary and classical theories of being Part two asks how one can have knowledge of the kind of God described previously it deals with experience analogy and dialectic Part three applies the conception developed in part one to fundamental religious conceptions such as the object of worship the nature of religion and the practices of private and public religious life It presents theories arising from the conception of creation ex nihilo for the interpretation of religious concern conversion faith certainty solitude bliss service liturgy providence evangelism dedication reconciliation brotherhood discipline the integration of public and private religion relative to other dimensions of life freedom love and glory Though the language arises from the Christian tradition and expresses an orthodox strand of that religion the argument weaves throughout the concerns of many world religions Religion and Social Conflicts Otto Maduro, 2005-08-16
