Religion In The Medieval West:

Religion in the Medieval West Bernard Hamilton, 2003-08-29 Western European civilization evolved during the medieval centuries when the whole area was converted to Christianity in its Latin Catholic form This account is an introduction to the religious life of this formative period but is concerned less with history of the institutional Church than with the interaction between the Church and lay society This new edition has been updated throughout and thoroughly reorganized making it easier to approach and use New visual evidence has been provided and a glossary of technical terms is included **Religion in the History of the Medieval West** John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society **Church and People in the Medieval West, 900-1200** Sarah Hamilton, 2015-08-12 During the middle ages belief in God was the single more important principle for every person and the all powerful church was the most important institution It is impossible to understand the medieval world without understanding the religious vision of the time and this new textbook offers an approach which explores the meaning of this in day to day life as well as the theory behind it Church and People in the Medieval West gets to the root of belief in the Middle Ages covering topics including pastoral reform popular religion monasticism heresy and much more throughout the central middle ages from 900 1200 Suitable for undergraduate courses in medieval history and those returning to or approaching the subject for the first time **Heresy, Philosophy and Religion in the Medieval West** Gordon Leff, 2024-10-28 The papers in this volume fall into four sections The first part deals more generally with heresy religious movements and the Church while the second focuses on Wyclif covering his path to dissent his religious doctrines and a doctrinal comparison with Hus Philosophical themes come to the fore in the third section which has papers on the decline of scholasticism in the 14th century and on the trivium and also includes hitherto unpublished essays on the theology of Augustine s two cities and on Ockham and nominalism The final part with another two papers published here for the first time discusses Christian Augustinian and Franciscan concepts of man and the concepts of natural rights according to Ockham and the Franciscans Religion in the History of the Medieval West John H. Van Engen, 2004 Religion in the History of the Medieval West John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a

conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society

Sin:

Essays on the Moral Tradition in the Western Middle Ages Richard Newhauser, 2023-07-28 Richard Newhauser examines here aspects of the moral tradition of medieval thought specifically the construction of the seven deadly sins their offspring and related schematizations of immorality in the Latin West The emphasis in these studies is on the malleability of moral categories their relationship to changes in medieval culture and the creativity and sensitivity of the thinkers who made use of the concepts of sinfulness in the Middle Ages The first section examines the contexts in which the seven deadly sins or nine accessory sins are found in medieval Latin English and German texts and in particular the genre of the treatise on vices and virtues as the major vehicle in which concepts of immorality were examined and presented to a variety of audiences for meditative or pastoral purposes The second section deals with one of the more interesting of the seven deadly sins avarice in its penitential literary apocalyptic and institutional contexts as its definition changed slowly with developing commercial experiences in medieval Europe In the last section the breadth of the concept of a sinful curiosity is examined and its historical development is delineated in the thought of Augustine of Hippo and the early Cistercians
