Religious Commitment Personal Narrative And Healthcare Ethics Caring Well:

Caring Well David H. Smith, 2000-01-01 Caring Well reinvigorates the contribution of religion to medical ethics by developing new methodologies for approaching problems encountered in one particularly important aspect of the work of health care professionals care for the seriously ill It includes new work by some of the most prominent scholars in the field of medical ethics

Health Care and Christian Ethics Robin Gill, 2006-02-16 How can Christian ethics make a significant contribution to health care ethics in today's Western pluralistic society Robin Gill examines the moral gaps in secular accounts of health care ethics and the tensions within specifically theological accounts He explores the healing stories in the Synoptic Gospels identifying four core virtues present within them compassion care faith and humility that might bring greater depth to a purely secular interpretation of health care ethics Each of these virtues is examined in turn using a range of topical issues including health care rationing genetics HIV AIDS withholding withdrawing nutrition from PVS patients and the empirical evidence which suggests a connection between religion and health Professor Gill also argues that these four virtues are shared by other major religious and humanistic traditions and that together with secular principles they can enrich health care ethics even in a pluralistic society

Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2016 In this revised fourth edition of the classic textbook Devettere updates most chapters adding new cases on the following overriding advance directives the palliative care movement prenatal life and abortion neonatal testing and mandatory vaccinations facial transplantations genetic testing and legal issues surrounding the Affordable Care Act

Partnership with the Dying David H. Smith, 2005 What do physicians nurses chaplains and social workers think about moral and religious issues in care for the dying These professionals live with death including many untimely and difficult deaths on a daily basis Based on intensive interviews with a cross sample of health care professionals David H Smith details how the churches could not only be supportive of these primary caregivers in dealing with end of life issues but how they could enlist their help in informing their own congregations about the realities of death To care for the dying is spiritually demanding work Churches should not let health professionals struggle with religious issues whether of patients families or their own in isolation Smith's respondents offer powerful perspectives on the issue of physician assisted suicide Religious and theological ethics cannot afford to ignore insights and questions that come from those who deal with dying every day Finding meaning in the face of human suffering comes less from doctrine than from living a certain kind of life This book is a clarion call for new practical and vital forms of education support and commitment particularly within the churches in the cause of improving care for the dying's from doctrine than from living a certain kind of life This book is a clarion call for new practical and vital forms of education support and commitment particularly within the churches in the cause of improving care for the dying's from doctrine than from living a certain kind of life This book is a clarion call for new practical and vital forms of education support and commitment particularly within the churches in the cause of improving care for the dying's from

doctrine than from living a certain kind of life This book is a clarion call for new practical and vital forms of education support and commitment particularly within the churches in the cause of improving care for the dying Complementary Therapies for the Contemporary Healthcare Marcelo Saad,Roberta De Medeiros,2012-10-17 Complementary therapies CTs are practices products or systems for health that are outside the domain of conventional medicine also called Western or allopathic medicine used either to treat illnesses or to promote health and well being Defining CTs is difficult because the field is very broad and constantly changing The list of what is considered CT changes continually and therapies whose safety and effectiveness are demonstrated may become part of conventional medicine We hope the information from the present book can collaborate in some manner with the ongoing process of evolution of the paradigms related to concepts of health disease and healing **Children, Ethics, and Modern Medicine** Richard B. Miller,2003-06-18 Because the discipline of medical ethics has developed with autonomy as its foundation the field has ignored pediatric ethics The book is resoundingly successful in its effort to rectify this problem A pleasure to read Eric D Kodish M D Director Rainbow Center for Pediatric Ethics Case Western Reserve University Using a form of medical ethnography to investigate a variety of pediatric contexts Richard B Miller tests the fit of different ethical approaches in various medical settings to arrive at a new paradigm for how best to care for children Miller contends that the principle of beneficence must take priority over autonomy in the treatment of children Yet what is best for the child is a decision that doctors cannot make alone In making and implementing such decisions Miller argues doctors must become part of a therapeutic alliance with families and the child undergoing medical care to come up with the best solution Children Ethics and Modern Medicine combines strong philosophical argumentation with firsthand knowledge of the issues facing children and families in pediatric care This book will be an invaluable asset to medical ethicists and practitioners in pediatric care as well as parents struggling with ethical issues in the care of their children Practical Ethics for the Surgeon Lloyd Jacobs,2018-05-09 Publisher's Note Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality authenticity or access to any online entitlements included with the product Recent significant changes in surgery technology regulations and society have greatly impacted how surgeons consider ethical issues in light of professional expertise wisdom and personal responsibility Dr Lloyd A Jacobs along with world renowned surgeons and other health care professionals provides thoughtful intellectually challenging information and commentary in an easy to understand manner to help surgeons think through and respond effectively to complex questions of life death provision of health care and more Covering the wide range of ethical concerns facing today's surgeons this concise readable title is beneficial at all levels of training and practice *Medicine and the Ethics of Care* Diana Fritz Cates,Paul Lauritzen,2002-03-01 In these essays a diverse group of ethicists draw insights from both religious and feminist scholarship in order to propose creative new approaches to the ethics of medical care While traditional ethics emphasizes rules justice and fairness the contributors to this volume embrace an ethics of care which regards emotional engagement in the lives of

others as basic to discerning what we ought to do on their behalf The essays reflect on the three related themes community narrative and emotion They argue for the need to understand patients and caregivers alike as moral agents who are embedded in multiple communities who seek to attain or promote healing partly through the medium of storytelling and who do so by cultivating good emotional habits A thought provoking contribution to a field that has long been dominated by an ethics of principle Medicine and the Ethics of Care will appeal to scholars and students who want to move beyond the constraints of that traditional approach
