Religious Education The Future:

Does Religious Education Have a Future? Mark Chater, Clive Erricker, 2013-05-07 The place of religion in the modern world has changed significantly over the past two decades. This has been partially reflected in the academic study of religion but little if at all in religious education. In addition, the place of RE in schools has been the subject of intense debate due to changes to the curriculum and school structure as well as being part of wider debates on religion in the public sphere. Written by two highly experienced leading practitioners of RE, Does Religious Education have a Future argues for a radical reform of the subject based on principles of pedagogy set free from religious concerns. It challenges teachers, researchers, and educators to rethink their approaches to and assumptions about religious education and enables them to see their work in a larger context that includes pedagogical ideas and political forces. The book offers readers fresh provocative and expertly informed critical perspectives on the global context of RE debates about religion in public places, religion's response to modernity, violent extremism, science and secularism, the evolving educational rationale for RE in schools, the legal arrangements for RE and their impact on the teaching of the subject, the pedagogy of teaching approaches in RE and their effect on standards and perceptions of the subject, the educational commitment of faith belief communities, and how this influences the performance of RE. Does Religious Education have a Future proposes a new attitude to the subject of religious education and a new configuration of both its role and content. This book is essential reading for academics, advisers, and policy makers as well as teachers of RE at primary and secondary levels and trainee and newly qualified teachers.

Does Religious Education have a Future proposes a new attitude to the subject of religious education and a new configuration of

both its role and content This book is essential reading for academics advisers and policy makers as well as teachers of RE at primary and secondary levels and trainee and newly qualified teachers Horizons & Hopes Thomas H. Groome, Harold Daly Horell, 2003 Essays exploring the latest ideas on where religious education is headed with an emphasis on adult and young adult faith formation in the context of total catechesis **Religious Education Into the Future** The Religious Education Association, 2004 **The Future of Protestant Religious Education in an Age of Globalization** Hyun-Sook Kim, Richard R. Osmer, Friedrich Schweitzer, 2018 Global developments have come to shape our lives economically culturally and even religiously Young people growing up in a global age have to be prepared for living in this age Economic and technological demands are important but there also is a need for personal and social orientations that go beyond them This book provides both insights into the Protestant tradition in education as well as its meaning for the future of the church for society and for individual persons It follows an innovative approach by combining perspectives from three different contexts Germany with its important Protestant starting points in the Reformation the United States as a country which has been strongly influenced by Protestantism and South Korea with its comparatively young Protestant tradition The book is based on a combination of international points of view on transnational cooperation on comparative insights and on making constant reference to a global horizon Its presentations and ideas not only address globalization as a driving force behind many future developments but also demonstrate an exercise of global educational thinking Hyun Sook Kim is professor of Christian Education at the College of Theology Yonsei University Korea **Facing the Unknown Future** Ina ter Avest, Cok Bakker, Julia Ipgrave, Silke Leonhard, Peter Schreiner, 2020 During the 20 year history of the European Network for Religious Education through Contextual Approaches ENRECA several books have been published on the subject of Religious Education from sociological psychological or anthropological perspectives and always in the contextual settings of national educational frameworks and other specific culturally bound phenomena Also very often an international comparative perspective was included The shared goal was not so much to reflect on religion as such and on its changing doctrines institutions and prescriptions but to try and understand religion in the specific European contexts of secularization and the plurality of life orientations and to understand how religion becomes manifest in education in a variety of concrete policies and classroom practices reflecting various social issues This volume marking the 20th anniversary of ENRECA has a specific focus on the contextual dimension of time *Crisis, Controversy and the Future of Religious Education* L. Philip Barnes, 2019-12-05 *Crisis Controversy and the Future of Religious Education* sets out to provide a much needed critical examination of recent writings that consider and respond to the crisis in religious education and more widely to a crisis in non confessional forms of religious education wherever practised The book is critical wide ranging and provocative giving attention to a range of responses some limited to the particular situation of religious education in England and some of wider application for example that of the role and significance of human rights and that of the relevance of religious studies and theology to

religious education It engages with a variety of positions and with recent influential reports that make recommendations on the future direction of religious education Constructively it defends both confessional and non confessional religious education and endorses the existing right of parental withdrawal Controversially it concludes that the case for including non religious worldviews in religious education and for the introduction of a statutory objective national religious education curriculum for all schools are both unconvincing on educational philosophical and evidential grounds Timely and captivating this book is a must read for religious and theological educators RE advisers classroom teachers student teachers and those interested in the field of religious education Toward a Future for Religious Education James Michael Lee, Patrick C. Rooney, 1970 *Embracing Diversity: Preparing Future Teachers to Foster Religious Tolerance* Anne Suryani, A. Bukhori Muslim, 2024-04-23 This book presents a detailed discussion of Indonesian future teachers experience of religious diversity tolerance and intolerance their level of intellectual humility and intentions to foster religious tolerance Drawing from large scale mixed methods research conducted in Indonesian universities involving over one thousand three hundred future teachers from diverse religious backgrounds this book demonstrates that religion and religious beliefs can and do shape the way future teachers view their teaching practices and pedagogies The book sheds light into the under researched yet prominent issue of integrating tolerance into teacher education preparation It is set in the largest Muslim majority country in the world which in recent years has seen a gradual degradation of secularity while religion becomes more dominant across all levels and sectors of society This novel and timely book is of interest to researchers scholars and students in religious studies education social sciences and Asian studies as well as anyone interested in the interplay between religion and education in the 21st century
