Remaking Peasant China

Tamara Jacka

Remaking Peasant China:

Reconstructing Twentieth-century China Kjeld Erik Brødsgaard, David Strand, 1998 This text argues that the underlying theme of China's development trajectory in the 20th century is reconstruction Contributors examine how movements and transitions have affected China at regular periods during this century

Freeing China's Farmers: Rural Restructuring in the Reform Era David Zweig, 2016-09-16 A comprehensive analysis of China's rural reforms this book links local experiences to national policy showing the dynamic tension in the reform process among state policy local cadre power and self interest and the peasants search for economic growth Key topics covered include the responsibility system privatization and changing property rights industrialization social conflict cadre corruption urban rural relations conflict over land rural urbanization and the impact of globalization The introduction skillfully integrates the themes that run throughout this work and the concluding chapter focuses on current and future problems in rural China

Women's Work in Rural China Tamara Jacka, 1997 Based on interviews with rural Chinese women officials and social scientists and on Chinese newspapers journals and academic reports Analyses the situation of women of Han nationality with rural household registration most of whom worked in townships and villages but some of whom worked in cities Delineates patterns in gender divisions of labour in the context of economic reform

Sources of Chinese Economic Growth, 1978-1996 Chris Bramall, 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era China By adopting an approach which echoes the pioneering work of Chalmers Johnson Alice Amsden and Robert Wade on other East Asian Economies and which makes full use of the rich statistical materials that have become available since 1978 this book shows that Chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the Maoist era And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions it avoids over simplistic macroeconomic generalization Nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution The policy implications are stark The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit the pace of growth But attempts to replicate China's success in Latin America sub Saharan Africa and South Asia will fail because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even Chinese growth may prove unsustainable

Cooperative and Collective in China's Rural

Development: Between State and Private Interests Eduard B. Vermeer, Frank N. Pieke, Woei Lien Chong, 2024-12-06

Following China's successful decollectivization diverse new organizational forms arose in response to different local situations. The contributors dissect the relationships among the emerging class of entrepreneurs, local officials and their family members and associates.

Mao's Invisible Hand Sebastian Heilmann, Elizabeth J. Perry, 2020-10-26

Observers have been predicting the demise of China's political system since Mao Zedong's death over thirty years ago. The Chinese Communist state however seems to have become increasingly adept at responding to challenges ranging from leadership succession and popular unrest to administrative reorganization, legal institutionalization and global economic integration. What political techniques and procedures have Chinese policymakers employed to manage the unsettling impact of the fastest sustained economic expansion in world history? As the authors of these essays demonstrate, China's political system allows for more diverse and flexible input than would be predicted from its formal structures. Many contemporary methods of governance have their roots in techniques of policy generation and implementation dating to the revolution and early PRC techniques that emphasize continual experimentation. China's long revolution had given rise to this guerrilla style decisionmaking as a way of dealing creatively with pervasive uncertainty. Thus even in a post-revolutionary PRC the invisible hand of Chairman Mao tamed, tweaked and transformed, plays an important role in China's adaptive governance.

China Watching Robert Ash, David Shambaugh, Seiichiro Takagi, 2007-01-24

An international team of contributors analyzes the state of European, Japanese and American scholarship on China over the last decade, exploring in depth the main subjects and trends in research being done on contemporary Chinese politics, economy, foreign affairs and security studies.

China-Europe Relations David Shambaugh, Eberhard Sandschneider, Zhou Hong, 2007-09-24

Written by a hugely experienced team of international contributors from China, Europe and the US, this book takes an innovative and insightful look at one of the most important bilateral relationships in international relations this century.

Rural China Jie Fan, Thomas Heberer, Wolfgang Taubmann, 2015-05-15

This book reports the findings of two field studies conducted between 1993 and 2001 in seven townships and six provinces in China. The authors describe the process of rural urbanization and its related economic, social and political changes by focusing mainly on the Zhen town, in addition to administrative offices and companies involved in the local economy and village committees. The authors show that the social changes resulting from China's economic reforms are occurring mainly from below and that this process is also resulting in a weakening of the economic and political dominance of the central government. Other changes discussed in this study include the development of new ownership structures and the increasing dominance of the private sector, a shift in the functions of administrative offices as the bureaucracy becomes increasingly business-oriented, the rise of a new local elite, a rebirth of traditional social structures, clans, local associations and the emergence of new interest groups and institutions to represent their needs.

China's Remarkable Economic Growth John Knight, Sai Ding, 2012-04-12

cent per annum for the last three decades This book considers one of the biggest questions facing contemporary economists why and how is the Chinese economy growing so fast
