Remote Sensing For Geologists A Guide To Image Interpretation:

Remote Sensing for Geologists Gary L. Prost, 2002-01-24 A guide to image interpretation this book contains detailed color plates and tables that compare satellite imaging systems list remote sensing web sites and detail photointerpretation equipment It includes case histories of the search for petroleum and mineral deposits and examines engineering uses of remote sensing The volume comprises four sections project initiation exploration techniques exploitation and engineering remote sensing and environmental concerns They combine to provide readers with a solid foundation of what image interpretation is and enables them to recognize features of interest and effectively use imagery in projects for the petroleum mining or groundwater industries

Remote Sensing for Geologists Gary L. Prost, 2003-09-02 This manual of image interpretation demonstrates what to look for on imagery when engaged in mineral or hydrocarbon exploration mine and oil field development engineering projects and environmental monitoring Four sections comprise this volume project initiation exploration techniques exploitation and engineering remote sensing and environmental concerns They combine to provide a solid foundation of what image interpretation is and enables readers to recognize features of interest and effectively use imagery in projects for the petroleum mining or groundwater industries

Remote Sensing for Geologists G. L. Remote Sensing for Geoscientists Gary L. Prost, 2013-12-13 This third edition of the bestselling *Remote Sensing for Geologists A Guide to Image Interpretation* is now titled *Remote Sensing for Geoscientists Image Analysis and Integration* The title change reflects that this edition applies to a broad spectrum of geosciences not just geology stresses that remote sensing has become more than photointerpretation and emphasizes integration of multiple remote sensing technologies to solve Earth science problems The text reviews systems and applications explains what to look for when analyzing imagery and provides abundant case histories to illustrate the integration and application of these tools See What's New in the Second Edition Broader coverage to include integration of multiple remote sensing technologies Expanded with significant new illustrations in color and reviews of new satellites and sensors Analysis of imagery for geobotanical remote sensing remote geochemistry modern analogs to ancient environments and astrogeology The book covers how to initiate a project including determining the objective choosing the right tools and selecting imagery It describes techniques used in geologic mapping and mineral and hydrocarbon exploration image analysis used in mine development and petroleum exploitation site evaluation

groundwater development surface water monitoring geothermal resource exploitation and logistics It also demonstrates how imagery is used to establish environmental baselines monitor land air and water quality map hazards and determine the effects of global warming The many examples of geologic mapping on other planets and the moon highlight how to analyze planetary surface processes map stratigraphy and locate resources The book then examines remote sensing and the public geographic information systems and Google Earth and how imagery is used by the media in the legal system in public relations and by individuals Readers should come away with a good understanding of what is involved in image analysis and interpretation and should be able to recognize and identify geologic features of interest Having read this book they should be able to effectively use imagery in petroleum mining groundwater surface water engineering and environmental projects

Remote Sensing for Geoscientists Gary L. Prost, 2019-12-14 The third edition of this text has a new title The previous *Remote Sensing for Geologists a Guide to Image Interpretation* is now *Remote Sensing for Geoscientists Image Analysis and Integration* The title change reflects 1 that this edition applies to a broad spectrum of geosciences not just geology 2 that remote sensing has become more than photointerpretation and 3 an emphasis on integration of multiple remote sensing technologies to solve Earth science problems Since publication of the 2nd edition in 2001 remote sensing systems have been acquiring not only visible infrared and microwave images but also have been detecting atmospheric gases ocean temperatures wind speeds and mapping minerals on the Moon and planets as well as recording potential fields and digital elevation data

Kiefer, Jonathan Chipman, 2003-10-10 From recent developments in digital image processing to the next generation of satellite systems this book provides a comprehensive introduction to the field of remote sensing and image interpretation This book is discipline neutral so readers in any field of study can gain a clear understanding of these systems and their virtually unlimited applications The authors underscore close interactions among the related areas of remote sensing GIS GPS digital image processing and environmental modeling Appendices include material on sources of remote sensing data and information remote sensing periodicals online glossaries and online tutorials *Geohazard-associated Geounits* L. A. Rivard, 2009-12-24 Originally conceived as a technical manual but now offering the reader so much more this timely work deals with various aspects of geohazards surely an area of growing importance in this world of global warming Using photogeology and remote sensing Quebecois researcher Rivard's work is unique in that the succinct text supports the illustrations and is devised as a quick reference standardized presentation of 170 globally occurring photo geomorphological units Mineral Exploration K. Mather, Magaly Koch, 2022-04-06 Computer Processing of Remotely Sensed Images A thorough introduction to computer processing of remotely sensed images processing methods and applications Remote sensing is a crucial form of measurement that allows for the gauging of an object or space without direct physical contact allowing for the assessment and recording of a target under conditions which would normally render access difficult or impossible This is done through the analysis and interpretation of electromagnetic radiation EMR that is reflected or emitted by an object surveyed and recorded by an observer or instrument that is not in contact with the target This methodology is particularly of importance in Earth observation by remote sensing wherein airborne or satellite borne instruments of EMR provide data on the planet's land seas ice and atmosphere This permits scientists to establish relationships between the measurements and the nature and distribution of phenomena on the Earth's surface or within the atmosphere Still relying on a visual and conceptual approach to the material the fifth edition of this successful textbook provides students with methods of computer processing of remotely sensed data and introduces them to environmental applications which make use of remotely sensed images The new edition's content has been rearranged to be more clearly focused on image processing methods and applications in remote sensing with new examples including material on the Copernicus missions microsatellites and recently launched SAR satellites as well as time series analysis methods The fifth edition of Computer Processing of Remotely Sensed Images also

contains A cohesive presentation of the fundamental components of Earth observation remote sensing that is easy to understand and highly digestible Largely non technical language providing insights into more advanced topics that may be too difficult for a non mathematician to understand Illustrations and example boxes throughout the book to illustrate concepts as well as revised examples that reflect the latest information References and links to the most up to date online and open access sources used by students Computer Processing of Remotely Sensed Images is a highly insightful textbook for advanced undergraduates and postgraduate students taking courses in remote sensing and GIS in Geography Geology and Earth Environmental Science departments
