**National Union Catalog**, 1956. Includes entries for maps and atlases. **Aerospace Bibliography**, 1972. [Digital Apollo](#). David A. Mindell, 2011-09-30. The incredible story of how human pilots and automated systems worked together to achieve the ultimate achievement in flight: the lunar landings of NASA's Apollo program. As Apollo 11's Lunar Module descended toward the moon under automatic control, a program alarm in the guidance computer's software nearly caused a mission abort. Neil Armstrong responded by switching off the automatic mode and taking direct control. He stopped monitoring the computer and began flying the spacecraft, relying on skill to land it and earning praise for a triumph of human over machine. In *Digital Apollo*, engineer-historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program. In each of the six Apollo landings, the astronaut in command seized control from the computer and landed with his hand on the stick. Mindell recounts the story of astronauts' desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer. From the early days of aviation through the birth of spaceflight, test pilots and astronauts sought to be more than passengers in a can despite the automatic controls, digital computers, and software developed by engineers. *Digital Apollo* examines the design and execution of each of the six Apollo moon landings, drawing on transcripts and data telemetry from the flights, astronaut interviews, and NASA's extensive archives. Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight: a lunar landing, traces and reframes the debate over the future of humans and automation in space. The results have implications for any venture in which human roles seem threatened by automated systems, whether it is the work at our desktops or the future of exploration. During 1934 and 1944 in Calcutta, Stephen Smith worked alone and unsupported on developing rocket transport. In 1935 he was the first to demonstrate the successful transport by a rocket of livestock, food, and medicine. This book charts the story of Stephen

H Smith described by a contemporary as the greatest one man campaign for rocketry He dedicated his life to working alone in northeast India to develop a new revolutionary means of transport using only rocket power The development of rockets in India is commonly understood to have ended with Tipu Sultan in 1799 and started again in 1963 with what is now called the Indian Space Research Organisation However in the intervening period one man built and championed rockets working alone in Calcutta In 1925 he set up the Indian Air Mail Society and it is amongst the global philatelic community where his work is still known but is almost entirely forgotten from the popular imagination in India On 14 February 1891 Stephen H Smith the only son of a tea plantation manager originally from Norfolk England was born in the Strawberry Hill region of Shillong Between 1934 and 1944 he conducted over 200 rocket experiments to demonstrate the utility of a rocket as a means of transport Small self funded groups to develop rockets were established in USSR USA Britain Australia and Germany From these groups Sergei Korolev and Wernher von Braun emerged and competed in the epic space race that resulted in Sputnik Gagarin and Apollo 11 Stephen H Smith was their contemporary but worked alone and unsupported in India Long after he had died he was inducted into the Hall of Fame by the American Airmail Society in 1989 In 1992 a year after the centenary of his birth the Indian government celebrated his achievements by issuing a stamp and a first day cover dedicated to his work Today his work is found in official NASA publications the Journal of the British Interplanetary Society and the National Air and Space Museum This new study of his contacts with the King of Sikkim King George V with a member of parliament in London and a 25 year long correspondence with a Swiss philatelist reveals in his own words his struggle to attain recognition and support for his work His reluctant attempt to work with the military authorities in India during World War II ended in frustration His multiple attempts in 1949 to contact the Governor of Bengal and Prime Minister Nehru in the newly independent India failed to generate a response **American Book Publishing Record** ,2002
