**Feature: Rogelio Salmona** Rogelio Salmona, Nobuyuki Yoshida, 2008      Rogelio Salmona Ricardo L. Castro, 2010-08  
Complementing and advancing Ricardo L. Castro's first study of the famous Colombian architect Rogelio Salmona, this in-depth reference presents a dozen of the most significant pieces from the last decade. Capturing his characteristic use of red brick and the employment of natural shapes in his designs, this stunning tribute to an extraordinary man and architectural legacy includes information and analysis of each work as well as pictures, sketches, and layout plans. Such famed works as the Human Sciences Postgraduate Studies Building at the National University of Bogotá, the Virgilio Barco Library in Bogotá, the Gabriel García Márquez Cultural Center, and his vacation home in Riofrío are all highlighted.      **Rogelio Salmona** Rogelio Salmona, Sociedad Colombiana de Arquitectos, 2006      *The Ibero-American Baroque* Beatriz de Alba-Koch, 2022-02-07  
The Baroque was the first truly global culture. The Ibero-American Baroque illuminates its dissemination, dynamism, and transformation during the early modern period on both sides of the Atlantic. This collection of original essays focuses on the media, institutions, and technologies that were central to cultural exchanges in a broad early modern Iberian world brought into being in the aftermath of the Spanish and Portuguese arrivals in the Americas. Focusing on the period from 1600 to 1825, these essays explore early modern Iberian architecture, painting, sculpture, music, sermons, reliquaries, processions, emblems, and dreams, shedding light on the Baroque as a historical moment of far-reaching and long-lasting importance. Anchored in extensive empirical research that provides evidence for understanding how the Baroque became globalized, The Ibero-American Baroque showcases the ways in which the Baroque has continued to define Latin American identities in the twentieth and twenty-first centuries.      *A Gringa in Bogotá* June Carolyn Erlick, 2010-03-01  
To many foreigners, Colombia is a nightmare of drugs and violence. Yet normal life goes on there, and in Bogotá it's even possible to forget that war still ravages the countryside. This paradox of perceptions, outsiders' fears versus insiders' realities, drew June Carolyn Erlick back to Bogotá for a year's stay in 2005. She wanted to understand how the city she first came to love in 1975 has made such strides toward building a peaceful civil society in the midst of ongoing violence. The complex reality she found comes to life in this compelling memoir. Erlick creates her portrait of Bogotá through a series of vivid vignettes that cover many aspects of city life. As an experienced journalist, she lets the things she observes lead her to larger conclusions. The courtesy of people on buses, the absence of packs of stray dogs and street trash, and the willingness of strangers to help her cross an overpass when vertigo overwhelms her—all become signs of *convivencia*, the desire of Bogotáños to live together in harmony despite decades of war. But as Erlick settles further into city life, she finds that war in the city is invisible but constantly present in subtle ways, almost like the constant mist that used to drip down from the Bogotá skies so many years ago. Shattering stereotypes with its lively reporting, *A Gringa in Bogotá* is a must-read for going beyond the headlines about the drug war and bloody conflict.      **Transculturation**, 2016-08-01  
*Transculturation: Cities, Spaces, and Architectures in Latin America* explores the critical

potential inherent in the notion of transculturation in order to understand contemporary architectural practices and their cultural realities in Latin America Despite its enormous theoretical potential and its importance within Latin American cultural theory the term transculturation had never permeated into architectural debates In fact none of the main architectural theories produced in and about Latin America during the second half of the twentieth century engaged seriously with this notion as a way to analyze the complex social cultural and political circumstances that affect the development of the continent s cities its urban spaces and its architectures Therefore this book demonstrates for the first time that the term transculturation is an invaluable tool in dismantling the essentialist genealogical and hierarchical perspectives from which Latin American architectural practices have been viewed *Transculturation Cities Spaces and Architectures in Latin America* introduces new readings and interpretations of the work of well known architects new analyses regarding the use of architectural materials and languages new questions to do with minority architectures gender and travel and from beginning to end it engages with important political and theoretical debates that have rarely been broached within Latin American architectural circles Contemporary Architects Muriel Emanuel,2016-01-23

*Rethinking, Reinterpreting and Restructuring Composite Cities* Meltem Aksoy,Gülsün Sağlam,2017-11-06  
Developments in science and technology demand driven education and practices climate change the gradual decrease in natural resources and economic constraints all combine to drive increased interest in research in architecture and urbanism at EU levels In light of this the EURAU conferences were initiated in 2004 to create a platform for researchers to share their own research outputs and knowledge and to discuss problems emerging in architecture and urbanism with a view to develop solutions This book brings together 19 selected papers delivered at the EURAU2014 Istanbul Composite Cities Conference the primary aim of which was to provide a medium in which the complex relationships between urban form and urban experience could be discussed The conference did this by examining four composite characters of today s cities the hybrid city the morphed city the fragmented city and the mutated city The volume addresses the importance of research on the complexity of today s cities cities that are transforming on various levels from local to global while also shedding light on new models of urbanism discussed together with new decision making actors **Bio-Architecture** Javier Senosiain,2013-05-13  
Bio Architecture studies the natural principles of animal and human constructions from several different perspectives and presents a great part of the knowledge that gives origin and shape to built form Organic architecture offers a design approach arising from natural principles bringing us back to local history tradition and cultural roots to give us built forms which are in harmony with nature It also shows how architects can take advantage of the resources that contemporary technology has placed within our grasp Bio Architecture is a unique book that studies the natural principles of animal and human constructions from several different perspectives and looks at what gives origin and shape to built form The text gives an informative inspiring overview of the drive toward organically informed design both intrinsically and aesthetically using a

wide variety of international examples Javier Senosiain is an architect and an historian He has pursued his interest in Organic Architecture across the globe drawing parallels between Buckminster Fuller s Geodesic dome and the spider s web between Santiago Calatrava s Cathedral of St John in NY and the roots of a tree Where nature has inspired form Senosiain has made a career of analyzing and applying the principles he sees in some very creative writing and architecture
