transfers that make increasingly advanced technologies possible where there is enough money Our fetishised understandings of money and technologies cannot deal with the escalating production of entropy underlying climate change They also drive the dramatic reduction of biological and cultural diversity under globalisation Given these problems many people reassess premodern and indigenous societies in search of more sustainable ideas on how to organise exchange Liquidate How Money is Dissolving the World will be of interest to scholars working in anthropology sociology economics history semiotics comparative religions and indigenous studies
