Rogue Ship:

Rogue Ship Alfred Elton Van Vogt, 1975 *Emissary of Peace* Wolfgang Gosler, 2005-10-21 *Emissary of Peace* is a science fiction novel about an ambassador named T Lars. He is also a scientist and a computer geek. The central government of the Varangian Confederacy sends him on an important mission which is in actuality three missions in one. The mission lasts many months since it involves travel for many thousands of light years to distant parts of the galaxy. He is assigned to travel with Commander L Qwan who commands the Confederate Star Ship L Thor and Subcommander T Larissa who is second in command. The L Thor is named after the hero of an ancient interstellar battle from many centuries ago. The first assignment is to investigate a mysterious rogue space ship which entered the galaxy through a wormhole. During the course of the investigation they get help from allies called the Tivoli Republic. The Tivoli are intelligent cats that assist the ambassador by towing the rogue ship to the Tivoli Varangian border. The investigation results in the uncovering of ancient mysteries involving the origins of the Varangians. Historical facts are uncovered from archives found on that ship. These archives were left on that rogue ship by a people distantly related to the ancestors of the Varangians. This assignment results in having some ancient mysteries solved. At the same time new mysteries emerge. They are about to proceed with the second assignment of the mission when unexpectedly advanced beings transport them to the Andromeda Galaxy. This results in deviations from the original mission plan. In the process they learn about the fate of ancient allies of the Varangian ancestors and how they ended up in the Andromeda Galaxy. These ancient allies are the Iripini who were victims of a viral biological attack. They were an ill-fated people who died off. The L Thor was investigating the remains and artifacts of their civilization. During the course of the investigation they encounter two alien species and Ambassador T Lars ends up brokering a peace between those alien species. The result is good where the former Iripini planet ends up in good hands of the two alien species who agree to a joint and shared control of the planet. After the advanced beings transport the L Thor back to the Milky Way Galaxy they end up closer to Earth where they are able to proceed with their assignment. They visit Earth as part of an assigned scientific team. On Earth the year is 2042 AD. Without interfering in any of the political affairs of Earth at the time as instructed they collect voluminous amounts of botanical, zoological, geological, cultural, and historical information. This assignment brings them to many countries on most continents around the world. They come into contact with many cultures around the world and even make several friends. They explore tropical rain forests, deserts, and other habitats. They learn about Earth's history. They also learn that the humans and Varangians share some genetic material which opens up another mystery. The last assignment of this mission is to negotiate a peace treaty with another superpower in the galaxy, the Federation of Incorporated Planets. This part of the assignment is always problematic because of the nature of how the Federation is run. It is run like a corporation. He succeeds at drawing up the peace treaty because of the convenient nature of the trade agreements linked to the stipulations of the treaty. Beyond that the Federation's central government seems to

display a strong disinterest In the end all aspects of the mission result in overall success but as some ancient mysteries are solved other mysteries and potential ancient threats remain Not all problems can be solved so easily Various themes are expressed involving issues of war and peace environmental issues philosophy history and political affairs Various civilizations are introduced with a wide spectrum of levels of advancement Behind it all Ambassadors [Ships of Mercy](#) Don

No Man's Land Justin V. Hastings, 2010-11-15 The increased ability of clandestine groups to operate with little regard for borders or geography is often taken to be one of the dark consequences of a brave new globalized world Yet even for terrorists and smugglers the world is not flat states exert formidable control over the technologies of globalization and difficult terrain poses many of the same problems today as it has throughout human history In *No Man's Land* Justin V Hastings examines the complex relationship that illicit groups have with modern technology and how and when geography still matters Based on often difficult fieldwork in Southeast Asia Hastings traces the logistics networks command and control structures and training programs of three distinct clandestine organizations the terrorist group Jemaah Islamiyah the insurgent Free Aceh Movement and organized criminals in the form of smugglers and maritime pirates Hastings also compares the experiences of these groups to others outside Southeast Asia including al Qaeda the Tamil Tigers and the Somali pirates Through reportage memoirs government archives interrogation documents and interviews with people on both sides of the law he finds that despite their differences these organizations are constrained and shaped by territory and technology in similar ways In remote or hostile environments where access to the infrastructure of globalization is limited clandestine groups must set up their own costly alternatives Even when successful Hastings concludes criminal insurgent and terrorist organizations are not nearly as mobile as pessimistic views of the sinister side of globalization might suggest

No Man's Land Justin VanOverloop Hastings, 2010 Examines the complex relationship that illicit groups have with modern technology and how and when geography still matters tracing the networks command structures and training programs of Southeast Asian terrorist insurgent and criminal groups

Ocean Surface Waves: Their Physics And Prediction (Third Edition) Stanislaw Ryszard Massel, 2017-09-28 This book is an extended and substantially updated edition of the previous book editions published in 1996 and 2013 under the same title The 3rd edition is a one volume modern and comprehensive overview of the current knowledge of regular and random ocean surface waves in deep waters and in coastal zones Since the previous editions many new theoretical advances have been made in the physical understanding and analytical and numerical treatment of various ocean wave problems The revisions and supplements demanded by these advances have been substantial therefore the scope of the book has been extended by adding a new chapter and substantially supplementing others All chapters of the book have been rewritten to include and describe in detail many new discoveries made since the completion of the previous editions In this 3rd edition a comprehensive and updated overview of the fundamentals of the regular wave mechanics as well as the spectral and statistical properties of random waves are given Except for the updated chapters dedicated to tsunami and extreme waves a new chapter dealing with other

types of impulsive waves starting from rest are also included The air sea interaction processes as well as the last improvements in ocean wave modelling and presently available wave prediction models WAM WAVEWATCH III UMWM NEMO are thoroughly discussed and their applications are demonstrated The review of the present ocean observation methods encompasses the modern sea truthing as well as applications of data from presently operating marine satellites In this revised edition chapters on the behavior of surface waves in the vegetated environments such as coral reef mangrove forest seaweed and seagrass areas are substantially extended and updated to include the last discoveries The explanations in the book are self contained and detailed enough to capture the interest of the potential readers and to prompt them to explore the research literature The list of rapidly growing number of the recent papers on the ocean waves has been extended substantially up to about 900 titles

Last Chance Kelly W. Carpenter, 2018-10-15 A colony ship that left Earth two hundred years previously developed serious problems and entered the nearest solar system to make repairs Although no aliens were encountered during their trip an alien vessel orbiting the planet opened fire on them immediately without provocation The alien ship was destroyed and two types of aliens were discovered The Humans learned that the planet was not colonized but only contained a few individuals The Humans decided to colonize the planet and call it Last Chance Thus a war started with the Sickgaar that lasts for many years until the end of the novel The first battle takes place on Last Chance when the Sickgaar sends a large relief force to wipe out the Human invaders The Humans and Toli form an Allied Federation and fight together The Toli are given a second planet called New Hope of their own in the Last Chance system as their numbers increase The third major character Jojotazzi a Toli appears at this point She starts as a young Toli orphan discovered by Maria Lopez and progresses to create a vast empire of businesses and space freighters The Sickgaar are defeated and all their planets are taken for the Allied Federation after several years of war Numerous space and ground battles occur in the novel At the end the Humans worry that the Sickgaar may not have all been eliminated because a strange ship similar to a Sickgaar ship was seen close to an empty Sickgaar planet months after the war is over

Space Exploration on Film Paul Meehan, 2022-05-24 Over the course of several decades scientific fact has overtaken science fiction as humankind's understanding of the universe has expanded Mirroring this development the cinematic depictions of space exploration over the last century have evolved from whimsical sci fi fantasies to more fact based portrayals This book chronologically examines 75 films that depict voyages into outer space and offers the historical cultural and scientific context of each These films range from Georges Melies fantastical A Trip to the Moon to speculative science fiction works such as 2001 A Space Odyssey Solaris and Contact and fact based accounts of actual space missions as depicted in The Right Stuff Apollo 13 Salyut 7 and First Man Each film is analyzed not only in terms of its direction screenplay and other cinematic aspects but also its scientific and historical accuracy The works of acclaimed directors including Fritz Lang George Pal Stanley Kubrick Andrei Tarkovsky Robert Wise Ron Howard Robert Zemeckis Ridley Scott and Christopher Nolan are

accorded special attention for their memorable contributions to this vital and evolving subgenre of science fiction film
