**The Role of Scale in Canada/U.S. Productivity Differences in the Manufacturing Sector, 1970-1979** John Russel Baldwin, Paul K. Gorecki, Royal Commission on the Economic Union and Development Prospects for Canada, 1986  
Understanding the reason for the productivity differences between Canadian and U S manufacturing industries is important if a sound industrial strategy is to be followed in the next decade This is particularly the case if Canada implements its policy of closer economic ties with the United States either in the form of the previous Trudeau Administration s sectoral free trade approach or the present Mulroney Administration s attempt to enhance access of Canadian goods to the United States

Industrial Dynamics B. Carlsson, 2012-12-06 This book is based on the papers presented at a conference on New Issues in Industrial Economics held at Case Western Reserve University Cleveland Ohio June 8 10 1987 The conference was organized by the Research Program in Industrial Economics RPIE in the Department of Economics at CWRU and was sponsored by The Cleveland Foundation the Eaton Corporation and The Standard Oil Company later renamed BP America Inc Their generous support is gratefully acknowledged All of the papers have been revised in several cases extensively since their presentation at the conference One of the primary reasons for organizing the conference was the concern that Industrial Economics has become too narrowly focused in most academic programs largely being confined to Industrial Organization i e issues of public policy towards enterprise with emphasis on antitrust and regulatory policy This subject definition leaves out a number of interesting and important questions about how industries evolve over time what the role of technological change and organizational change is in that process and the associated structural changes within industries and firms The object of this book is to derme these issues and suggest a framework within which they can be analyzed I would like to thank all the conference participants for their contributions particularly my colleagues at CWRU Asim Erdilek and William S Peirce without whose encouragement and support the conference would not have taken place
